Common factors throughout all phases

- Covid-19 specific risk assessments prior to all collective training events
- Consider length of training
- Employ all mitigation measures to include: face coverings, social distancing, frequent handwashing/use of hand sanitizer, and proper sanitation measures
- Consider UV light and ventilation (outdoor training safer than indoor)
- Preventive med inspections prior to all field training exercises
- Daily symptom checks (Leaders conduct Phase I & 2, self checks Phase 3 &4)
