2021 FORT BELVOIR POST GUIDE

WELCOME TO FORT BELVOIR

Home to more than 145 distinct mission partners, Fort Belvoir is along the Potomac River in southern Fairfax County, VA. Home to a variety of logistics, intelligence and administrative agencies, Belvoir also boasts a community hospital on the cutting edge of medical care. U.S. Army Garrison Fort Belvoir provides services to more than 245,000 military, defense civilians, retirees and families.

That population includes two additional facilities.

Fort Belvoir North Area is home to the National Geospatial-Intelligence Agency. Also, Belvoir supports Rivanna Station in Albemarle County, VA. With approximately 3,000 personnel, Rivanna is home to the Joint-Use Intelligence Analysis Facility and the National Ground Intelligence Center.

Service members from all U.S. military branches and their families live, work and play at Fort Belvoir. With robust community, sports and leisure activities and a 270,000-square foot Exchange, which

opened in 2013, the Belvoir community has world-class amenities for everyone's enjoyment.

Inside the gates, Belvoir strives to be home to all who serve here. Outside the gates, Belvoir reaches out to the community to ensure the installation remains a good neighbor.

In all we do, on post or off, we demonstrate each day why we are Leaders in Excellence. Welcome. We're glad you're here! We expect you'll soon find Fort Belvoir "Beautiful to See."

MISSION PARTNERS

MISSION PARTNERS

NATIONAL GEOSPATIAL -INTELLIGENCE AGENCY

The National Geospatial-Intelligence Agency has a responsibility to provide the products and services that decision makers, warfighters and first responders need, when they need it most. As a member of the Intelligence Community and the Department of Defense, NGA supports a unique mission set. We are committed to acquiring, developing and maintaining the proper technology, people and processes that enables overall mission success.

Geospatial intelligence, or GEOINT is the exploitation and analysis of imagery and geospatial information to describe, assess and visually depict physical features and geographically referenced activities on the Earth. GEOINT consists of imagery, imagery intelligence and geospatial information.

DEFENSE LOGISTICS AGENCY

DLA provides effective and efficient global solutions to Warfighters and our other valued customers.

Our vision is clear: Deliver the right solution on time, every time. As America's

combat logistics support agency, DLA provides the Army, Marine Corps, Navy, Air Force, other federal agencies and partner-nation armed forces with a full spectrum of logistics, acquisition and technical services. DLA sources and provides nearly all of the consumable items America's military forces need to operate – from food, fuel and energy to uniforms, medical supplies and construction material.

DLA generated more than \$38 billion in sales and revenue last year. The agency employs nearly 25,000 civilians and military, in 48 states and 28 countries. DLA operates 24 distribution depots supporting more than 2,430 weapons systems; and manages nine supply chains with nearly 5.3 million line items. In 2014, DLA received nearly \$40 billion in excess and surplus property that was reutilized, transferred, disposed of or donated. Additionally, DLA administers the storage and disposal of strategic and critical materials to support national defense. Headquartered at Fort Belvoir, DLA is a global enterprise – wherever the United States has a significant military presence, DLA is there to support.

AEROSPACE DATA FACILITY - EAST

ADF-E is a multi-mission ground station responsible for supporting worldwide defense operations and multi-agency collection, analysis, reporting, and dissemination of intelligence information. It provides data to defense, intelligence and civil agencies supporting the U.S. government and its allies.

FORT BELVOIR COMMUNITY HOSPITAL

Fort Belvoir Community Hospital is northern Virginia's home for world-class military healthcare. From our hospital campus on Fort Belvoir to our satellite health centers in Fairfax and Dumfries, we are committed to providing each beneficiary with an outstanding patient experience through safe, quality, compassionate care, every day. It's an honor to serve our nation's heroes, and we strive daily to provide the best healthcare, in the most beautiful healthcare facilities available in the National Capital Region. Because caring for America's Heroes is much more than a duty — it's our passion.

Fort Belvoir Community Hospital is part of an integrated health care network providing world-class medical service to the nation's wounded, active-duty Service members, retirees and family members. The state-of-the-art facilities provide patients with the best inpatient and outpatient services to help them heal in mind, body and spirit.

Fort Belvoir Community Hospital is also home to the Belvoir Brain Wellness Center, a National Intrepid Center of Excellence facility, that provides comprehensive evaluation of patients dealing with TBI, Post-Traumatic Stress, and other psychological health conditions. In its revolutionary approach to redefine TBI

MISSION PARTNERS

clinical care, the multidisciplinary team creates an individualized treatment plan and a single concept of care to enhance discovery, refine care delivery methods, and influence the culture of leadership advocacy and shared responsibility for warriors, retirees, family members and caregivers.

U.S. ARMY INTELLIGENCE AND SECURITY COMMAND

INSCOM executes mission command of operational intelligence forces; conducts worldwide multi-discipline and all-source intelligence operations; delivers advanced-skills training, linguist support, specialized, quick-reaction capabilities; and intelligence-related logistics, contracting, and communications in support of Army, joint, and coalition commands and the National Intelligence community.

DEFENSE THREAT REDUCTION AGENCY/ U.S. STRATEGIC COMMAND CENTER FOR COMBATING WEAPONS OF MASS DESTRUCTION

DTRA is the Department of Defense's official combat support agency for countering weapons of mass destruction, addressing the entire spectrum of chemical, biological, radiological, nuclear and high-yield explosive threats. DTRA's programs include basic science research and development, operational support to U.S. warfighters on the frontline, and an in-house WMD think tank that aims to anticipate and mitigate future threats long before they have a chance to harm the United States and our allies. SCC-WMD, the U.S. Strategic Command Center for Combating Weapons of Mass Destruction,

synchronizes Combating Weapons of Mass Destruction efforts across our military's geographic commands and leverages the people, programs and interagency relationships of DTRA at a strategic level. We work with the military services, other elements of the U.S. government, and countries across the planet on counter proliferation, nonproliferation and WMD reduction issues, with one goal in mind: Making the World Safer.

NATIONAL GROUND INTELLIGENCE CENTER

The National Ground Intelligence Center provides all-source and Geospatial Intelligence on foreign ground force capabilities and related military technologies, while integrating with mission partners to ensure the U.S. Army, DoD, joint and national-level decision

MISSION PARTNERS

makers maintain decision advantage to protect U.S. interests at home and abroad.

PROGRAM EXECUTIVE OFFICE – ENTERPRISE INFORMATION SYSTEMS

To enable information dominance for every Soldier, by rapidly delivering innovative and cost-effective IT solutions connecting the global Army.

PEO EIS will be a recognized leader in driving innovative technology implementation and shaping information technology acquisition across the Defense Department and the federal government.

OFFICE OF THE ADMINISTRATIVE ASSISTANT TO THE SECRETARY OF THE ARMY

The Administrative Assistant to the Secretary of the Army has a primary

function to provide direct support to the Secretary of the Army. This mission effectively serves customers in the Army and Department of Defense communities with a wide range of executive services, operations support and business activities. In addition, for Headquarters, Department of the Army, and when specified, direct reporting units, the AASA exercises the same authorities as commanders of Army commands and Army Service Component Commands, as prescribed by regulation, policy, delegation or other issuance.

The Office of the Administrative Assistant manages Headquarters, Department of the Army resources, provides information technology services to the greater Pentagon community, and manages the Army's historical and heraldry programs. OAA also provides Army publishing and visual information services, records management, security and safety, and religious services for a diverse customer base.

COMMUNICATIONS-ELECTRONICS RESEARCH, DEVELOPMENT AND ENGINEERING CENTER/ NIGHT VISION AND ELECTRONIC SENSORS DIRECTORATE

Communications-Electronics Research, Development and Engineering Center/Night Vision and Electronic Sensors Directorate's mission is to conduct research and development in order to provide U.S. warfighters with advanced sensor technology to dominate the 21st Century digital battlefield. CERDEC NVESD exploits sensor and sensor suite technologies (unmanned aerial/ground vehicles, rotorcraft, fixed wing aircraft, individual Soldier systems) for reconnaissance, surveillance and target acquisition (day and night) under adverse battlefield environments; denies the enemy the same capabilities through electro-optic means and/or camouflage, concealment,

MISSION PARTNERS

and deception; detects and neutralize mines, threat explosives, minefields and unexploded ordnance; provides for night driving and pilotage; and protects forward warfighters, fixed installations and rear echelons from enemy intrusion.

DEFENSE ACQUISITION UNIVERSITY

Defense Acquisition University is the primary training organization for the Defense Acquisition workforce. Through DAU, acquisition professionals gain fundamental knowledge and skills, find acquisition resources to help them on the job, and get assistance tailored to organizations' specific needs. DAU products and services enhance workplace performance, promote mission effectiveness, and help reshape

the workforce to meet future challenges—ultimately developing fully qualified acquisition professionals who provide cost-effective systems, equipment, and services to meet warfighter requirements.

29TH INFANTRY DIVISION

Federal:

To operate as the Army's primary tactical and operational level, warfighting headquarters. Oversee the conduct of decisive, shaping and sustaining operations for brigade combat teams.

State:

When directed by state authority, provide units manned, organized, equipped,

and trained to protect life and property, preserve peace, order, and public safety and provide military support to civil authority.

MILITARY INTELLIGENCE READINESS COMMAND

MIRC units are already a regionally aligned operational Reserve, but MIRC Soldiers and units are not tapped to their full potential. We will become more ready and can deliver even more quality work to the Army and to the Intelligence Community (operational) if properly managed, missioned and connected.

While we will work with our AC partners to enable easier calls to short-term active duty, we would be ignoring the guiding principles of No MI Soldier at Rest and Intelligence Readiness Operational Capability if that's all we did.

To do our part to maximize the Army's operational level intelligence forces in support of Combatant Commands and Army Service Component Commands, it is the TPU Soldier on IDT or AT status at home station, and the systems through which they connect, that we need to concentrate on.

We are not likely to get more training days – not only because the Army may not be able to afford them, but because Soldiers don't have them to spend. We are more limited by time than money, and have families and civilian jobs that we must gain and retain to support the Soldier's military career. Leaders must organize, plan, and project training that pays readiness dividends without fail and with maximum lead time.

PEO SOLDIER

The Soldier is our strength and our purpose at Program Executive Office Soldier. We acquire the best capabilities for our nation's Army so that the U.S. Army continues to be dominant and decisive during the full spectrum of military

MISSION PARTNERS

operations.

We provide our Soldiers with the finest equipment and protection available, as quickly as possible. We invest in our Soldiers to give them the decisive edge, while also being good stewards of taxpayer funding.

Our commitment to the Soldier remains steadfast. The Soldier is the bedrock of our Army's ability to fight and win. We value this privilege to support our Army and our ongoing dedication to the protection and strength of the American Soldier.

OFFICE OF THE CHIEF, ARMY RESERVE

The Army Reserve Mission:

The Army Reserve provides trained, equipped and ready Soldiers, leaders and

units to meet America's requirements at home and abroad

MISSILE DEFENSE AGENCY

The Missile Defense Agency's mission is to develop, test and field an integrated, layered, ballistic missile defense system to defend the United States, its deployed forces, allies, and friends against all ranges of enemy ballistic missiles in all phases of flight

U.S. ARMY LEGAL SERVICES AGENCY

As a field operating agency supporting TJAG and to sustain Army and joint force priorities, USALSA represents the Army in civil matters before courts and administrative bodies; directs and manages the Army Trial Judiciary and operates the

Army Court of Criminal Appeals; provides subject-matter expertise and advice in contract, fiscal, environmental, regulatory and intellectual property law; and provides administrative, fiscal and logistical support to all assigned elements.

55TH SUSTAINMENT BRIGADE

The mission of the brigade is to provide command and control for all subordinate units, and provide sustainment in an area of operations as defined by the ESC/TSC. The sustainment brigade plans and executes sustainment, distribution, theater opening and reception, staging, and onward movement of Army forces in full spectrum operations as directed by the ESC/

REGIONAL HEALTH COMMAND - ATLANTIC

Regional Health Command - Atlantic, is the nation's premier military system for health. What is a system for health? At RHC-A, we are focused on our patients' health and wellness, which means we are as dedicated to preventing illness and injury as we are to healing. A system for health enables ready and resilient Soldiers, families and communities.

We maintain the readiness of America's fighting men and women through care that maintains, restores and improves their ability to deploy on a moment's notice, anywhere in the world. And, when our Soldiers deploy, we ensure that a ready medical force is ready to deploy with them, professionally trained and ready to provide world class casualty care. The Regional Health Command - Atlantic, is working to build a healthier Army and healthier nation.
