

Proud history, bright future.

Prepositioning and Marine Corps Logistic Services Program

The Prepositioning and Marine Corps Logistic Services Program (P&MCLS), is based from Jacksonville, Florida. We provide maintenance and logistic services to the U.S. Marine Corps (USMC) in support of this program. For over 30 years, we have planned, coordinated, and executed the logistic services and maintained all of the ground combat vehicles and support equipment for the USMC Expeditionary Forces.

In our overseas operations, we provide forward logistic support and maintenance services for the USMC in support of other contingency and sustainment operations within the Middle East area of responsibility. We also provide Subject Matter Experts in logistics, finance, human resources, quality, and IT, to ensure the USMC's mission-ready capability. KBR works hand-in-hand with the Marine Corps to build the program and establish a track record of success.
