Quiet Professionals, LLC is seeking a SOF Intelligence Integrator to provide embedded and reach back support directly to SOF, developing intelligence products while coordinating the support packages provided to meet unit and subordinate element operational requirements. You will assist in developing processes that enhance SOF situational understanding of threat networks employing or facilitating improvised threats (such as IEDs) and enabling DOD, IA and IC efforts focused on dismantling, disrupting, and defeating those networks

While deployed, you will embed with SOF to assist operational and tactical commanders, their staffs and subordinate units with fusing operations and intelligence information to enhance their effectiveness against threat networks. You will identify and analyze problems, and generate recommended solutions based upon experience working with elements of the DOD, interagency and international partners. Most deployments are 120 to 180 days in length.

While providing reach back support, you will directly support embedded teammates, answer requests for support from other SOF units, and work closely with a wide variety of SOF units, institutions, and partners. You will assist with pre-deployment training and preparation, conduct professional development within the CACI-WGI SOF Support Team, and mentor new members of the team to ensure they are ready to deploy and succeed.

You will work closely with other members of your team to identify capabilities and vulnerabilities of targeted enemy organizations; identify trends, patterns, and key nodes; and highlight their relationships to the targeted enemy networks

Required:

· Must be a US Citizen

· Must be TS/SCI eligibility

· Must possess the ability to effectively communicate both orally and in writing

· Must have the ability to provide daily feedback to the team lead on product development

· Must be deployable to the required theater of operations, usually conducting periodic travel within CONUS and four-to-six-month deployments to OCONUS locations

· Willing to work rotating shifts if needed - to include nights and weekends

· Bachelor's degree and more than three years of experience, or an associate degree and five years of experience, or seven years of work experience. We will also consider candidates with four years of directly relevant experience

Preferred:

· Minimum two years' experience providing analytical support to one or more SOF units or commands

· Minimum one year of experience in forward deployed locations supporting SOF

· More than three years of experience conducting network analysis in support of attack the network operations - including counter-facilitation

· Experience providing direct analytical support to operations and providing direct analytical and targeting support to deployed SOF elements

· Deployed in-theater experience assigned to a SOF unit providing intelligence support to tactical and operational SOF

· Expert understanding of network analysis tools such as Analyst Notebook and Palantir

· Expert understanding of tools such as M3, Lucky, HOT-R, JIDO ANTS, TAC, NCTC Online, TIDE, DataXplorer, PROTON, TargetCOP, BHTK

· Expert understanding of Intel targeting tools such as the Skope toolset or the Voltron toolset

· Practical understanding of geospatial Intel tools such as ArcGIS and Google Earth

· Must be able to work independently with limited oversight and function effectively as part of a team in a joint working environment
