Software Engineer III Raleigh, NC

Reed Tech, a LexisNexis Company (a subsidiary of RELX) is looking for a Software Engineer III. The Software Engineer III performs moderately difficult research, design, and software development assignments within a specific software functional area or product line. The position should have the ability to work on individual pieces of work and solve problems including the design of the program flow of individual pieces of code, effective coding, and unit testing.

You will write software code for the service layer of an enterprise web application consuming data from one of the largest databases in the world. The ideal candidate is passionate about software development, has started their career successfully and is ready to advance to the next level

Skills:

- 3+ years' experience with service-oriented architecture
- 1+ years of web application development experience
- Core Java
- Restful web services
- Demonstrated track record of delivering completed tasks and projects on time
- Ability to listen and communicate effectively
- Amazon Web Services a plus
- Experience with Oracle a plus
- Experience with MarkLogic a plus
- Experience with XQuery, XML a plus

Responsibilities:

- Contribute to the design, development, and maintenance of Services
- Design and implement proofs of concept to aid in the engineering process
- Conduct research to aid Senior Engineers in decision making
- Perform maintenance and bug fixes for existing web applications
- Participate in daily scrum and collaborative design sessions
- Code proof of concepts based on requirements and guidelines
- Code unit tests based on requirements and guidelines
- Communicating findings from research tasks
- Manage your own project tasks, re-work, schedule, and email communications
