TC 8-800

TC 8-800 (TC8) Course Description

The 8–9-day MEDIC Table Training has an emphasis on Tactical Combat Casualty Care (TC3) as well as EMT-Basic Refresher training. All 68W Soldiers are required to complete Training Tables I-VII and Table VIII Validation annually as outlined in TC 8-800. Completing Tables I-VII provides the 68W with 48 hours of CEU's toward their NREMT re-registration. Completion of Table VIII Validation meets the verification of skills competence. The Medic Assessment Validation portion of the validation process provides information an internal evaluation of a unit's individual medic's ability to drive battalion and brigade medical training plans. It assesses each medic's abilities and capabilities for applications, both garrison and deployed. Unit standards may exceed those set forth in the TC 8-800. Therefore, the DMAV will supplement the skills trained within in the TC 8-800 and will be carried out in three phases.

1. Pre-assessment: Soldier medic conducts Tables I-VII at the FB-MSTC with a combination of lecture and practical exercises.

2. Assessment: While at the FB-MSTC the Soldier medic will be assessed during Table VIII by completing challenging multi-trauma, and medical patient lane scenarios verifying 68W skills .

3. Post-assessment: Each Soldier medic is counseled, and his allowed scope of practice is determined by the unit's provider. Remedial or corrective training is conducted if necessary.

Course Prerequisites:

- Current EMT-Basic Certification/ card

(If the student is expired, they must show permission from Army EMS/CMSD to recertify prior to start of course)

- Hold the MOS of 68W
- **This course is not available for Active-Duty Service Members stationed at Fort Bragg. For exceptions to policy contact the MSTC NCOIC.**

Table VIII Validation

Table VIII Assessment Validation (DMAV) Course Description

The Table VIII Validation is an annual requirement for all 68W's. The skills of the Soldier medic are perishable and must be sustained. Many junior level 68W duty positions do not allow opportunities for medics to practice the skills needed to maintain reliability and relevance. The Table VIII Validation augments the unit training of Soldier medics of the seven training tables with associated Training Support Packages (TSP).

The tasks found in Tables I through VII are trained to standard by a qualified 68W NCO, 18D Special Forces Sergeant, a W1 Special Operations Combat Medic, or Medical Officer, documented by a Medical Officer and placed into the Medical Operational Data System (MODS) by qualified personnel. When accomplished, Soldier medics meet The CE and biennial refresher course requirements for EMT recertification. As previously stated, CE hours are awarded for completion of the training in Tables I through VII, not simply completing the testing in Table VIII. If a 68W NCO or Medical Officer is not assigned, the documentation is forwarded to the next higher medical authority for validation of training.

The training found within the Table VIII Validation includes a skills validation table. Tables one through seven can be conducted at the unit during normal unit training cycle. Table eight testing can be conducted at the Fort Bragg Medical Simulation Training Center (MSTC) using DMAV.

The Medic Assessment Validation portion of the validation process provides information an internal evaluation of a unit's individual medic's ability to drive battalion and brigade medical training plans. It assesses each medic's abilities and capabilities for applications, both garrison and deployed. Unit standards may exceed those set forth in the TC 8-800.

Combat Life Saver / TCCC (Tier 2)

Combat Life Saver/TCCC (Tier 2)

The Tactical Combat Casualty Care (TCCC) Combat Lifesaver (CLS)Course provides the means to help familiarize you with TCCC concepts and lifesaving skills to render medical aid to a trauma casualty. The course (with recommended suggestions) provide information through a short lecture followed by interactive hands-on skills training and formal assessment. The CLS TCCC Course encompasses tactical trauma assessment, bleeding control interventions, airway and respiratory management techniques, rescue drag/carry techniques, prevention and treatment of shock, burns, eye injuries, splints, pain management, critical communication, and medical documentation practices. The TCCC skills have been proven safe and effective and can be performed by someone with no medical training. At the completion of this 40-hour course, you will be qualified at a TCCC basic proficiency level.

.

TCCC Combat Medic/Corpsman (CMC) Tier III

TCCC Combat Medic/Corpsman (CMC) Tier III

The Tactical Combat Casualty Care (TCCC) Combat Medic Course provides the means to equip CMCs to provide more advanced prehospital casualty care than was taught in the ASM or CLS courses. Instruction includes the use of advanced medical equipment and knowledge in the management of life-threatening injuries commonly encounted on the battlefield.. The course) provide information through a short lecture followed by interactive hands-on skills training and formal assessment. The CMC TCCC Course encompasses tactical trauma assessment, bleeding control interventions, airway and respiratory management techniques, rescue drag/carry techniques, prevention and treatment of shock, burns, eye injuries, splints, pain management, critical communication, and medical documentation practices. At the completion of this 64-hour course, you will be qualified at a TCCC Combat Medic proficiency level.

Course Prerequisites:

- Holds the MOS of 68W

TCCC Combat Paramedic/Provider Tier IV

TCCC COMBAT PARAMEDIC/PROVIDER (CPP) Tier IV

The Tactical Combat Casualty Care (TCCC) Combat Paramedic/Provider (CPP) Course is intended to equip Combat Paramedics and Providers with the knowledge and skills needed to provide more advanced prehospital casualty care. The course provides information through short presentations followed by interactive hands-on skills training and formal assessment. The CPP TCCC Course encompasses Tactical Trauma Assessment (TTA), massive hemorrhage control interventions, airway and respiratory management techniques, shock recognition and management, burns, head injuries, hemorrhagic shock fluid resuscitation, pain management, antibiotic administration, critical communication, and medical documentation practices. TCCC was created to teach evidence-based, lifesaving techniques and strategies for providing the best trauma care on the battlefield. At the completion of this course, you will be qualified at an advanced TCCC proficiency level.

Course Prerequisites:

- MOS 68W that is a Nationally Registered Paramedic
- Medical Provider (MD, DO, PA, RN)

Basic Life Support (BLS)

Health Care Provider (HCP)

Basic Life Support (Health Care Provider)

In this course you will learn the skills of CPR for victims of all ages and will practice CPR in a team setting. You will learn how to use an automated external defibrillator (AED) and how to relieve choking (foreign-body airway obstruction). The skills you learn in this course will enable you to recognize emergencies such as sudden cardiac arrest and know how to respond to them.

The 4-hour Basic Life Support course is in accordance with curriculum from the American Red Cross (ARC) as well as the Military Training Network (MTN). The MTN is an authorized provider of American Red Cross Courses FOR all Military and DOD GS Civilians. The course will consist of about 4 hours of both didactic training as well as hands on training. The student will take a written exam following the didactic portion of the course as well as a hands-on exam. Following the successful completion of this course, the students will receive a BLS certification from the ARC/MTN, which is good for two (2) years.

Course Prerequisites:

- None

Advanced Life Support Instructor Led

Advanced Life Support (ALS) Instructor Led Course Description

This **advanced** course is 3 days long designed for first time certification. On day one, an introduction to EKG and pharmacology will be conducted. Day 2 & 3 highlights the importance of high-performance team dynamics and communication, systems of care, recognition and intervention of cardiopulmonary arrest, immediate post-cardiac arrest, acute dysrhythmia, stroke, and acute coronary syndromes (ACS).

To receive an ALS provider card students must:

Attend entire course

Actively participate in all activities

Demonstrate **COMPETENCY** in all required skills

Demonstrate **COMPETENCY** in leading a team

Pass written exam with minimum grade of 84%

Course Prerequisites:

- Current Healthcare Provider BLS card
- **Must hold a current position requiring ALS certification to reserve seat**

*****Those who do don't meet the above requirements at check-in will not be allowed to attend class. *****

****Course reservations will be taken no more than 3 months in advance of course date****

Advanced Life Support-Refresher

Advanced Life Support (ALS) Course Description

This **advanced blended learning course** highlights the importance of high performance team dynamics and communication, systems of care, recognition and intervention of cardiopulmonary arrest, immediate post-cardiac arrest, acute dysrhythmia, stroke, and acute coronary syndromes (ACS). This is a recertification course **ONLY**.

To receive an ALS provider card students must pass a comprehensive practical exam consisting of Advanced Airway Management and Mega Code skills testing.

Course Prerequisites:

- Current BLS Certification
- Current ALS Certification
- Must complete online blended learning 30 days prior to testing date and bring a copy of the certification to class

*****Those who do don't meet the above requirements at check-in will not be allowed to attend class. *****

Pediatric Advanced Life Support – Instructor Led

Pediatric Advanced Life Support (PALS) Instructor Led Course Description

This **advanced course** is a 2 day initial certification course, that focuses on a systematic approach to pediatric assessment, basic life support, PALS treatment algorithms, effective resuscitation and team dynamics to improve the quality of care provided to seriously ill or injured children, resulting in improved outcomes.

To receive an PALS provider card students must:

Have knowledge of EKG's and ACLS Medications
Attend entire course
Actively participate in all activities
Demonstrate **COMPETENCY** in all required skills
Demonstrate **COMPETENCY** in leading a team
Pass written exam with minimum grade of 84%

Course Prerequisites:

- Must have current: BLS Provider Certification

*****Those who do don't meet the above requirements at check-in will not be allowed to attend class.*****

****Course reservations will be taken no more than 3 months in advance of course date****
