PLASTIC

POSSIBLE AREAS OF CONCERN

Plastic contaminated with food or hazardous materials residuals cannot be recycled and should be disposed of appropriately. Currently, **only numbers** 1 & 2 plastic bottles (soda bottles, juice, milk, water, detergent bottles) are collected for recycling. All other types of plastics should be disposed of in an appropriate garbage container.

CHARACTERIZATION

Plastic is considered solid waste. Fort Campbell's Installation Recycling Policy encourages all installation activities, units, tenants, contractors and tenant organizations to recycle all recyclable waste including plastic.

HANDLING PROCEDURES

Step 1 Remove lids and follow posted Recycling Convenience Center rules for recycling bottles.

Step 2 Rinse containers if not Hazmat containing.

Step 3 Take items to the **Convenience Center**.

NOTE: Only #1 and #2 drinking bottles are recycled at the Convenience Center

Plastics may be recycled through the Recycling Convenience Center

GENERAL INFORMATION

For more information on recycling contact **Environmental Division Solid Waste/Recycling**.
