

TEAMMATES -

We are making good progress and require your assistance in three areas:

(1) The Novel Coronavirus (COVID-19) vaccine is available to ALL Detroit Arsenal Soldiers, Marines, and DA Civilians who want to volunteer to receive it. If you are interested please contact your supervisor, so your organizational POC is able to schedule you an appointment. Please reach out now, as we have space available to offer vaccines in the near term.

(2) If you are scheduled for an appointment, please show up and be on time. We are scheduled to use a certain number of vaccines each day, and need all individuals to be present to be able to use all doses.

(3) If you have received the vaccine off post and will volunteer to share that information with us, please let us know via your chain of command. This will help us get a better picture of ourselves as an installation.

Contractors should let their organizational POCs know if they are interested in being vaccinated on post, as we are still working on being able to offer vaccines as part of our plan.

As we work to complete this recovery process on the Detroit Arsenal Installation personnel family members may also get a vaccine by going to [vaccinefinder.org](https://vaccinefinder.org) to schedule an appointment within their community.

THANK YOU,

Carrie
