

U.S. Army Garrison, Hawaii – Environmental Compliance Guide

# WASHRACKS

## GENERAL INFORMATION

Washing equipment of any kind outside of the approved wash facilities is not authorized. There are four approved wash facilities on Army Installations: Kahuku Training Area, East Range, Schofield Barracks Central Vehicle Wash Facility and Fort Shafter Flats Wash Facility.

## POTENTIAL VIOLATIONS

Washing in unauthorized areas is considered a Clean Water Act violation and could potentially lead to fines up to \$25K/day/violation.

## General Requirements

USAG-HI holds a National Pollutant Discharge Elimination System (NPDES) permit that allows only water to be discharged into the Garrison's storm water system. A copy of the NPDES permit can be obtained from the DPW Environmental Clean Water Program. Wastewater from normal washing operations at an authorized wash rack is sent to and treated at a Wastewater Treatment Plant.

## Wash Rack Reference Card

### Wash Facility Reference Card

Prevent the spread of invasive species while ensuring our water resources are protected. Washing vehicles and equipment in harmony with the Clean Water Act is essential to the Army's training mission. **Find the best wash rack option for your training needs on the reverse side of this card.**

Scan this code with your smartphone camera to watch the safety video.
