

# AtHoc - Integrated Warning System

## Welcome to the Fort Hood

## Mass Warning and Notification System

This emergency mass notification system provides Fort Hood with an effective and reliable Mass Warning and Notification System that can be used during a crisis to warn affected personnel.

Example AtHoc System Test Pop-up	4

During emergencies, it is critical to be able to quickly and accurately inform Fort Hood personnel in real-time, notify them of threats, and provide them with instructions. To effectively and quickly reach a mass audience and targeted individuals/groups, the notification system relies on the contact information you provide when registering with AtHoc.

It is encouraged for all personnel to register complete and accurate information to enable critical emergency alert notification capabilities at work, home or while travelling. The AtHoc system alerts via multiple and redundant means, including computer desktop notifications (pop-ups), land line phones, mobile phones, emails and SMS texts.

Fort Hood users on the Fort Hood, MEDCEN, and OTC domains who log on to their NIPR computers with a Common Access Card (CAC) will automatically receive the network pop-ups from AtHoc. However, to receive emergency notifications via email, telephone, and text - users must manually register their emergency contact information.

It is strongly recommended that users register all devices/methods that they would prefer to receive emergency information on, such as:

- ❖ Work phone
- ❖ Home phone
- ❖ Cell phone
- ❖ Work email
- ❖ Home email
- ❖ SMS text

This allows the Fort Hood Installation Operations Center to notify personnel of an active or emergent event on the installation, or emergency instructions on necessary actions to take during a large scale emergency.

**Help us to help you, and register today.**

## **AtHoc Registration Instructions**

1. Click on the up arrow of your icon tray

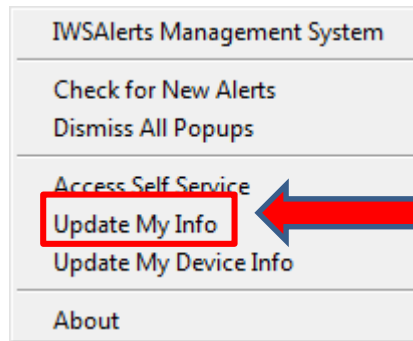

2. Click on the Purple Globe

NOTE: if the globe is grayed out, please try back later.

3. Select "Update My Info"
