

STAGE 1

WATER CONSERVATION MEASURES

1 MAY - 1 OCT

**The goal of Stage 1 is to reduce the daily water usage by at least 5%.
All Soldiers, civilians, and contractors who work and/or reside on Fort Cavazos
will implement the following conservation measures:**

- No watering of any type of landscaping between the hours of 11 a.m. - 6 p.m. daily. No water runoff allowed from areas being watered.
- Minimize the use of water for irrigation of landscaping and vehicle washing and do not waste potable water.
- No use of potable water to wash driveways, sidewalks or buildings for general cleaning.
- Report all water leaks to Directorate of Public Works at 254-287-2113.
- Exceptions may be authorized by the Director of Public Works or Garrison Commander for certain activities (e.g., spill response, contract actions, etc.).

Incorporate these water-saving practices into your daily routine:

- *Run full loads for dishwashers and washing machines.*
- *Turn off the faucet while brushing your teeth, shaving, soaping up, doing dishes, or rinsing vegetables.*
- *Shorten your shower time by at least one minute.*
- *Fix leaking faucets and running toilets, and consider purchasing low-flow showerheads, faucets, and toilets that can help to conserve water.*
- *For additional conservation tips, visit: <https://wcid1.org/drought-watch/>*
