Ways to Stay Connected with Fort Cavazos

The Tower of the Americas
BY SARAHAN BARRIS
Special Editor

San Antonio, set at 780 feet, the Tower of the Americas stands as a landmark in downtown San Antonio, offering a wide panoramic look at the city of the river and on the ground level.

The tower was built in 1968 for the 1968-1969 World's Fair, which celebrated the American 250th anniversary. When it was completed, it was the tallest observation tower in the U.S., rivaled only by the Empire State Building in New York City.

Visitors will notice on "The Tower," as it is known locally and is spread with a more relaxing view. The tower is surrounded

by self-maintained landscaping and plenty of outdoor seating as the visitors can enjoy the tall view from the ground level. There are the monthly "Wine & Cheese" events, along with the monthly "Live Music" on the top of the tower and on the ground level.

One of the most unique features of the tower is the "Wine & Cheese" event, which is held on the top of the tower every month. The event is a great way to enjoy the view of the city while sipping on a glass of wine and eating some cheese.

The tower is also a great place to enjoy the view of the city. The view is amazing, and the tower is a great way to see the city from a different perspective.
