Background Check Management

Concept of Operations

Increase Efficiency through Technology

- Hang Volunteer and Contractor suitability background check application packet as single editable PDF file on our public homepage.
- Compile an enterprise email distribution list of key leaders.
- Establish an enterprise mailbox for Religious Education.

Remain “High Touch” while going “High Tech”

- Bring religious support staff & security officers to where volunteers gather for a Background Check Rodeo.

Online Paperwork

Background Check Rodeos

USAG Bavaria RSO Story Board

Volunteer Management

Concept of Operations

Utilizing resources provided by Command reduces exertion put forth in creating products independently of expertise. Increasing efficiency through the use of technology will relieve individuals of unnecessary, fleeting effort. Recognizing that time may be ones most precious commodity, dedicating minimal amounts on the front end to retain more on the back end will payoff handsomely in the long run.

Therefore, USAG Bavaria RSO established three significant technological advantages through their S6. First, we hung the most recent version of the Volunteer and Contractor suitability background check application packet as single editable PDF files on their public homepage. Second, we fashioned an enterprise email distribution list of key leaders. Third, we established an enterprise mailbox for Religious Education matters to ensure support continues while individuals are inaccessible.
