

## **IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER SERVICE LINES**

Este informe contiene información muy importante sobre su agua potable.  
Tradúzcalo o hable con alguien que lo entienda bien.

### **As required by U.S. EPA, Fort Irwin has identified that your water service connection is considered a lead status unknown service line.**

The Directorate of Public Works (DPW) and Jacobs recently conducted an inventory of all water service lines, which is the pipe that connects your home, building, or other structures to the water main. The purpose of the inventory is to identify the materials of these service lines and fittings, including the customer-owned side of the water service line.

The service line connecting your home, building or structure to the main have been identified as unknown materials. Unknown service lines may expose you to lead or galvanized lines. If lead or galvanized pipe is detected, replacement will be necessary.

For a detailed overview of the specific buildings impacted, please refer to Appendix A for appropriate information. This detail list contains a comprehensive list of all properties that have been identified as an unknown service line.

The Directorate of Public Works (DPW) and Jacobs, routinely monitors for lead in the distribution system and the most recent water sample results received on 11 July 2024 which showed that the 90<sup>th</sup> percentile of all lead levels measured in the distribution system was Not Detected (ND). The action level for lead in drinking water is 0.015 milligrams per liter (mg/L) or 15 micrograms per liter (µg/L).

The most recent water sample results do not exceed the action level of 0.015 milligrams per liter (mg/L) or 15 micrograms per liter (µg/L).

#### **Is my water affected?**

**\* If you received a separate notice instructing you to not drink, boil, or avoid drinking your water, then please continue following those instructions until you are instructed to do otherwise.**

If you **did not** receive any separate notice:

- This is not an emergency.
- Your water is safe to drink and meets federal and state safe drinking water standards.
- You do not need to use an alternative water supply (e.g., bottled water).

## **How does inventory management ensure safe drinking water?**

Inventory management is crucial for ensuring safe drinking water at Fort Irwin. The water system undergoes rigorous monthly quality testing and triennially water monitoring for lead and copper, ensuring compliance with safety regulations and early detection of potential contaminants. By meticulously tracking and documenting all service lines, the management team maintains an accurate inventory of the water infrastructure, noting materials like lead or galvanized steel that pose health risks.

Regular inspections assess the condition of the service lines, allowing for proactive identification of issues before they become serious problems. When lead or galvanized pipes are found, they are promptly addressed and replaced, ensuring the water supply remains safe and free from harmful contaminants. This comprehensive approach helps Fort Irwin maintain the highest standards of water safety, providing residents with clean and safe drinking water.

## **What happens next?**

The first phase of the Lead Service Line Project is set to begin on October 7th and is expected to last approximately three weeks. This proactive project is the initial step in a comprehensive five-phase plan to catalog and inventory the pipes in our water system. As part of this initiative, High Desert Underground will be performing potholing for the following homes and buildings: 1, 1315, 1317, 1322, 1826, 1828, 1902, 1903, 2009, 2010, 2104, 2105, 2107, 2305, 2306, 2402, 2403, 2416, 2417, 2507, 2508, 2606, 2607, 2620, 2621, 3901, 3912, 3917, 3921, 3934, 3935, 3944, 3945, 3952, 3953, 3968, 3970, 3975, 3976, 3982, 3983, 3984, 4001, 4002, 4015, 4017, 4028, 4029, 4038, 4039, 37041.

Potholing involves using specialized equipment to carefully remove soil from small areas above each water service line, typically near the water meter, which could be in the street or close to each building or home. The purpose of this process is to expose the water service lines without causing any damage, allowing for safe and accurate inspections and investigations. This work is essential for gathering detailed information about our existing infrastructure, which will help us plan future maintenance and replacements. If any lead or galvanized lines are identified during this project, proper notice will be provided, and an expedited plan to alter and replace the water service line on your property will be implemented.

## **Lead Related Health Information**

- *Exposure to lead in drinking water can cause serious health effects in all age groups. Infants and children can have decreases in IQ and attention span. Lead exposure can cause new learning and behavior problems or exacerbate existing learning and behavior problems. The children of women who are exposed to lead before or during pregnancy can have increased risk of these adverse health effects. Adults can have increased risks of heart disease, high blood pressure, kidney or nervous system problems.*

- If you have concerns about your water quality, the State Water Board's Environmental Laboratory Accreditation Program has a [map of laboratories](https://www.waterboards.ca.gov/drinking_water/certlic/labs/) that can test your water at the consumer's expense, which can be found at: [https://www.waterboards.ca.gov/drinking\\_water/certlic/labs/](https://www.waterboards.ca.gov/drinking_water/certlic/labs/)
- If you still have health concerns from potential lead exposure in your drinking water, there are point-of-use (POU) devices that can be used on your drinking water taps to provide an additional barrier of protection. A list of these residential treatment devices can be found at: [https://www.waterboards.ca.gov/drinking\\_water/certlic/device/watertreatmentdevices.html](https://www.waterboards.ca.gov/drinking_water/certlic/device/watertreatmentdevices.html)
- If you have other health issues concerning the consumption of this water, you may wish to consult your health care provider.

### **Additional Resources**

For assistance with verifying the material of an unknown service line, or any other inquiries, please contact **Sureya Valenzuela** at **760-380-3749** or [Sureya.d.valenzuela.civ@army.mil](mailto:Sureya.d.valenzuela.civ@army.mil). Please note that customers will not be responsible for replacing the service lines themselves.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses).

[This notice will be located at building 602 on 5<sup>th</sup> Street for the Fort Irwin Water System.](#)
