

# TSCRS Commanders Dashboard

TSCRS provides Commanders or their representatives a detailed overview of Service Members' records, helping them meet time requirements and enhance success for those Service Members.

## TSCRS

The Army Transition Assistance Program (TAP) has recently evolved by replacing the TAP XXI system with the new Transitioning Servicemembers and Counselors Reporting System (TSCRS). This update aims to enhance support for Service Members transitioning to civilian life.

- Enhance the Transition Experience for Service Members.
- Offering 24/7 Service and Online Capabilities
- Complete Initial Assessment, Scheduling Classes, and Managing Transition Engagements.
- Reporting System Enables Commanders to Access and Monitor Service Members Progress Through a Dashboard.
- System Allows Both Commanders and Service Member to Effectively Manage the Transition While Continuing to Support the Unit's Mission.
- Responsibility for Service Members' Transition is now Placed Back on the Service Members and Commanders.

To gain access to the Commander Dashboard, submitting a help ticket will grant Commanders the necessary permissions.

Commanders can find the consent form on their desktop by navigating to <https://www.aesmp.army.mil/csm>.

## Commanders Dashboard Components

### Timeliness

- The timeliness screen allows for a glance at where the unit stands for meeting time requirements such as registration, IIC, and Pre-Sep before 365 days and 90 days, respectively, for CAPSTONE. Additionally, it allows those to drill down to individual UICs with more than one UIC, i.e., BN, BDE, DIV.

### Compliance

- Provides NDAA compliance for UIC's assigned.

### Service Members Records

- Provides a total snapshot of the unit with the Service Members records to assist in determining outcomes.

### Record Attendance

- Commanders or representatives can view Service Members appointment details and class locations and track which classes have been attended or are still pending.

### Career Skills Program Report

- This allows Commanders to monitor CSP/Skillbridge enrollment and evaluate the success of the program.

### Eligibility Report

- It helps Commanders see Service Members entering their transition window at 720 days for effective mission planning.
