3. Scope: The FAA defines unmanned aircraft (UA) as an aircraft operated without the possibility of direct human intervention from within or on the aircraft. It is also defined as an UA and the associated elements to include communication links and components that control the UA. 4. Applicability: This policy is applicable to all persons or entities on JRTC and Fort Polk and to all recreational operation of UAS as defined immediately above.

5. Recreational and Commercial Use Policy: The FAA has designated the areas in red in Figure 1 as “no fly zones” for all personnel operating recreational or commercial UAS and aircraft. UAS activities in Fort Polk airspace threaten operational security and could endanger the safety of military aircraft. Personnel who observe private or commercial UAS activity on or near Fort Polk should immediately contact installation law enforcement.
