

SmartWasher

BIOREMEDIATING PARTS WASHING SYSTEM

HOW DOES IT WORK?

Through the process of bioremediation, the SmartWasher constantly maintains the cleanliness of the Ozzy Juice cleaning/degreasing solution without the need for hauling, skimming or evacuating the unit.

WHAT IS OZZY JUICE?

Ozzy Juice is a powerful, aqueous based degreasing solution that is PH neutral, non-irritating, non-flammable and non-toxic. Armed with superior cleaning capability, the Ozzy Juice solution will match, or surpass, the performance of a premium solvent without the associated risks.

Transition away from all solvent based parts washers to bioremediating parts washers to save costs which keeps those using the SmartWashers safer, reduces air emissions and keeps equipment in top condition.
