## ATTENTION

### “Snow” Melt Pick Up Plan

### The sidewalk is covered in snow!

Every year during snow and ice events employees slip and fall causing significant injury; so let's not slip or fall while helping each other remove the ice and snow from our sidewalks to the entrances. This will not only make it safer but inspire team building in the process.

The building **facility manager** is responsible for making sure that there's a snow and ice removal plan for their sidewalks and entrances.

**Step 1:** Determine how many entrances there are for your facility

**Step 2:** Travel to Richardson Hall building 1730 (0700-1600) and enter through the warehouse door inside the gated compound

**Step 3:** Sign in at the warehouse office to request your ice melt and salt.

If your organization requires a bulk load of ice melt they must supply their own buckets and transport method.

**REMEMBER PICK UP ICE MELT  
BEFORE IT SNOWS!**

**BE ALERT, STAY ALERT, STAY SAFE!**
