

# How does your garden grow?

## In water!

Some herbs, fruits and vegetables can be re-grown in water! Including green onion, celery, lettuce and more!

**Fun for kids!**

## IN A PALLET!

Contact QRP for free pallets and start a pallet garden! Multiple ideas can be found online and can be a great family sustainability project!

## IN RECYCLED CONTAINERS!

Check online for great ideas on recycling items as flower pots and more!

## IN AIR!

Air plants only need to be soaked in water every two weeks and do not require soil to thrive!

# In space!

“As humans explore space, we will want to bring plants for both aesthetic and practical reasons. We already know from our pioneering astronauts that fresh flowers and gardens on the International Space Station create a beautiful atmosphere and let us take a little piece of Earth with us on our journeys. They’re good for our psychological well-being on Earth and in space. They also will be critical for keeping astronauts healthy on long-duration missions.” - NASA
