All utilities must be marked before breaking the ground for any work. KRS Law 367.4901

You must contact each of the 10 utility locates. If a phone number and email is listed, you must perform both.

It is your responsibility to verify that all 10 utility locates listed above have performed their respective locate. If you dig before all locates have been performed and hit a utility, regardless of the timeframe of when you requested the locate, you are responsible for the repair costs. A confirmation number or a confirmation email stating that the locate, not the request for a locate, has been performed from each of the 10 locates must be received before you dig.

It is your responsibility to call for refreshing of the marked areas every 21 days.
