

DROP BOX MANAGEMENT

also known as construction or roll off box

Drop boxes are normally provided for collection of a segregated item, deployments, moving, or clean out of facilities.

Drop boxes placed at your facility are prepared & inspected by drivers. It is ready for use.

For your safety & the safety of the drivers the following items need to be followed:

- **NEVER remove pins** (Drivers will place pins for transport)
- **Loading through front doors**
 - Open doors by unlatching chains & adjust T-Bar handle to open
 - Fill from back to front of container (when items start encroaching the front doors, secure front doors by ensuring T-bar is secured on top & bottom of latches)

PINS (2 on each side)

SECURE T-Bar (Bottom)

NOT SECURE

OVER LOADED

SAFETY CHAIN UNSECURE

Drop boxes are a call in service: LeMay (253)875-5886

To ensure timely servicing of containers the following parameters should be taken into consideration:

- All lids and doors must be secure
- Do not park in front of, or block containers
- Container should be clear of all debris by at least 3 feet around container
- Contractor has 5 business days to execute requests; schedule accordingly
- If recycling is contaminated, you are responsible for clean up or you may be charged

Questions about refuse & recycling on JBLM can be directed to outreach staff at 253-966-6444 or by emailing usarmy.jblm.imcom.list.dpw-jblm-recycles@mail.mil
