

Dumpsters Neat, Not Nasty!

Dumpster lids need to be closed whenever possible. If a lid is open and a dumpster fills with rain, the yukky water can spill out and get into ditches and stormdrains, headed to streams, lakes and the Puget Sound.

JBLM pays for trash by weight. Dumpsters filled with water inside can drastically increase costs, and cause potential damage to the refuse trucks.

Don't leave trash lying around next to the dumpster, call 253-875-5886 for additional service if needed.
