## SOCIAL NETWORKING SAFETY TIPS

### BLUF

- Social networking sites have many positive benefits, but if you are not following OPSEC guidance, you increase your risk of being attacked.
- Once something is posted on a social networking site, it can spread quickly. No amount of effort will erase it because there will be a record somewhere.

### DO

- Use strong and unique passwords and change it often
- Keep anti-virus software current
- Turn off geotagging and do not allow people to “tag” you in photos
- Review security policies and settings often and limit who can access your information

### DON'T

- Accept friend requests from strangers
- Use “check-ins”
- Do not use the **save password, remember me** or **keep me logged in** options from public or shared computers.
- Do not use the same password for all of your accounts.
- Do not use your social networking site to login to other sites because they will have access to your information as well as your friends’.
