**Parameter**

Perfluorinated Chemicals by EPA Method 537 Rev 1.1

Solid Phase Extraction by EPA Method 537

Result	Units	Dilution	LOD	LOQ/MCL	Analyzed	Method	Lab
see attached					11/22/16	EPA 537 Rev 1.1	721026460
Yes					11/17/16	EPA 537	721026460

Values in brackets represent results greater than or equal to the LOD but less than the LOQ and are within a region of "Less-Certain Quantitation". Results greater than or equal to the LOQ are considered to be in the region of "Certain Quantitation". LOD and/or LOQ tagged with an asterisk(\*) are considered Reporting Limits. All LOD/LOQs adjusted to reflect dilution and/or solids content.

ND = Not Detected (< LOD) LOD = Limit of Detection

DWB = Dry Weight Basis %DWB = (mg/kg DWB) / 10000

MCL = Maximum Contaminant Levels for Drinking Water Samples. Shaded results indicate >MCL.

## How to interpret the lab results:

1. **LOD = Limit of detection:** The smallest amount of chemical the laboratory can identify, measure, and report with confidence.
2. **ND = Not Detected:** The amount of chemical in the sample is less than the LOD
3. **ppt = parts per trillion:** 1 ppt means that there is 0.000000001% of the chemical in the sample.
4. **LOQ = Limit of quantification:** Used for quality control. It is a value used to compare the sample results to a known sample value
5. **C13-PFHxA (SURRE) and C13-PFDA (SURRE):** A sample with a known value used to evaluate for quality control. The higher the percentage, the more accurate the result.
