Due Outs

Nitrogen fill for tires: Questions and discussions centered on DFMWR's new ability to offer nitrogen fill for automobile tires, the benefits of making a change from filling tires with air versus using the nitrogen alternative. **Question:** Once you convert your tires to nitrogen, what's the cost to touch up the tires? **Answer:** You shouldn't need to reinflate the nitrogen filled tires because nitrogen does not dissipate like air can and does. But, if you're a regular customer, that's something we can look into. You would not have to deflate the tire totally to re-inflate. I don't have a definite answer on this, so I owe you a due out. Further discussion was about whether to drop the car off, or... Another due out.
