

18 JUN 2016

TO: US Army Garrison – Redstone Community

FROM: Garrison Commander

SUBJECT: Enforcement of Storm Water Management Program Policy

POLICY: In accordance with the requirements under Part III of the Municipal Separate Storm Sewer System, Permit Number ALR040033, all tenants, construction contractors and Redstone communities shall include management practices, control techniques and system, design, and engineering methods for preventing, detecting, enforcing and eliminating unauthorized non-municipal discharges in their daily operations.

DISCUSSION: The purpose of this policy is to enforce the Installation's Storm Water Management Program that is used to reduce the discharge of pollutants from its Municipal Separate Storm Sewer System to the maximum extent practicable.

a. Redstone Arsenal operates a small Municipal Separate Storm Sewer System, Phase II, Permit Number ALR040033, as defined in the Clean Water Act Storm Water regulation, 40 CFR 122.26.

b. The storm water regulations and the Municipal Separate Storm Sewer System permit require Redstone Arsenal to develop, implement and enforce a Storm Water Management Program designed to reduce the discharge of pollutants from its Municipal Separate Storm Sewer System to the maximum extent practicable to protect water quality. The program must implement six minimum control measures, including construction site storm water runoff control and post-construction storm water management in new development and redevelopment. These construction controls and management measures include requirements for erosion and sediment controls and best management practices.

c. Installation staff, tenants, activities, contracting offices and contractors must comply with all the requirements outlined in Redstone Arsenal's Municipal Storm Water Management Plan. Failure to comply with these requirements will result in appropriate disciplinary actions being taken against violators.

d. Potential sanctions for contractor violators may include, but are not limited to:

(1) Contract payment withholding, liquidated damages, set off or equitable adjustment.

GARRISON POLICY No. 200-8

(2) Indemnification of Government costs due to administrative enforcement and litigation.

(3) Contract termination.

(4) Consideration in past performance evaluations in award of future contracts.

(5) Suspension or debarment from bidding or working on future contracts.

(6) Stop-work orders may be issued for the entire project until violations have been rectified to the satisfaction of the US Government.
