MEMORANDUM FOR RECORD

SUBJECT: Fort Riley Environmental Management Policy

1. The 1st Infantry Division and Fort Riley build and maintain combat ready forces, and on order deploy these forces to conduct Decisive Action to fight and win in complex environments as members of a Joint, Inter-organizational, and Multinational (JIM) team. Integration of environmental management with operations and realistic training conditions enhances the installation's current mission while creating opportunities for future training.
2. Fort Riley has an environmental management system that guides compliance with environmental laws and regulations and is described in the Fort Riley Environmental Management Plan. Our system provides the management framework supporting Fort Riley's achievement of its declared end state, which is to maintain a world class reputation for fighting, and winning when the nation calls, enabled through mutually beneficial relationships and enduring presence in the Flint Hills Region.
3. To support and protect the Soldier, maximize military preparedness, and manage environmental impacts, Fort Riley commits to:
 - a. comply with applicable legal and other requirements;
 - b. prevent pollution and promote waste stream reduction;
 - c. conserve, protect and restore natural and cultural resources; and
 - d. integrate environmental consideration into all activities.
4. This policy applies to all active duty, reserve component, and National Guard Soldiers; civilian employees of the Department of Defense; contract employees; and other persons assigned to, or conducting business at Fort Riley.
5. The point of contact for this memorandum is the undersigned at 239-2092.

A handwritten signature in black ink, appearing to read "S. Stephen Shrader".

S. STEPHEN SHRADER
COL, IN
