Fall DRIVING REMINDER TIPS

Small changes make a big difference!

Changing Weather
Expect rain, fog, and colder temperatures. Roads can be slick and visibility can drop quickly.

Wet Leaves
Fallen leaves can be as slick as ice when wet. Slow down, watch for slippery spots, and avoid quick turns or stops.

Pedestrians
With more people out and about, be especially cautious in busy areas, crosswalks, and sidewalks.

Shorter Daylight Hours
Be more alert, especially during early mornings and evenings. Use your headlights and give yourself extra time.

School Traffic
Look for school buses, increased foot traffic, and kids who may be less predictable. Stay alert in school zones and near playgrounds.

Wildlife
Animals are more active in the fall, especially at dawn and dusk. Watch for movement near roadways, especially in rural areas.
