MEMORANDUM FOR USING UNITS

SUBJECT: Fort Stewart/HAAF Dig Request and Environmental Review EXSUM.

1. All Dig Operations and Excavation for training purposes on Fort Stewart require approval by Range Control and the Installation Environmental Office. The type of training and the location of the training determine approval authority requirements. All approvals are in accordance with the current FSGA DIG MAP.

2. Submit all Dig Requests to Range Control Operations NLT 42 days before scheduled training and include the following:

- a. Commander's signature on this memorandum detailing the operation and description of the excavation.
- b. Graphic representation of the site and excavation to include grid coordinates.
- c. Risk assessment signed at the appropriate level.
- d. RFMSS Summary Sheet.

3. Installation Environmental will provide an approval and issue a Record of Environmental Consideration (REC) to Range Control when required. That approval is forwarded to the requesting Unit when Range Control approves the training.

4. All military activities that involve fluids (Containerized Kitchens (CK), FARP, water purification, etc. require approval from DPW ENV and a REC. Environmental Health Office review is required for potable water before human consumption.

a. Requesting Unit: _____
