

**C# Developer with MS Dynamics 365 Experience** | *remote, full-time*

**Summary:** We need a team member who can solve problem and analyze project needs. They should have technical expertise in C# .NET development and Microsoft Dynamics 365. Our projects require our team members to identify challenges and offer creative solutions with minimal direction. In a DevSecOps focused, Agile-Scrum environment, you will collaborate with various team members. Team members include technical experts, architects, business/product owners, business analysts, technical writers, testers, and scrum masters. Candidates should be able to communicate with both technical and non-technical teams.

**Grow with Pivotal IT Services!** Are you ready to find new ways to develop technology that encourages innovation and collaboration? Solving the industry's toughest problems requires skilled and diverse teams. At Pivotal, we are always looking for people who enjoy challenges to grow with our team. Our employees can choose to work in our private co-working suite in Raleigh, NC, or 100% remotely from their home. Pivotal, a young and growing woman-owned company, offers several career growth opportunities. We provide competitive compensation and benefits packages. Come grow with us!

**Minimum Qualifications:**

- Five (5) years of experience as a software developer
- Three (3) years of experience developing in C# and Microsoft Dynamics
- Experience with ASP.NET, HTML and JavaScript
- Experience developing custom .NET components, including web services, workflows, and plugins
- Ability to troubleshoot Dynamics and .NET applications
- Solid understanding of object-oriented programming principles
- Ability to communicate complex concepts effectively
- Military experienced candidates are encouraged to apply
- Candidates will need to obtain Security Clearance of Public Trust once hired

**Preferred Qualifications:**

- On the job experience with maintaining and/or building APIs
- On the job experience with Azure Functions
- On the job experience with Azure App Services
- Experience with Dynamics Portals/ADX Studio
- Experience with healthcare-related Dynamics 365 solution development with Federal government agencies

**Duties and Responsibilities:**

- Analyze customer needs and develop overall design concept and objectives with an eye to performance, architecture, and security. Collaborate with internal teams to produce software design and architecture
- Develop MS Dynamics 365 cloud solutions based on business requirements
- Test and deploy applications and systems including Dynamics 365 Plugins and Azure App Services
- Revise, update, refactor, and debug code. Write clean, scalable code using C# .NET
- Troubleshoot, maintain, and improve existing Dynamics 365 applications
- Monitor inbound data streams and respond to issues and interruptions
- Develop documentation throughout the software development life cycle (SDLC)
- Support junior developers

**Required Education:** A Bachelor's Degree from an accredited college or university with a major in Computer Science or other related scientific or technical discipline or five (5) years of equivalent experience in a related field.
