**ACCURA ANALYTICAL LABORATORY, INC.**  
6017 Financial Drive, Norcross, Georgia, 30071, Phone (770) 449-8800

**CASE NARRATIVE for Project Number: 15660**  
**Client Project: Hunter Fire Training Area / CO# DACA21-97-C-CO42**

The following items were noted with this project:

1. The following sample required dilution due to high analyte concentration, resulting in an elevated detection limit:

DRO - SW-846-8015  
EB-J6-S-QC

2. The surrogate was diluted out for the following sample analysis; therefore no recovery could be reported:

DRO - SW-846-8015  
EB-J6-S-QC

3. The DRO hit for sample EB-J6-S-QC appears to be a light hydrocarbon, such as kerosene.

**CASE NARRATIVE for Project Number: 15771**

**Client Project: Hunter Army Airfield / Fire Training Area / DACA 21-97-C-0042**

The following items were noted concerning this project:

1. The following samples required dilution due to high analyte concentration, resulting in elevated detection limits:.

Diesel Range Organics (DRO) - SW-846-8015

EB-E7-S-QC                  EB-H6-S-QC                  EB-G5-S-QC

2. The DRO hits appearing in the following samples appear to be due to light hydrocarbons such as kerosene:

EB-E7-S-QC                  EB-H6-S-QC                  EB-G5-S-QC

3. The surrogates were diluted out for the following samples; therefore no recoveries could be reported:

Diesel Range Organics (DRO) - SW-846-8015

EB-E7-S-QC                  EB-H6-S-QC                  EB-G5-S-QC

## SOIL SAFE TECHNOLOGIES

### GENERAL INSTRUCTIONS FOR COMPLETING MATERIAL CHARACTERIZATION REPORT (MCR)

The MCR has been designed to provide Soil Safe Technologies with the information necessary to treat your material in a safe, legal and environmentally compatible manner.

The information on Form SSTI-MCR2P is required prior to the acceptance of any materials at any of our facilities. Answers must be provided for all questions/sections on this form. Responses must be legibly printed in either blue or black ink, or typed.

If a particular question is not applicable to your material, indicate by writing "N/A" in the appropriate space. If your material does not contain a particular constituent, indicate by writing "None" in the appropriate space.

If you do not know the answer to a specific question, indicate by writing "Unknown" in the appropriate section. This response may require you to provide additional information, or perform additional analysis.

If you are acting as the agent for the generator, the generator must either fill out and sign the "Delegation of Authority" section of this document, or provide you with a letter authorizing you to act as his/her agent with regards to any actions or communications regarding Soil Safe. A copy of the letter will be submitted with this form.

Results of the parameters analyzed must be within Soil Safe's acceptance limits as defined on Form SSTI-MCR3P. Please note the exceptions for Georgia Regulated Underground Storage Tanks. Attach any on-hand analyticals to this form when submitting.

Form SSTI-MCR4P must be reviewed and signed to certify the non-hazardous nature of the material to be received.

Soil Safe Technologies will review the analytical results and completed MCR. A site audit may be performed to confirm the information submitted, If the material meets acceptance limits, the site will be issued an approval number. The approval number must appear on all correspondence relating or referring to that particular site (i.e. manifests, MCR, proposal, etc.).

If you need assistance in completing this form, please contact your Soil Safe representative at (912) 925-6800.

**Make a copy of this form for your records and fax to (912) 925-0308 or send the original and all attachments to Soil Safe Technologies, Incorporated, P.O. Box 60055, Savannah, Georgia 31420.**

SSTI-MCR1P

SOIL SAFE TECHNOLOGIES

I, the undersigned, verify to the best of my knowledge, that the waste material submitted for acceptance at SOIL SAFE TECHNOLOGIES contains no contaminants other than those for which it has been tested

1. Generator Information:

# SOIL SAFE TECHNOLOGIES

## NON-HAZARDOUS MATERIAL APPROVAL PROCEDURES

Generator/Customer provided analyticals must be performed by an approved laboratory using methods in conformity with Test Methods for Evaluating Solid Waste (United States Environmental Protection Agency, Office of Solid Waste and Emergency Response, SW-846, Third Edition, as revised) or with an alternate method approved by Georgia Environmental Protection Division. Soil Safe Technologies may, based on circumstances, perform a site audit and collect a composite sample(s). Each sample will be assigned a sample number. This number will be used to identify the generator and the location of the contaminated soil. The sample number will also be used as the basis for the Approval number (or the Rejection number), by adding the prefix A (or R) to the sample number. If the situation so dictates (e.g. soil accepted/approved based upon customer provided analyticals) samples will be collected from incoming vehicles and used as described above. Misrepresented material containing any levels of contamination in excess of Soil Safe's acceptance criteria, or any type of hazardous or coded waste will be disposed in a legal and appropriate manner at the cost of the generator (or his/her agent).

One of the samples submitted will be used as a comparative sample against incoming material. This sample will be retained for ninety (90) days after the material has been processed. The second sample will be used for back up analysis by Soil Safe's laboratory.

The acceptance parameters for incoming material to any Soil Safe Technologies receiving location are listed below. Signatures on Form SSTI-MCR2P and Form SSTI-MCR4P constitute a written warranty that the material being offered for recycle is within those parameters listed.

<u>Parameter Test</u>	<u>Acceptance Criteria</u>
1. Ignitability (Flash Point)	Greater than 140 °F / 60°C
2. Corrosivity (pH)	Greater than 2 and less than 12.5
3. TPH (8015M GRO or acceptable equivalent)	Less than 25,000 ppm
4. TPH (8015M DRO or acceptable equivalent)	Less than 25,000 ppm
5. TCLP (Target Metals) (1311)	Less than EPA limits (40 CFR Part 261.24)
6. PCBs Screen	Less than 1 ppm
7. BTEX	Less than 1700 ppm
8. Moisture Content	Less than 25% moisture
9. TOH or TOX (Waste Oil Impacted Only)	Less than 1000 ppm (Waste Oil Impacted Only)
10. TPH (418.1) (Waste Oil Impacted Only)	Less than 25,000 ppm

NOTE: Other tests may be required depending on type and source of contamination. Soil generated as the result of a spill or from an unverifiable source require a full TCLP List.

Petroleum contaminated soil that is generated in association with regulated underground storage tanks as defined by the Georgia Environmental Protection Division, Georgia Underground Storage Tank (GUST) Rule 391-3-15-.02 are exempted from the testing requirements of 40 CFR Part 261.24. Soil Safe will accept soils based on the analytical requirements for site closure activities, providing documented evidence is presented that confirms the site falls within the rules.

The analytical results will be reviewed by an authorized representative of Soil Safe Technologies. If approved for recycle at the facility, an Approval Number must be on the incoming manifest or the shipment will be rejected at the facility. The Approval Number will be used in the SSTI Inventory Tracking System.

# SOIL SAFE TECHNOLOGIES

## I. PCB CERTIFICATION

I, the undersigned, to the best of my knowledge verify that the waste material submitted for acceptance to Soil Safe Technologies does not contain Polychlorinated Biphenyls (PCBs), as defined by EPA 40 CFR 761, at a level greater than 1 ppm.

## II. HERBICIDE/PESTICIDE CERTIFICATION

I, the undersigned, to the best of my knowledge verify that the waste material submitted for acceptance to Soil Safe Technologies does not contain herbicides or pesticides at a concentration which would render it as hazardous as defined by EPA CFR 761.

## III. RCRA TOXICITY CERTIFICATION

I, the undersigned, to the best of my knowledge verify that the waste material submitted for acceptance to Soil Safe Technologies does not contain TCLP or priority contaminants which characterize the waste material as defined by EPA 40 CFR 761.

## IV. NON-HAZARDOUS WASTE CERTIFICATION

I, the undersigned, to the best of my knowledge verify that the waste material submitted for acceptance to Soil Safe Technologies is not an EPA listed hazardous waste, and does not exhibit any of the characteristics of a hazardous waste. This waste material is therefore classified non-hazardous as defined in EPA 40 CFR 261.

The following information is required prior to acceptance of material at Soil Safe Technologies. The information must be complete and is required by our accounting department for billing purposes. The following information will be held in strict confidence.

## CHAIN OF PAYMENT

Instructions For This Section : In order, starting with the generator and ending with Soil Safe Technologies, please provide the chain of payment for the project you wish to have approved for acceptance by Soil Safe Technologies. This information must be provided. Please contact your Soil Safe representative with any questions that you may have.

1. Hunter Army Airfield Savannah, GA

Name, address, contact name and phone number of broker, consultant, contractor, General Contractor, etc.

2. OMEGA ENVIRONMENTAL SERVICES 4661 HAMMOR ROAD 250. B  
TUCKER GA. 30084  
770-621-2414 JONAS MASON.

3. SOIL SAFE TECHNOLOGIES

4. \_\_\_\_\_

5. \_\_\_\_\_

(If additional space is needed, please provide requested information on separate sheet and attach)

I, the undersigned, verify the information provided above is true and accurate. The information is complete and follows the chain of payment as it will occur upon invoice for this project. Any changes to this chain will be reported to Soil Safe Technologies as soon as possible.

**GENERATOR:** U.S. Army Hunter Army Airfield

**SITE:** Fire Training Area  
Hunter Army Airfield  
Savannah, GA

**DATE:** 1/6/98

**JOB NUMBER:** 0240S2

## GENERAL INSTRUCTIONS FOR COMPLETING MATERIAL CHARACTERIZATION REPORT (MCR)

The MCR has been designed to provide Soil Safe Technologies with the information necessary to treat your material in a safe, legal and environmentally compatible manner.

The information on Form SSTI-MCR2 is required prior to the acceptance of any materials at any of our facilities. Answers must be provided for all questions/sections on this form. Responses must be legibly printed in either blue or black ink, or typed.

If a particular question is not applicable to your material, indicate by writing "N/A" in the appropriate space. If your material does not contain a particular constituent, indicate by writing "None" in the appropriate space.

If you do not know the answer to a specific question, indicate by writing "Unknown" in the appropriate section. This response may require you to provide additional information, or perform additional analysis.

If you are acting as the agent for the generator, the generator must either fill out and sign the "Delegation of Authority" section of this document, or provide you with a letter authorizing you to act as his/her agent with regards to any actions or communications regarding Soil Safe. A copy of the letter will be submitted with this form.

Results of the parameters analyzed must be within Soil Safe's acceptance limits as defined on Form SSTI-MCR3 and SSTI-MCR4. Please refer to SSTI-MCR4 for a detailed listing of analytes and permissible limits.

Form SSTI-MCR5 must be reviewed and signed to certify the non-hazardous nature of the material to be received.

Soil Safe Technologies will review the analytical results and completed MCR. A site audit may be performed to confirm the information submitted. If the material meets acceptance limits, the site will be issued an approval number. The approval number must appear on all correspondence relating or referring to that particular site (i.e. manifests, MCR, proposal, etc.).

If you need assistance in completing this form, please contact your Soil Safe representative at (912) 925-6800.

Make a copy of this form for your records and fax to (912) 925-0308 or send the original and all attachments to Soil Safe Technologies, P.O. Box 60055, Savannah, Georgia 31420.

SSTI-MCR1

I, the undersigned, verify to the best of my knowledge, that the waste material submitted for acceptance at SOIL SAFE TECHNOLOGIES contains no contaminants other than those for which it has been tested

NON-HAZARDOUS MATERIAL APPROVAL PROCEDURES

Generator/Customer provided analyticals must be performed by an approved laboratory using methods in conformity with Test Methods for Evaluating Solid Waste (United States Environmental Protection Agency, Office of Solid Waste and Emergency Response, SW-846, Third Edition, as revised) or with an alternate method approved by Georgia Environmental Protection Division. Soil Safe Technologies may, based on circumstances, perform a site audit and collect a composite sample(s). Each sample will be assigned a sample number. This number will be used to identify the generator and the location of the material. The sample number will also be used as the basis for the Approval number (or the Rejection number), by adding the prefix A (or R) to the sample number. If the situation so dictates (e.g. materials accepted/approved based upon customer provided analyticals) samples will be collected from incoming containers and used as described above. Misrepresented material containing any levels of contamination in excess of Soil Safe's acceptance criteria, or any type of hazardous or coded waste will be disposed in a legal and appropriate manner at the cost of the generator (or his/her agent).

## SOIL SAFE TECHNOLOGIES

The acceptance parameters for incoming material to any Soil Safe Technologies receiving location are listed below. Signatures on Form SSISE-MCR2 and Form SSISE-MCR4 constitute a written warranty that the material being offered for recycle is within those parameters listed.

<u>PARAMETER</u>	<u>MAXIMUM ACCEPTABLE VALUE</u>
------------------	---------------------------------

General and RCRA Specific Characteristics

Flashpoint	> 140 Deg. F (60 Deg. C)
Corrosivity (pH)	≥ 2 to ≤ 12.5
Reactivity Cyanide	< 250 mg/kg (ppm)
Reactivity Sulfides	< 500 mg/kg (ppm)
Total Petroleum Hydrocarbons	< 30,000 ppm
Total BTEX values	< 1700 ppm
PCB's	< 1.5 ppm

ICLP

Arsenic	< 5.0 ppm
Barium	< 100.0 ppm
Cadium	< 1.0 ppm
Chromium	< 5.0 ppm
Lead	< 5.0 ppm
Mercury	< 0.2 ppm
Selenium	< 1.0 ppm
Silver	< 5.0 ppm

Benzene	< 0.5 ppm
Carbon Tetrachloride	< 0.5 ppm
Chlordane	< 0.03 ppm
Chlorobenzene	< 100.0 ppm
Chloroform	< 6.0 ppm
o-Cresol	< 200.0 ppm
m-Cresol	< 200.0 ppm
p-Cresol	< 200.0 ppm
Cresol	< 200.0 ppm
1,4 Dichlorobenzene	< 7.5 ppm
1,2 Dichloroethane	< 0.5 ppm
1,1 Dichloroethane	< 0.7 ppm
2,4 Dinitrotoluene	< 0.13 ppm
Heptachlor (and it's epoxide)	< 0.008 ppm
Hexachlorobenzene	< 0.13 ppm
Methyl ethylketone	< 200.0 ppm
Hexachlorobutadiene	< 0.5 ppm
Hexachloroethane	< 3.0 ppm
Nitrobenzene	< 2.0 ppm
Pentachlorophenol	< 100.0 ppm
Pyridine	< 5.0 ppm
Tetrachloroethylene	< 0.7 ppm
Trichloroethylene	< 0.5 ppm
2,4,5 Trichlorophenol	< 400.0 ppm
2,4,6 Trichlorophenol	< 2.0 ppm
Vinyl Chloride	< 0.2 ppm

Any other material that exhibits any hazardous waste characteristics or possesses an EPA waste code is unacceptable.

The analytical results will be reviewed by an authorized representative of Soil Safe Technologies. If approved for recycle at the facility, an Approval Number must be on the incoming manifest or the shipment will be rejected at the facility. The Approval Number will be used in the SSI Inventory Tracking System.

ENCLOSURES RETURNED (List by item No.) NAME, TITLE AND SIGNATURE OF APPROVING AUTHORITY DATE

*Soil Safe Technologies Incorporated*  
***Certificate of Recycle***

Soil Safe Technologies Incorporated accepted 9430.04 tons of non-hazardous recyclable petroleum contaminated soil generated by U.S. Army Hunter Army Airfield from DPW Public Works, Hunter Army Airfield, GA under approval number 4-0240S.

This material was contracted by and between Soil Safe Technologies Incorporated and Omega Environmental Services contractor, representing the generator. It was accepted for recycling based upon analytical information provided by a certified laboratory and also written certification by the generator verifying non-hazardous status.

This material was transported under manifest numbers E8018 through E8578.

Soil Safe Technologies Incorporated accepts full responsibility for this material to include safe handling, storage and processing. We certify that this material has been recycled into an environmentally benign product for paving or other construction purposes.

Paul M. Lewczyk  
Director of Operations

*Soil Safe Technologies Incorporated*  
***Certificate of Recycle***

Soil Safe Technologies Incorporated accepted 233.55 tons of non-hazardous recyclable petroleum contaminated concrete debris generated by U.S. Army Hunter Army Airfield from DPW Environmental, Hunter Army Airfield, GA under approval number 4-0240S2.

This material was contracted by and between Soil Safe Technologies Incorporated and Omega Environmental Services contractor, representing the generator. It was accepted for recycling based upon analytical information provided by a certified laboratory and also written certification by the generator verifying non-hazardous status.

This material was transported under manifest numbers E8001 through E8016.

Soil Safe Technologies Incorporated accepts full responsibility for this material to include safe handling, storage and processing. We certify that this material has been recycled into an environmentally benign product for paving or other construction purposes.

  
Paul M. Lewczyk  
Director of Operations

Thursday, March 05, 1998
