SUBJECT: Above Ground Storage Tank 7009, Facility ID#9-025113\*2 – Bulk Fuel  
Facility, Hunter Army Airfield, Georgia

Dear Mr. Baumgardt:

The Georgia Environmental Protection Division (EPD) has reviewed the May 2016 report, "Pilot Study Interim Progress Report #5 for Corrective Actions at Bulk Fuel Facility (HAA-9) ..." prepared by Leidos and SES Construction and Fuel Services, LLC. EPD approves of the request for no further action for the jet fuel release from AST 7009 at the site referenced above. However, further corrective action may be required, if mandated through more stringent state or federal statutory or regulatory changes. Additional measures may also be required if existing or future drinking water systems or surface water bodies within two miles of the site are impacted by any dissolved contamination resulting from this release, or if previously unidentified soil contamination, dissolved contamination or free product are identified as originating at the site.

Feel free to contact me at 404 362 2556 if you have any comments or questions.

Sincerely,

James S. Guentert  
Geologist III
