Dear Mr. Spears:

This is to acknowledge your consultant's letter, dated August 14, 1998, that forwarded the subject CAP-B prepared by Metcalf & Eddy, Inc., for our review.

You have certified that the CAP for the subject facility has been implemented in accordance with the schedules, specifications, sampling programs, and conditions contained therein, and that the plan's stated objectives have been met.

Based on current requirements of the Georgia Underground Storage Tank Act and the Georgia Rules for Underground Storage Tank Management (GUST Rules) and the data contained in your report, dated March 23, 1998, the Georgia Environmental Protection Division (EPD) has determined that, for the current release, **no further action is required for contamination related to the subject location, at this time.**

However, this site could be subject to further corrective action in the future if mandated through more stringent State or Federal statutory or regulatory changes, if drinking water systems are identified or installed within two miles of the site, if surface water bodies are impacted by any dissolved contamination resulting from this release, or if previously unidentified soil contamination, dissolved contamination and/or free product on groundwater are identified as originating from this site.

If you have any questions, please contact William E. Logan at (404)362-2687.

Sincerely,

Lisa L. Lewis
Unit Coordinator
