Dear Mr. Biering:

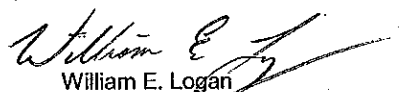

The Georgia Underground Storage Tank Management Program (USTMP) has received your consultant's letter, dated August 25, 2006, that forwarded a properly prepared UST Closure Report. The report was prepared by CAPE Environmental, Inc.

According to your Closure Report, soil and/or groundwater contamination have been reported above the appropriate method detection limits. Therefore with ongoing corrective action please proceed with the Corrective Action Plan (CAP)-Part B with the submittal of the Seventh Annual Monitoring (Progress) Report by **July 2007**.

If free product is identified during any of your site investigation activities, you are required to begin free product removal **immediately**. Free product recovery activities must also be reported in the CAP-Part B Progress Report.

If you have questions, please contact the undersigned at (404) 362-4529.

Sincerely,

  
William E. Logan  
Senior Geologist  
Corrective Action Unit II
