Dear Mr. Spears:

This is to acknowledge your submittal, dated October 30, 1996, of the subject Closure Report, prepared by Anderson Columbia Environmental, Inc., for our review.

We have conducted a technical review of the Closure Report. The basis for this review is the Closure Report content referenced in paragraph 391-3-15-11(3) of the Georgia Rules for Underground Storage Tank Management (GUST Rules). The Georgia Environmental Protection Division (EPD) has determined that, for the current release, no further action is required for the contamination related to the subject location at this time.

However, the site could be subject to corrective action in the future if mandated through more stringent State or Federal statutory or regulatory changes, if drinking water systems are identified or installed within two miles of the site, if surface water bodies are impacted by any dissolved contamination, resulting from this release, or if previously unidentified soil contamination, dissolved contamination and/or free product on groundwater are identified as originating from this site.

If you have any questions, please contact the undersigned at (404) 362-2687.

Sincerely,

Kenneth F. White, Ph.D.
