Dear Mr. Fry:

This is to acknowledge your letter, dated April 29, 1999, that forwarded a UST Closure Report Addendum, for our review.

Based on current requirements of the Georgia Underground Storage Tank Act and the Georgia Rules for Underground Storage Tank Management (GUST Rules) and the data contained in your Completion Report the Georgia Environmental Protection Division (EPD) has determined that, **for the current release, no further action is required for contamination related to the subject location, at this time.**

However, this site could be subject to further corrective action in the future if mandated through more stringent State or Federal statutory or regulatory changes, if drinking water systems are identified or installed within two miles of the site, if surface water bodies are impacted by any dissolved contamination resulting from this release, or if previously unidentified soil contamination, dissolved contamination and/or free product on groundwater are identified as originating from this site.

If you have any questions, please contact the undersigned at (404)362-2687.

Sincerely,

William E. Logan
Senior Geologist
