Total Metals in Water by 6020A Summary Forms

6020 3015
- COVER PAGE -
INORGANIC ANALYSIS DATA PACKAGE

Client: Analytical Laboratory Services Inc.

SDG No.: ERT-002 **Method Type:** 6020 3015 **SOW No.:**

Contract: ERT002|Ft. Stewart 3 **Lab Code:** CAS **Case No.:** **SAS No.:**

Lab Sample ID	Client Sample ID	QC Description
9980394006	FTSW-AA-SW-21	
9980394014	FTSW-AA-SO-22 ERB	
9980395006S	FTSW-HR-SO-02 (01.5) ER	Matrix Spike
9980395006SD	FTSW-HR-SO-02 (01.5) ER	Matrix Spike Duplicate

Were ICP interelement corrections applied?	Yes/No	Yes	
Were ICP background corrections applied?	Yes/No	Yes	
If yes - were raw data generated before applications of background corrections?	Yes/No	No	

Comments:

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature.

Signature: Name: **Lisa Miller**

Date: Title: **Metals Manager**

Digestion Logbook

Microwave 3015 Prep (Water) (Version 1- 6/1/2010)

Note: All TCLP matrix spikes are spiked prior to preservation as noted in the TCLP logbook.

Batch: 37326	Queue: MDIG	HBN: 473767	RULE: D3015/6020	ALSI SOP: 09-3015
File Name: 37326_120801-073155			METHOD: 3015	Microwave ID: MARS

Batch Type:	Comment Codes:	Reagents:		Pipettes:		Start	Finish
T: TCLP	1. Sample failed initial digestion due to a weight loss >5g	HNO3:	L12065 JT BAKER		Date:	08/01/2012	08/01/2012
S: SPLP	2. Sample reacts with reagent				Time:	09:40:00	10:06:00
M: 6020	3. Less sample used due to high metal content				Tech:	KMK	KMK
W: 6010	4. Less sample used to result in successful microwave digestion				Reviewed/Approved By:		N/A
A: ASTM	5. Sample does not digest by microwave, digest by method 3050				Date:

INORGANIC ANALYSIS DATA PACKAGE

Client: Analytical Laboratory Services Inc.

SDG No.: ERT-002 Method Type: 6020 3051 SOW No.:

Contract: ERT002|Ft. Stewart 3 Lab Code: CAS Case No.: SAS No.:

Lab Sample ID	Client Sample ID	QC Description
9980394001	FTSW-AA-SO-17	
9980394002	FTSW-AA-SO-18 (01.5)	
9980394003	FTSW-AA-SO-19	
9980394004	FTSW-AA-SO-20 (01.5)	
9980394005	FTSW-AA-SO-21	
9980394007	FTSW-AA-SO-22	
9980394008	FTSW-AA-SO-23	
9980394009	FTSW-AA-SO-24	
9980394010	FTSW-AA-SO-25	
9980394011	FTSW-AA-SO-25 DUP	
9980394012	FTSW-AA-SO-26	
9980394013	FTSW-AA-SO-27	
9980395003S	FTSW-HR-SO-01S	Matrix Spike
9980395003SD	FTSW-HR-SO-01SD	Matrix Spike Duplicate

Were ICP interelement corrections applied?	Yes/No	Yes	
Were ICP background corrections applied?	Yes/No	Yes	
If yes - were raw data generated before applications of background corrections?	Yes/No	No	

Comments:

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature.

Signature: Name: **Lisa Miller**

Date: Title: **Metals Manager**

Total Solids Summary Forms

Sample Description
FTSW-AA-SO-25 DUP

Form 7
Duplicate Summary

Analysis Method: 2540G
SDG No.: ERT-002

Matrix (soil/water): soil
Units: %
Instrument ID: N/A
GC Column: N/A
Sample % Moisture: N/A

Lab Sample ID: 9980394011
Lab File ID: N/A
Lab Sample Dup. ID: 1017716
Dup. Lab File ID: N/A
Dup. % Moisture: N/A

Analyte	Sample Concentration	Duplicate Concentration	Relative Percent Difference (RPD)	(1)	Acceptable Limit
Total Solids	97.9	98.1	0.2		5%

(1) The following qualifiers are used:
* : Values outside of acceptable limits

Sample Management

This report contains the results of the analysis of one (1) water sample and eighteen (18) solid samples collected on July 26, 2012. Analytical results and quality control information are summarized in this data package.

Qualifier Symbol Definitions:

U = Qualifier indicates that the analyte was not detected above the LOD.
J = Qualifier indicates that the analyte value is between the DL and the LOQ.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds the calibration range.
P = Qualifier indicates that the RPD between the two analytical columns is greater than 40%.
NSC = Qualifier indicates that spike recoveries were not calculated based on the spiking concentration.

Result Symbol Definitions:

DL = The smallest analyte concentration that can be demonstrated to be different from zero or a blank concentration at the 99% level of confidence.
LOD = The smallest analyte concentration that must be present in a sample in order to be detected at a high level of confidence.
LOQ = The lowest concentration that produces a quantitative result within specified limits of precision or bias.

Sample Receipt

Samples arrived at ALS via courier on July 27, 2012. Upon receipt, the samples were inspected and compared to the Chain of Custody. Sample temperature was documented on the enclosed Chain of Custody. Samples were received intact and properly preserved, unless noted on the enclosed Certificate of Analysis and/or Chain of Custody.

Explosives by Method 8330B

Sample Handling. One (1) water sample was extracted and analyzed by SW-846 Method 8330B for explosives. All sample extractions and analyses were performed within the holding times associated with the method.

Reporting. In Method 8330B, each sample extract may be analyzed on two dissimilar columns, an "Acclaim Explosives E1" column and an "Acclaim Explosives E2-Proprietary" column. In general, the final result reported on the Certificate of Analysis is the result from the primary column (E1), provided the target analyte is detected on both columns. For the sample in this deliverable group, there were no target analytes detected so confirmation on E2 was not warranted.

Initial Calibrations. The initial calibrations for all target analytes were in control on both columns.

Calibration Verification. Results for the second source and calibration verification standards were within control limits.

Surrogates. All surrogate recoveries were in within control limits.

Blanks. Target analytes were not detected in the method blank.

Laboratory Control Sample. Spike recoveries for all target analytes were within control limits.

Matrix Spikes. A matrix spike and matrix spike duplicate, identified as 1018216 and 1018217, were prepared from project sample FTSW-AA-SO-10[02]E (9980109002.) All results for precision and accuracy were within control limits.

Explosives by Method 8330B

Sample Handling. Eighteen (18) solid samples were air dried upon receipt. Once received, each sample was completely emptied and broken up onto a large tray lined with aluminum foil. The trays were then placed in a controlled environment to eliminate outside contamination. Samples were allowed to air dry to a constant weight at constant room temperature unexposed to light until all moisture was removed. Once dry, each sample was passed through a clean, dry 10-mesh (2 mm) sieve to remove any oversized fractions or debris.

Once the samples were dried, an aliquot for extraction was removed. The aliquot was laid out on the original tray it was dried on so that it was 1-2 cm thick. 10 grams of each sample, using 30 different increments (portions ~0.3grams) from randomly chosen locations were collected.

The dried samples were then extracted and analyzed by SW-846 Method 8330B for explosives. All sample extractions and analyses were performed within the holding times associated with the method.

Reporting. In Method 8330B, each sample extract may be analyzed on two dissimilar columns, an "Acclaim Explosives E1" column and an "Acclaim Explosives E2-Proprietary" column. In general, the final result reported on the Certificate of Analysis is the result from the primary column (E1), provided the target analyte is detected on both columns. For the samples in this deliverable group, there were no target analytes detected on Column E1, so confirmation on Column E2 was not warranted.

Initial Calibrations. The initial calibrations for all target analytes were in control on both columns.

Calibration Verification. Results for the second source and calibration verification standards were within control limits.

Surrogates. All surrogate recoveries were in within control limits.

Blanks. Target analytes were not detected in the method blank.

Laboratory Control Sample. Spike recoveries for all target analytes were within control limits.

Matrix Spikes. Matrix spikes and matrix spike duplicates, identified as 1019871, 1019872, 1019873 and 1019874, were prepared from project sample FTSW-AA-SO-03 (9980109011.) All results for precision and accuracy were within control limits.

Matrix spikes and matrix spike duplicates, identified as 1020317, 1020318, 1020319 and 1020319, were prepared from project sample FTSW-AA-SO-08[02] (9980109017.) All results for precision and accuracy were within control limits.

Totals Metals by SW-846 Method 6020A

Sample handling. One (1) water sample was analyzed for total metals on the Agilent 7700x using SW-846 Method 6020A. The sample was analyzed within the six-month holding time established for this method.

Calibration. All criteria associated with the calibration were within method control limits with the exception of the mid-level CCV analyzed at 14:21 on 8/7/12 for copper which was recovered above the method control limits. The associated LLCCV was within method control limits of 90-110%, and the sample did not contain copper. Data were reported.

Blanks. Metals were not detected in the reagent blanks. In the method blank, identified as 1017577, zinc was detected at 0.00222J mg/L.

Laboratory Control Samples. Recoveries were within method control limits.

Matrix Spike/Matrix Spike Duplicate. A matrix spike and matrix spike were performed on a sample not in this data deliverable. The MS and MSD recoveries and their RPDs were within method control limits.

Totals Metals by SW-846 Method 6020A

Sample handling. Eighteen (18) solid samples were digested and analyzed for total metals on the Agilent 7700x using SW-846 Method 6020A. The samples were analyzed within the six-month holding time established for this method.

Calibration. All criteria associated with the calibration were within method control limits.

Blanks. Metals were not detected in the reagent blanks or the method blank, identified as 1017046.

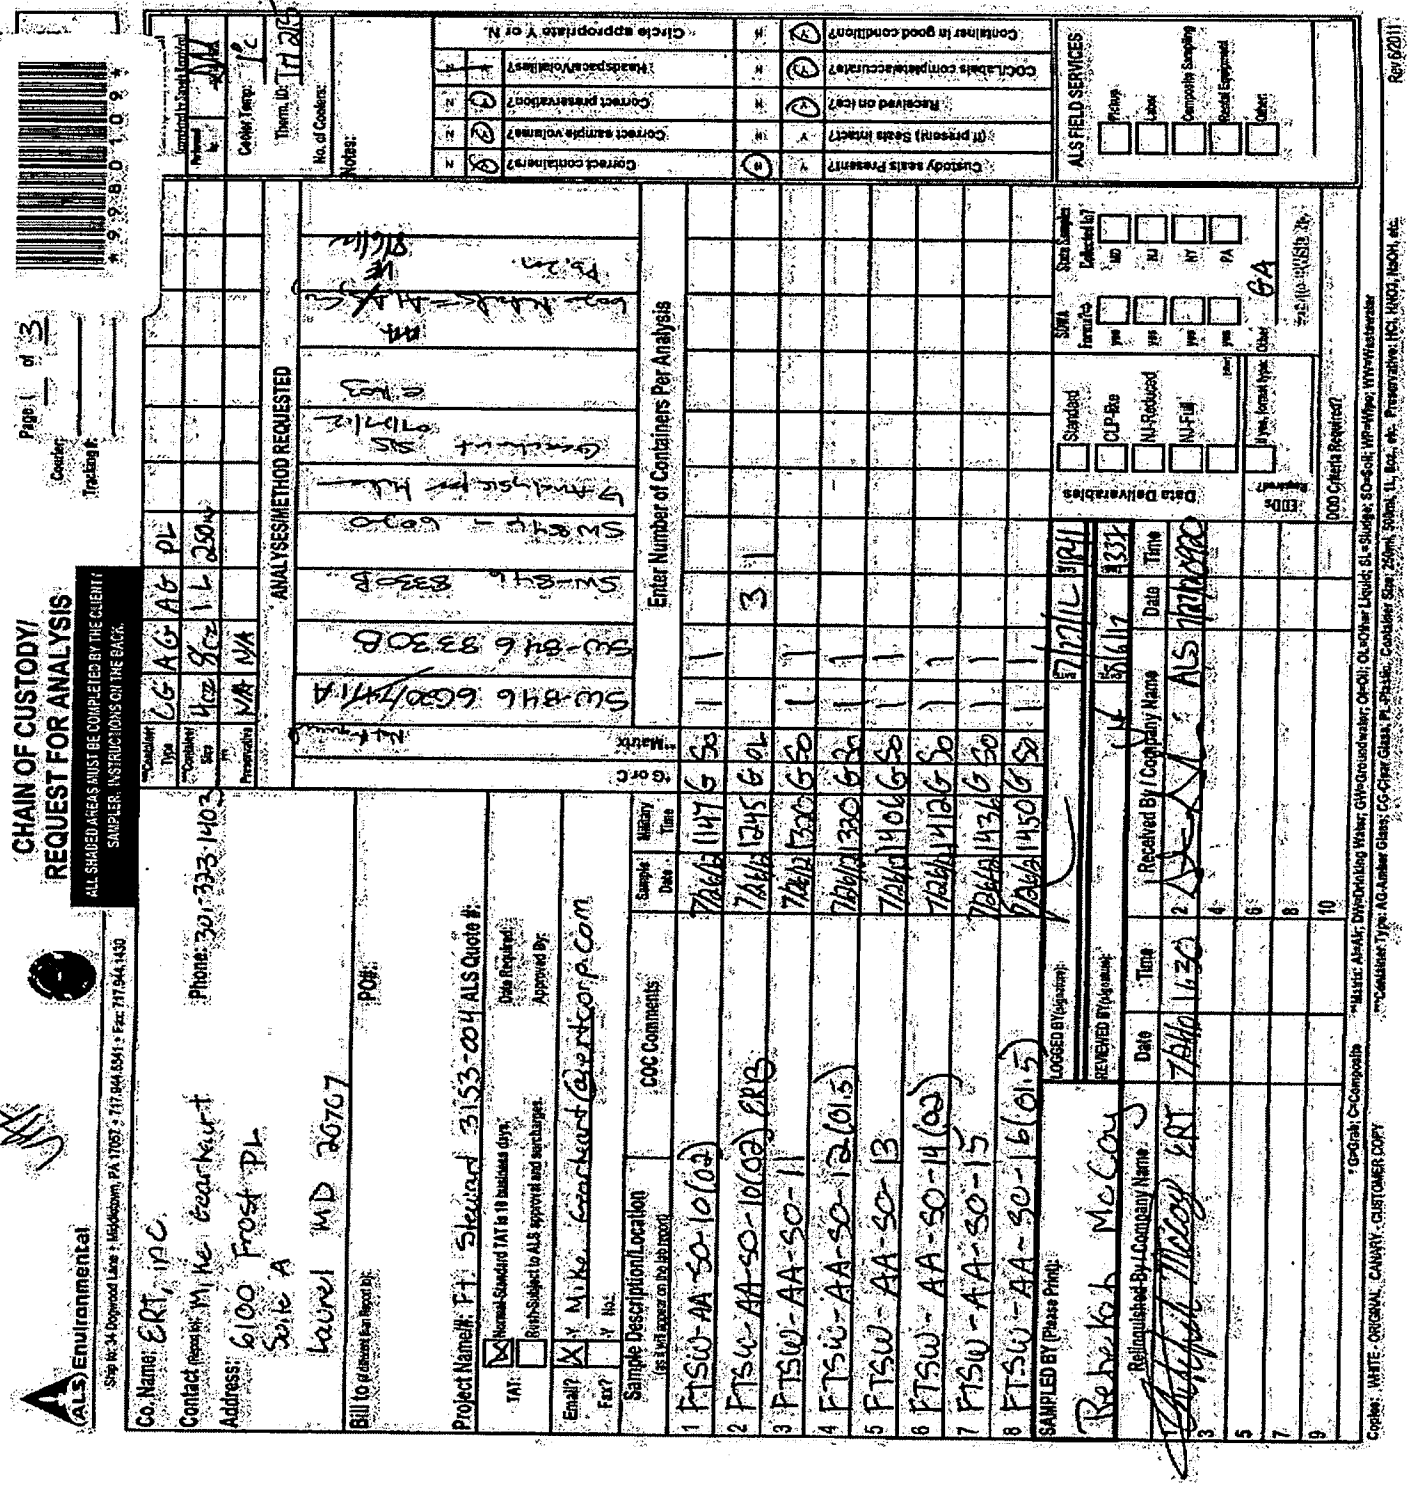
Laboratory Control Samples. Recoveries were within method control limits.

Matrix Spike/Matrix Spike Duplicate. Two sets of matrix spike and matrix spike duplicate were performed on two samples, 9980109011 (FTSW-AA-SO-03) and 9980109017 (FTSW-AA-SO-08 [02]) in this data deliverable. The MS and MSD recoveries and their RPDs were within method control limits for all target analytes except aluminum. The aluminum concentration in both samples was greater than four times the spiking amount; therefore, the spiked recoveries were not evaluated.

Total Solids by SM 2540G

Sample handling. Eighteen (13) solid samples were analyzed for total solids by Standard Method 2540G for dry weight reporting purposes. The samples were analyzed within the 14-day method recommended hold time for dry weight reporting.

Duplicate. A duplicate analysis, identified as 1016446, was performed on sample 9980109007 (FTSW-AA-SO-15 DUP). The relative percent difference between the results was within the QC limit of 5%.



A duplicate analysis, identified as 1016447, was performed on sample 9980109077 (FTSW-AA-SO-08 [02] DUP). The relative percent difference between the results was within the QC limit of 5%.

Certificate of Analysis

Project Name:	**Ft. Stewart GA project**	Workorder:	**9980109**
Purchase Order:		Workorder ID:	**ERT001|Ft. Stewart 3153-004**

Dear Mr. Gearhart,

Enclosed are the analytical results for samples received by the laboratory on Friday, July 27, 2012.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Vicki Forney (Project Coordinator) or Anna G Milliken (Technical Manager) at (717) 944-5541.

Please visit us at www.analyticallab.com for a listing of ALS' NELAP accreditations and Scope of Work, as well as other links to Water Quality documentation on the internet.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Environmental.

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Anna G Milliken
Technical Manager

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are performed in the laboratory and are therefore analyzed out of hold time.

Standard Acronyms/Flags

J, B	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference

SOIL LABORATORY CONTROL SAMPLE/LABORATORY CONTROL SAMPLE DUPLICATE RECOVERY

Lab Name: ALS - Middletown Contract:

Lab Code: PA010 Case No.: SAS No.: SDG No.: ERT-001

LCS - Sample No.: 1020315 Column ID: E1, 254nm

COMPOUND	SPIKE ADDED ug/Kg		LCS CONCENTRATION ug/Kg	LCS % REC#	QC LIMITS REC
2-Amino-4,6-dinitrotol	0.40		0.43	108	(80-125)
4-Amino-2,6-dinitrotol	0.40		0.42	106	(80-125)
1,3-Dinitrobenzene	0.40		0.42	105	(80-125)
2,4-Dinitrotoluene	0.40		0.42	106	(80-125)
2,6-Dinitrotoluene	0.40		0.41	103	(80-120)
HMX	0.40		0.40	100	(75-125)
Nitrobenzene	0.40		0.37	92.9	(75-125)
4-Nitrotoluene	0.40		0.39	98.1	(75-125)
2-Nitrotoluene	0.40		0.40	99.4	(80-125)
3-Nitrotoluene	0.40		0.41	103	(75-120)
RDX	0.40		0.43	107	(70-135)
Tetryl	0.40		0.40	101	(10-150)
1,3,5-Trinitrobenzene	0.40		0.43	109	(75-125)
2,4,6-Trinitrotoluene	0.40		0.41	104	(55-140)

Column to be used to flag recovery and RPD values with an asterisk

* Values outside of QC limits

RPD: 0 out of 0 outside limits

Spike Recovery: 0 out of 14 outside limits

QC Flag Legend

a - Target compound detected but, quantitated amount
Below Limit Of Quantitation(BLOQ).
M - Compound response manually integrated.

Total Metals in Water by 6020A Summary Forms

6020 3015
- COVER PAGE -
INORGANIC ANALYSIS DATA PACKAGE

Client: ERT Earth Resources Technology, Inc

SDG No.: ERT-001 Method Type: 6020 3015 SOW No.:

Contract: ERT001|Ft. Stewart 3 Lab Code: CAS Case No.: SAS No.:

Lab Sample ID	Client Sample ID	QC Description
9980109002	FTSW-AA-SO-10[02] ERB	
9980395006S	FTSW-HR-SO-02 (01.5) ER	Matrix Spike
9980395006SD	FTSW-HR-SO-02 (01.5) ER	Matrix Spike Duplicate

Were ICP interelement corrections applied?	Yes/No	Yes	
Were ICP background corrections applied?	Yes/No	Yes	
If yes - were raw data generated before applications of background corrections?	Yes/No	No	

Comments:

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature.

Digestion Logbook

Microwave 3015 Prep (Water) (Version 1- 6/1/2010)

Note: All TCLP matrix spikes are spiked prior to preservation as noted in the TCLP logbook.

Batch: 37326	Queue: MDIG	HBN: 473767	RULE: D3015/6020	ALSI SOP: 09-3015
File Name: 37326_120801-073155			METHOD: 3015	Microwave ID: MARS

Batch Type:	Comment Codes:	Reagents:		Pipettes:		Start	Finish
T: TCLP	1. Sample failed initial digestion due to a weight loss >5g	HNO3:	L12065 JT BAKER		Date:	08/01/2012	08/01/2012
S: SPLP	2. Sample reacts with reagent				Time:	09:40:00	10:06:00
M: 6020	3. Less sample used due to high metal content				Tech:	KMK	KMK
W: 6010	4. Less sample used to result in successful microwave digestion				Reviewed/Approved By:		N/A
A: ASTM	5. Sample does not digest by microwave, digest by method 3050				Date:

Digestion Logbook

Microwave 3051 Prep (Soil) (Version 1 - 6/1/2010)

Batch: 37298	Queue: MDIG	HBN: 473510	RULE: D3051/6020	ALSI SOP: 09-3051
File Name: 37298_120731-072244			METHOD: SW3051	Microwave ID: MARS

COMMENTS:	Comment Codes:	Reagents:		Pipettes:		Start	Finish
	1. Sample failed initial digestion due to a weight loss >5g	HNO3:	L02030 JT BAKER		Date:	07/31/2012	07/31/2012
	2. Sample reacts with reagent	HCl:	K25031 MALLINCKRODT		Time:	07:54:00	08:28:00
	3. Less sample used due to high metal conten	Boiling Stones:	D1069103		Tech:	KMK	KMK
	4. Less sample used to result in successful microwave digestion				Reviewed/Approved By:		N/A
	5. Sample does not digest by microwave, digest by method 3050				Date:

Sample Management

This report contains the results of the analysis of one (1) water sample collected on September 6, 2012. Analytical results and quality control information are summarized in this data package.

Qualifier Symbol Definitions:

U = Qualifier indicates that the analyte was not detected above the LOD.
J = Qualifier indicates that the analyte value is between the DL and the LOQ.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds the calibration range.
P = Qualifier indicates that the RPD between the two analytical columns is greater than 40%.
NSC = Qualifier indicates that spike recoveries were not calculated based on the spiking concentration.

Result Symbol Definitions:

DL = The smallest analyte concentration that can be demonstrated to be different from zero or a blank concentration at the 99% level of confidence.
LOD = The smallest analyte concentration that must be present in a sample in order to be detected at a high level of confidence.
LOQ = The lowest concentration that produces a quantitative result within specified limits of precision or bias.

Sample Receipt

Samples arrived at ALS via courier on September 7, 2012. Upon receipt, the samples were inspected and compared to the Chain of Custody. Sample temperature was documented on the enclosed Chain of Custody. Samples were received intact and properly preserved, unless noted on the enclosed Certificate of Analysis and/or Chain of Custody.

TCLP Volatile Extraction (ZHE) by SW-846 1311

Sample handling. One (1) aqueous sample was filtered for extraction for volatiles by SW-846 Method 1311. The sample was extracted within the holding time established for the method.

TCLP Volatile Organics by SW-846 Method 8260

Sample Handling. One (1) TCLP extract sample was analyzed by SW-846 Method 8260 for volatile organic compounds. All analyses were performed within holding time.

Initial Calibrations. Initial calibrations were properly analyzed and met method criteria for all target analytes.

Initial Calibration Verification Check. Initial calibration verification standards (ICV) were properly analyzed and all results were within method criteria. The analytical batch LCS also serves as the second source.

Continuing Calibration Checks. Continuing calibration checks were properly analyzed and met method criteria for all target analytes.

Blanks. No target analytes were detected in the method blank.

Surrogates. All surrogate recovery results were within control limits.

Spiked Blanks. All target analytes were recovered within control limits.

Internal Standards. All internal standard results were within method criteria.

TCLP Leaching Procedure by SW-846 1311

Sample handling. One (1) aqueous sample was filtered for leachate by SW-846 Method 1311. The sample was leached within the holding time established for the method.

TCLP Semi-volatile Organic Compounds

Sample Handling. One (1) TCLP extract was extracted by SW-846 Method 3510 and the extracts were analyzed by SW-846 Method 8270 for semi-volatile organic compounds. All extractions and analyses were performed within the holding time

Initial Calibrations. An initial calibration was performed and met method criteria for all target analytes.

Initial Calibration Verification Checks. Initial calibration verification checks were properly analyzed and met method criteria for all target analytes.

Calibration Check. Calibration check standards were properly analyzed and met method criteria for all other target analytes.

Blank. No target analytes were detected in the method blank.

Surrogates. All surrogate recoveries were within control limits.

Blank Spikes. All target analytes were recovered within control limits.

Internal Standards. All internal standards results met method criteria.

TCLP Chlorinated Pesticides by SW-846 Method 8081

Sample Handling. One (1) TCLP leachate was extracted by SW-846 Method 3510 and analyzed Method 8081 for a select group of chlorinated pesticides. The sample extractions and analyses were performed within the holding times associated with the method.

Reporting. The samples are analyzed using dual-column instrumentation, and detected analytes are reported from the column that yields the lower result unless quality control data or poor chromatography warrants the selection of the higher result. Target analytes were not detected on the primary column for any of the samples in this deliverable

0001

group. As such, summary forms are provided for this column *only*. Raw data for both columns is provided for review.

Initial Calibrations. An initial calibration was properly performed and met method criteria for all target analytes.

Initial Calibration Verification Check. Initial verification checks were properly analyzed and met method criteria for all target analytes.

Calibration verification. The initial calibrations were verified with a continuing calibration verification standard (CCV) every 12 hours thereafter, and at the conclusion of the analytical run. If CCV data indicate a potential high bias, sample results are not qualified and no corrective action is taken unless there are positive results above the reporting limit on the column where the high bias exists. All CCV results were otherwise within control limits on the column selected for reporting results.

Method Blank. No target analytes were detected in the method blank.

Surrogates. All surrogate recoveries were within control limits.

Spiked Blanks. All target analytes were detected within control limits.

TCLP Chlorinated Herbicides by SW-846 Method 8151

Sample Handling. One (1) TCLP leachate was extracted and analyzed Method 8151 for a select group of chlorinated herbicides by GC-ECD. The sample extractions and analyses were performed within the holding times associated with the method.

Reporting. The samples are analyzed using dual-column instrumentation, and detected analytes are reported from the column that yields the lower result unless quality control data or poor chromatography warrants the selection of the higher result. Target analytes were not detected on the primary column (RTX-CLPEST) for any of the samples in this deliverable group. As such, summary forms are provided for this column *only*. Raw data for both columns is provided for review.

Initial Calibrations. Initial calibrations were properly performed and met method criteria for all target analytes.

Initial Calibration Verification Check. Initial verification checks were properly analyzed and met method criteria for all target analytes.

Calibration verification. Continuing calibration check standards were properly analyzed and met method criteria for all target analytes.

Method Blank. No target analytes were detected in the method blank.

Surrogates. All surrogate recoveries were within control limits.

Spiked Blanks. All target analytes were recovered within control limits.

Internal Standards. All internal standard results met method criteria.

TCLP Metals by SW-846 Method 6010C

Sample handling. One (1) TCLP extract was microwave digested by SW-846 Method 3015. The digestate was analyzed for TCLP metals on the ThermoFisher ICP6500_2 using SW-846 Method 6010C. The sample was digested and analyzed within the six-month holding time established for the method.

Calibration. All criteria associated with the calibration and check standards were within the control limits for this method.

Blanks. Metals were not detected in the blanks.

Laboratory Control Sample. Recoveries were within the control limits.

pH by SM 9040C

Sample handling. One (1) water sample was analyzed for pH by method 9040C. The sample was not analyzed within the 24-hour method-recommended holding time.

Calibration. The pH meter of the autotitrator was calibrated for the normal pH range of 4.00 to 10.00 on the day of analysis. The calibration was validated by analyzing a standard prior to the analysis of samples and after every ten samples during the run. All standards were found to be within QC limits of +/- 0.05 pH units.

Reactive Cyanide by SW-846 Method 7.3CN

Sample handling. One (1) water sample was analyzed for reactive cyanide by SW-846 Method 7.3CN. The sample was distilled and analyzed within the 14-day holding time established for the method.

Calibration. An initial six-point calibration was properly established, and continuing calibration standards were analyzed to verify the calibration. The recoveries were within the QC limits of 90-110%.

Blanks. A preparation blank, identified as 1036741 MB, was distilled and analyzed with the sample. Initial and continuing method blanks were analyzed within the analysis. Reactive cyanide was not detected above ½ the reporting limit of 0.005 mg/L in the blanks.

Laboratory Control Sample. A laboratory control sample, identified as 1036742 LCS, was distilled and analyzed with the sample. The recovery was within the QC limits of 0-92%.

Reactive Sulfide by SW 846 Method 7.3

Sample handling. One (1) water sample was analyzed for reactive sulfide by SW 846 Method 7.3. The sample was digested and analyzed within the 7-day holding time established for the method.

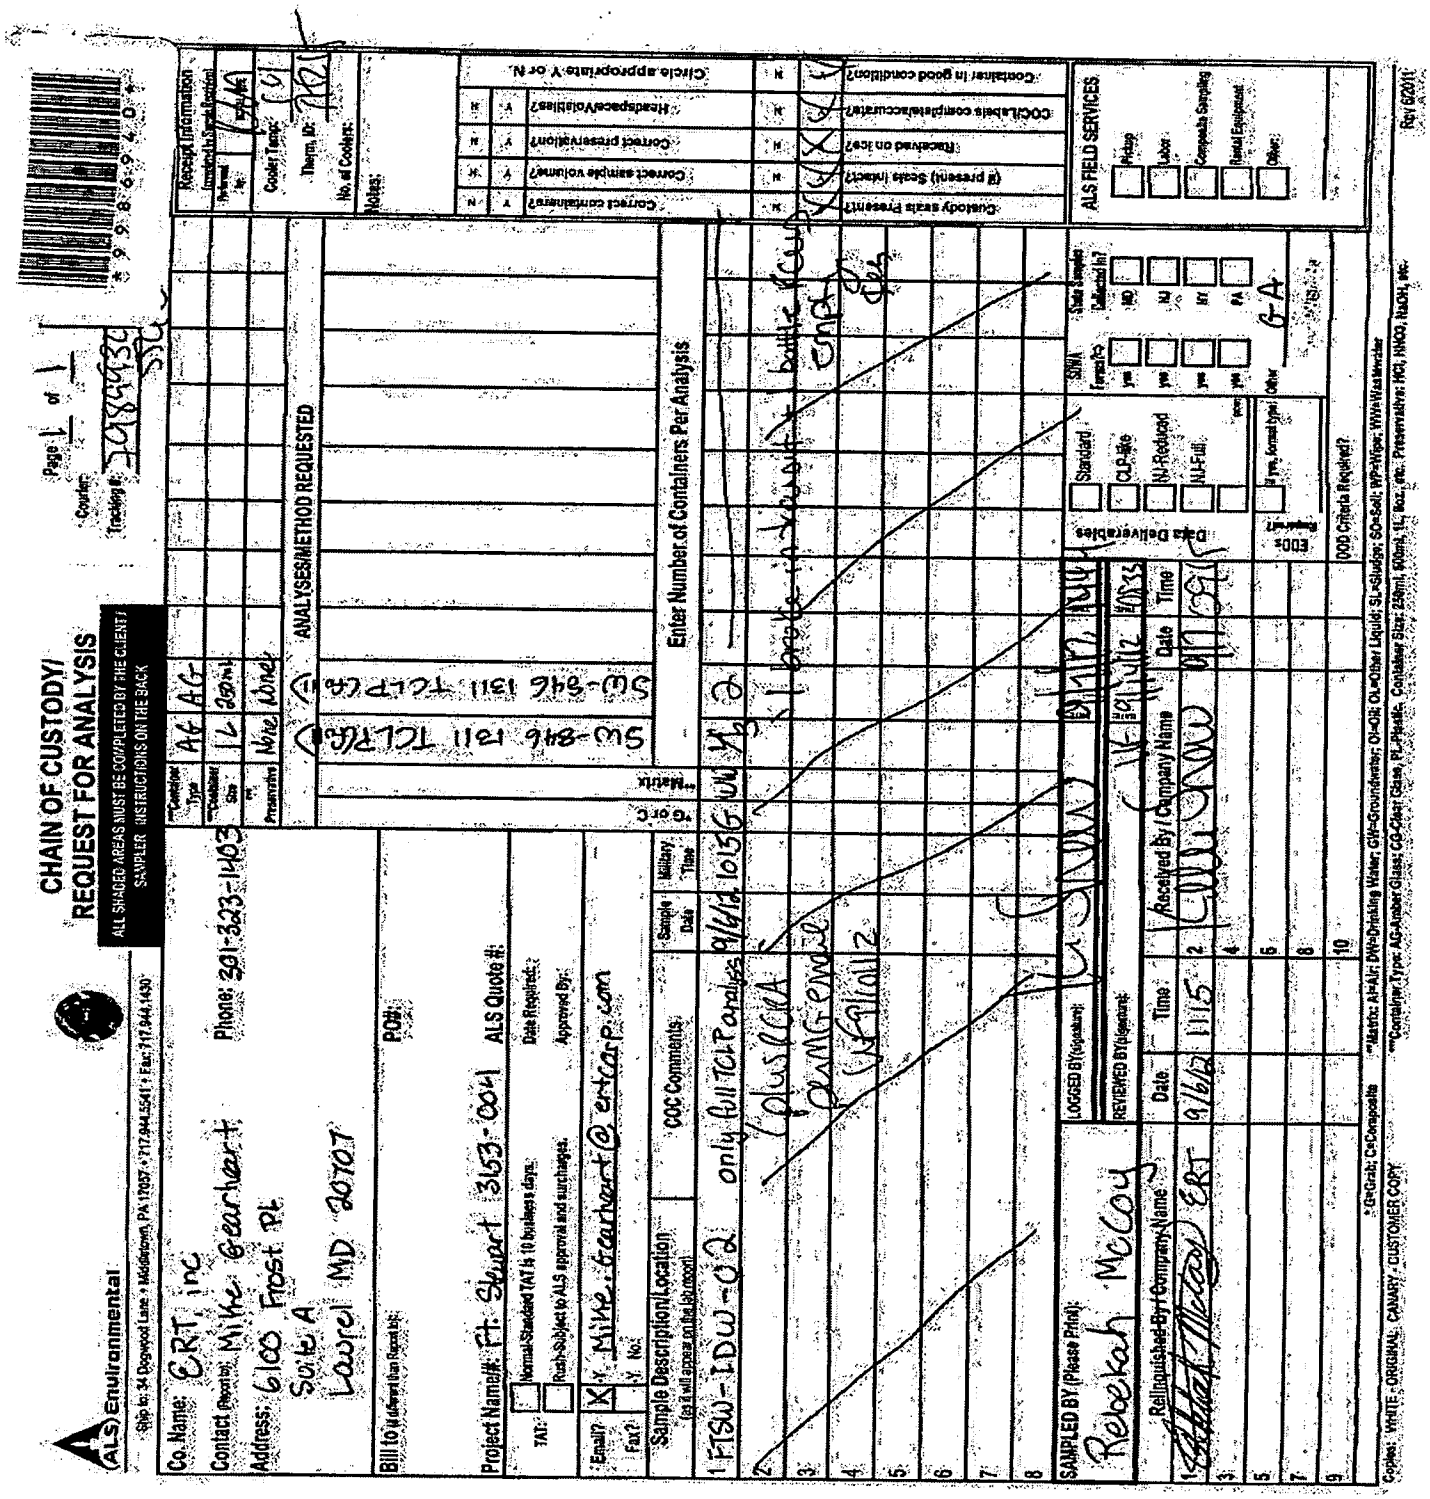
Calibration. Initial and continuing calibration standards were analyzed and recovered within the acceptable limits of 90-110%.

Blanks. A preparation blank, identified as 1036748 MB, was digested and analyzed with the sample. Reactive sulfide was not detected above ½ the reporting limit in the preparation blank. Initial and continuing blanks were analyzed in the run. Sulfide was not detected above ½ the reporting limit in the blanks.

Laboratory Control Sample. A laboratory control sample, identified as 1036749 LCS, was digested and analyzed with the samples. The recovery was within the QC limits of 49-148%.

Flashpoint by SW-846 1010

Sample handling. One (1) water sample was analyzed for flashpoint by SW-846 Method 1010. The sample was analyzed within the hold time established for the method.



Calibration. A standard, identified as p-xylene, was analyzed with the sample. The flashpoint of the standard was within the QC limits of +/- 2° F.

Certificate of Analysis

Project Name:	**Ft. Stewart GA project**	Workorder:	**9986940**
Purchase Order:		Workorder ID:	**ERT009|Ft. Stewart 3153-004**

Dear Mr. Gearhart,

Enclosed are the analytical results for samples received by the laboratory on Friday, September 07, 2012.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Vicki Forney (Project Coordinator) or Anna G Milliken (Technical Manager) at (717) 944-5541.

Please visit us at www.analyticallab.com for a listing of ALS' NELAP accreditations and Scope of Work, as well as other links to Water Quality documentation on the internet.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Environmental.

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Anna G Milliken
Technical Manager

SAMPLE SUMMARY

Workorder: 9986940 ERT009|Ft. Stewart 3153-004

Discard Date: 11/01/2012

Lab ID	Sample ID	Matrix	Date Collected	Date Received	Collected By
9986940001	FTSW-IDW-02	Water	9/6/12 10:15	9/7/12 09:15	Customer

Workorder Comments:

This report was modified to correct the 8081 surrogate recovery reuslts. SEF 10/18/12

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are performed in the laboratory and are therefore analyzed out of hold time.

Standard Acronyms/Flags

J, B	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference

ANALYTICAL RESULTS QUALIFIERS\FLAGS

Workorder: 9986940 ERT009|Ft. Stewart 3153-004

PARAMETER QUALIFIERS\FLAGS

[1] According to Pa/USEPA regulations, this sample is not considered to be ignitable. (Ref 40 CFR 261.21)

[2] Sample did not flash up to 200 degrees F.

[3] The surrogate Decachlorobiphenyl for method SW846 8081B was outside of control limits. The % Recovery was reported as 15.2 and the control limits were 30 to 135. This result was reported at a dilution of 1.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
Q - Qualifier signal failed the ratio test.

QC Flag Legend

M - Compound response manually integrated.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
Q - Qualifier signal failed the ratio test.

QC Flag Legend

M - Compound response manually integrated.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
Q - Qualifier signal failed the ratio test.

QC Flag Legend

M - Compound response manually integrated.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
M - Compound response manually integrated.

QC Flag Legend

H - Operator selected an alternate compound hit.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
Q - Qualifier signal failed the ratio test.

QC Flag Legend

M - Compound response manually integrated.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
Q - Qualifier signal failed the ratio test.

QC Flag Legend

M - Compound response manually integrated.
H - Operator selected an alternate compound hit.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
Q - Qualifier signal failed the ratio test.

QC Flag Legend

M - Compound response manually integrated.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
A - Target compound detected but, quantitated amount exceeded maximum amount.
M - Compound response manually integrated.

ALS - Middletown

INTERNAL STANDARD COMPOUNDS
AREA AND RT SUMMARY

Instrument ID: ms01.i
Lab File ID: 1092051.D
Lab Smp Id: 1800
Analysis Type: VOA
Quant Type: ISTD
Operator: GLQ
Method File: \\gc01\targetdata\Chem2\ms01.i\01_2012\1120920A.b\1-8260b09.m
Misc Info: ZZ VOMS 27567 8260W_CCV

Calibration Date: 21-SEP-2012
Calibration Time: 00:40

Level: LOW
Sample Type: WATER

Test Mode:
Use Last Continuing Calibrator.

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
Q - Qualifier signal failed the ratio test.
R - Spike/Surrogate failed recovery limits.
M - Compound response manually integrated.

ALS - Middletown

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
Q - Qualifier signal failed the ratio test.
R - Spike/Surrogate failed recovery limits.

ALS - Middletown

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
M - Compound response manually integrated.
H - Operator selected an alternate compound hit.

ALS - Middletown

INTERNAL STANDARD COMPOUNDS
AREA AND RT SUMMARY

Instrument ID: ms14.i
Lab File ID: 14092108.D
Lab Smp Id: 1236
Analysis Type: SV
Quant Type: ISTD
Operator: DHF
Method File: \\GC01\Targetdata\Chem2\ms14.i\14-2012\141209\14120921_DoD.b\14-82
Misc Info: ZZ SVMS 8270/3510C BNA242

Calibration Date: 21-SEP-2012
Calibration Time: 14:39

Level: LOW
Sample Type: WATER

Test Mode:
Use Last Continuing Calibrator.
If Continuing Cal. use Initial Cal. Level 5

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
R - Spike/Surrogate failed recovery limits.
M - Compound response manually integrated.
H - Operator selected an alternate compound hit.

ALS - Middletown

INTERNAL STANDARD COMPOUNDS
AREA AND RT SUMMARY

Instrument ID: ms14.i
