QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
M - Compound response manually integrated.

ALS - Middletown

INTERNAL STANDARD COMPOUNDS
AREA AND RT SUMMARY

Instrument ID: ms14.i
Lab File ID: 14092119.D
Lab Smp Id: 1800
Analysis Type: SV
Quant Type: ISTD
Operator: DHF
Method File: \\GC01\Targetdata\Chem2\ms14.i\14-2012\141209\14120921A_DoD.b\14-8
Misc Info: ZZ SVMS 17662 8270/3510C

Calibration Date: 21-SEP-2012
Calibration Time: 14:39

Level: LOW
Sample Type: WATER

Test Mode:
Use Initial Calibration Level 5.
If Continuing Cal. use Initial Cal. Level 5

QC Flag Legend

a - Target compound detected but, quantitated amount Below Limit Of Quantitation(BLOQ).
M - Compound response manually integrated.

ALS - Middletown

INTERNAL STANDARD COMPOUNDS
AREA AND RT SUMMARY

Instrument ID: ms14.i
Lab File ID: 14092131.D
Lab Smp Id: 1800
Analysis Type: SV
Quant Type: ISTD
Operator: DHF
Method File: \\GC01\Targetdata\Chem2\ms14.i\14-2012\141209\14120921B_DoD.b\14-8
Misc Info: ZZ SVMS 8270/3510C BNA242

Calibration Date: 21-SEP-2012
Calibration Time: 18:27

Level: LOW
Sample Type: WATER

Test Mode:
Use Initial Calibration Level 5.
If Continuing Cal. use Initial Cal. Level 5

COMPOUND	STANDARD	AREA LIMIT LOWER	AREA LIMIT UPPER	SAMPLE	%DIFF
14 1,4-Dichlorobenze	201484	100742	402968	182972	-9.19
34 Naphthalene-d8	894115	447058	1788230	860485	-3.76

THERMOFISHER ICP6500_2
Analytical Worksheet

(3015) Acid Matrix: 10% HNO3 + 1% HCl

Instrument Method:6010C
Sequence #:091712A
Date Started: 09/17/12
Analyst: SRT

*(ICAL5) High Std: 5 ml each of MA1433 + MA1434

*ICAL4: 4 mL High Std into 20 mL
*ICAL3: 2 mL High Std into 20 mL
*ICAL2 / LLCCV: 0.1 ml MB5536 into 20 ml
*CCV: 10 ml of High Std into 20 ml
*Second Source: 1.0 ml of MA1398 + 0.1 mL each of MA1420 + MA1338 + MA1408 + 0.1 ml each of MA1427 + MA1362 + MA1359 + MA1341 + MA1406 into 100 ml
*ICSA: 2.5 ml of MA1376 into 100 ml
*ICSAB: 2.5 ml of MA1376 + 0.250 ml of MA1377 & MA1378 into 100 ml
*Additional Second Source: 0.1 mL of MA1308 into 100 ml
*Cal Blank: 1000 ml HNO3 Lot #: K50030 HCl Lot#: K25031

* All Standards are prepared daily prior to analysis of samples in acid matrix listed.

* Post digestion spikes:
9mL sample, 0.375mL 1:1 mix
of calibration std. A and calibration std. B

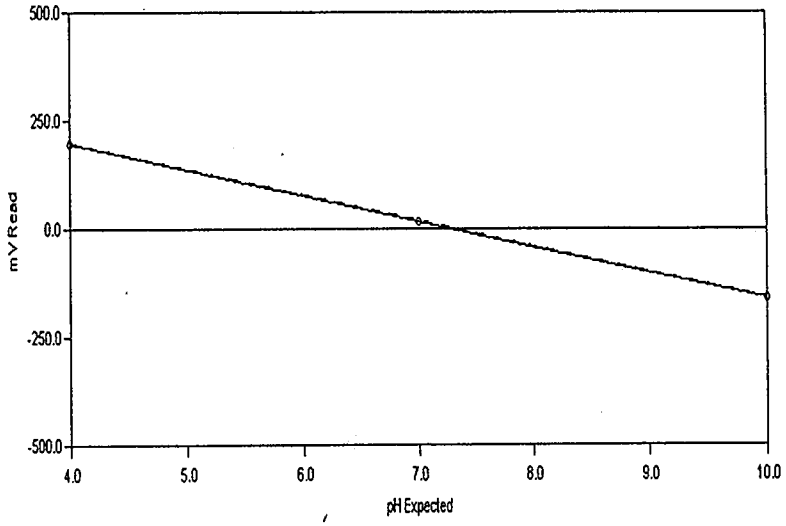
Analyst/Schedule Reviewer Checklist

	Analyst	Reviewer
All samples run, including those not entered by Sample Receiving	EA	
All samples run within their hold time	EA	
All samples run for the appropriate analysis (pH / SpC / Alk)	EA	
Calibration Passes	EA	
All openning QC passes (especially pH)	EA	
If openning QC fails, was it put back on? If not why?	EA	

Entry/ Approval Checklist



All QC Criteria was calculated and checked (for all analyses)

	1st Review	2nd Review
pH standards within 0.05 pH units	EA	
SpC standards within 10%	EA	
Alkalinity standards within 10%	EA	
pH duplicates within 0.1 pH units	EA	
SpC duplicates within 10%	EA	
Alkalinity duplicates within 20%	EA	
If QC failed were samples rerun within hold time? If not why?	EA	
All samples run within hold time? If not appropriate comment entered in LIMS.	EA	
All samples comply with sample identification / correlated data /historical data. (2nd Review only)

Reactive Cyanide by SW-846 7.3 Summary Forms

Form 4B
Inorganic Blank Summary

Analysis Method: 7.3 CN

SDG No.: ERT-009

Prep Blank A Matrix (soil/water): water

Units: ppm

Prep Blank B Matrix (soil/water):

Units:

Analyte	Initial Calibration Blank (mg/L) (1)9/20/12 (2)		Continuing Calibration Blanks (mg/L) (1)9/20/12 (2)		(1)9/20/12 (2)		(1)9/20/12 (2)		Preparation Blank A ID: 1036741 (1)9/20/12 (2)		Preparation Blank B ID: (1) (2)	
Cyanide	0.003	U	0.003	U	0.003	U	0.003	U	--	--		
Cyanide, Reactive	--	--	--	--	--	--	--	--	0.003	U		

(1) Analysis Date

(2) The following qualifiers are used:

U: The analyte concentration is less than 1/2 the reporting limit listed

J: The analyte concentration is less than 1/2 the reporting limit but greater than the method detection limit

Comments:

0080

Form 6B
Inorganic Initial and Continuing Calibration Summary

Analysis Method: 7.3 CN

SDG No.: ERT-009

Instrument ID: AA3

Concentration Units: mg/L

Analyte	Initial Calibration					Continuing Calibration							
	True Conc.	Conc. Recovered (1)9/20/12	Recovery (%)	(2)	Acc. Limit (%)	True Conc.	Conc. Recovered (1)9/20/12	Recovery (%)	(2)	Conc. Recovered (1)9/20/12	Recovery (%)	(2)	Acc. Limit (%)
Cyanide	0.050	0.047	94		90-110	0.050	--	--		--	--		90-110
						0.200	0.210	105		0.205	103		90-110

Entry / Approval

All QC Criteria was calculated and checked	**Initials & Date 1st Rev / 2nd Rev**
Blanks less than 0.005	JBP 9/20/12 / 9/21/12
QC's w/in 10%	JBP 9/20/12 / 9/21/12
LCS's w/in 10%	JBP 9/20/12 / 9/21/12
RPD's less than 10%	JBP 9/20/12 / 9/21/12
MS/MSD's w/in 10%	JBP 9/20/12 / 9/21/12

All samples run within hold time. If not the appropriate comment was placed on the sample. 9/21/12

All samples comply with sample identification/ correlated data/ historical data. 9/21/12

Chromatogram checked for correct peak integration. JBP 9/20/12

Reruns: List sample ID and dilution (if applicable)

Case Narrative

Method: ALS-LC/MS
Analysis: Agent Breakdown Products
ALS WO ID(s): 1222302

Client: ALS Laboratory Group
Account: 08001
Matrix: Soil
HBN #: 92002

General Set Information: There were two field samples in this workorder. The samples were analyzed for thiodiglycol (TDG).

Method Summary: Each sample was prepared as noted below and analyzed using an Agilent 1200 LC/MSD system in select ion monitoring (SIM) mode at m/z 97, 125, 139, 146, 181, 105 and 113. ChemStation software was used for instrument control and data analysis.

Sample Preparation: Approximately 1.00g of each sample was weighed into a 15-mL centrifuge tube, and 9.9mL of ASTM Type II water was added to each tube. 100µL of internal standard solution was then added to each sample, bringing the total extract volume to 10mL. The samples were capped, vortexed, rotated for at least 30 minutes, and filtered with Phenomenex Phenex 0.45µm PES syringe filters.

Holding Times: Holding times were met for all samples.

Dilutions: No dilutions were necessary.

Method QC data: The method blank criteria were met. The method blanks (LMB 290920 & 290925) were less than 1/2 the RL of 0.5ug/g for all analytes. The recoveries for LCS 290921 & 290926 were within acceptable parameters.

MS/MSD Analysis: The matrix spikes and matrix spike duplicates were performed on parent samples 1222142001 & 1222167001, which were in the same analytical batch. Recoveries and RPDs were within acceptable limits for all analytes.

Instrument QC: Instrument initial and continuing calibrations were performed in accordance with established procedures.

NC/CAR(s): None.

Sample Calculation: Samples were reported in µg/g. Results were calculated in µg/g by the equation (A)x(B)x(C)/(D),

where: A = Analyte concentration from the standard curve (µg/mL)
B = Dilution performed at time of analysis
C = Volume of extract (10mL)
D = Actual weight of sample aliquot (g)

Miscellaneous Comments: None.

Case Narrative

Method: 8270D
Analysis: Semivolatiles by GC/MS
SOP ref: OE-SW-3550, OS-SW-8270D

Set ID: 1222302
Client: ALS Laboratory Group
Matrix: Soil

General Set Information: There are ten field samples plus MS/MSD in this reporting group.

Method Summary: This is a GC/MS method for determination of semivolatile organic compounds in soil according to the SW-846 Guidelines. Thirty grams of soil were extracted by sonication and then concentrated to final volume of 1.0 mL. The resulting extract is analyzed using an Agilent model 5975 GC/MS system with an electron impact ionization source and a quadrapole mass-filter detector.

Sample Preparation: All samples were prepared in accordance with method 3550.

Holding Times: All preparation and analysis holding times were met for all samples.

Dilutions: None.

Method and Sample QC data: All target compounds were within recovery limits for the laboratory control sample. The method blank met the acceptance criteria with no target compounds detected above the reporting limit. All samples met pertinent internal standard area criteria. Sample 1222167001 (FTSW-HR-SO-43) had low area of the last internal standard. The MS and MSD had the same result and therefore confirmed that this is a matrix effect. This last internal standard is not pertinent to that analysis because the requested target analytes do not reference that internal standard. All surrogate recoveries were within QC limits.

MS/MSD Analysis: Matrix spiking was performed on Sample 1222167001. All recoveries were within expected ranges.

Instrument QC: The instrument was tuned with 50 ng DFTPP. A six-point initial calibration curve was analyzed prior to sample analysis. The concentrations of the standards were: 5, 20, 35, 50, 65 and 80 µg/mL. A calibration verification standard at a concentration of 50 ug/mL was analyzed to verify instrument response against the initial calibration. The initial calibration and continuing calibration verification passed all method criteria.

Miscellaneous Comments: None.

General Lab Comments

The results provided in this report relate only to the items tested.
Samples were received in acceptable condition unless otherwise noted.
Samples have not been blank corrected unless otherwise noted.
This test report shall not be reproduced, except in full, without written approval of ALS.

ALS provides professional analytical services for all samples submitted. ALS is not in a position to interpret the data and assumes no responsibility for the quality of the samples submitted.

All quality control samples processed with the samples in this report yielded acceptable results unless otherwise noted.

ALS is accredited for specific fields of testing (scopes) in the following testing sectors. The quality system implemented at ALS conforms to accreditation requirements and is applied to all analytical testing performed by ALS. The following table lists testing sector, accreditation body, accreditation number and website. Please contact these accrediting bodies or your ALS project manager for the current scope of accreditation that applies to your analytical testing.

MDL = Method Detection Limit, a statistical estimate of method/media/instrument sensitivity.
RL = Reporting Limit, a verified value of method/media/instrument sensitivity.
CRDL = Contract Required Detection Limit
Reg. Limit = Regulatory Limit.
ND = Not Detected, testing result not detected above the MDL or RL.
< This testing result is less than the numerical value.
** No result could be reported, see sample comments for details.

Qualifier Symbol Definitions

U = Qualifier indicates that the analyte was not detected above the MDL.
J = Qualifier Indicates that the analyte value is between the MDL and the RL. It is also used to indicate an estimated value for tentatively identified compounds in mass spectrometry where a 1:1 response is assumed.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds calibration range.
P = Qualifier indicates that the RPD between the two columns is greater than 40%.

Subject: RE: Letter of Receipt for Workorder 9981774: Received 8/8/2012

Vicki,

Hi. We've encountered another issue. Our field crew got confused on the sample nomenclature during the last days of sampling (we switched crews mid-way through). As a result, we request the following sample ID changes, please.

ID number from Lab	What ID Should be
FTSW-HR-SO - 5 (10)	FTSW-HR-SO-50 (10)
FTSW-HR-SO - 6 (10)	FTSW-HR-SO-51 (10)
FTSW-HR-SO - 8 (10)	FTSW-HR-SO-52 (10)
FTSW-HR-SO - 03 (10)	FTSW-HR-SO-53 (10)
FTSW-HR-SO - 12 (10)	FTSW-HR-SO-54 (10)
FTSW-HR-SO - 04 (7.5)	FTSW-HR-SO-55 (07.5)
FTSW-HR-SO - 09 (10)	FTSW-HR-SO-56 (10)
FTSW-HR-SO - 10 (10)	FTSW-HR-SO-57 (10)
FTSW-HR-SO - 11 (10)	FTSW-HR-SO-58 (10)
FTSW-HR-SO - 13 (10)	FTSW-HR-SO-59 (10)
FTSW-HR-SO - 14 (7.5)	FTSW-HR-SO-60 (07.5)
FTSW-HR-SO - 14 ERB	FTSW-HR-SO-60 (07.5) ERB
FTSW-HR-SO-15 (9.5)	FTSW-HR-SO-61 (09.5)
FTSW-HR-SO-16 (10)	FTSW-HR-SO-62 (10)

1222142

Can you call me regarding this requested change? We really should have more volume to complete that testing and one of the containers broke in transit. Thanks.

Vicki,

The sample labeled as IDW (Lab ID 9981774003) should not be analyzed for what's listed on the sample login sheet (and what's on the COC). This sample should be analyzed for full TCLP parameters and RCRA Characteristics. This sample is for disposal characterization. Could you please make the change?

Thank you,

Michael Gearheart
ERT, Inc.

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.
Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com.FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery,misdelivery,or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim.Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental,consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss.Maximum for items of extraordinary value is $500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Analytical Documentation

ALS WO ID #(S):1222142; 1222167; 1222302
ALS Sample #(S):1222142001-011; 1222167001-008; 1222302001-002
ALS Account #(s): 8001 Method: ALS LC/MS Matrix: Soil
Sequence: \\CHEM32\1\SEQUENCE\17AUG12-ABP-S.S
Prep Date: 08/14/2012 Analysis Date: 08/17/12 - 08/18/12
Prep/Analysis HBN #s: 91939/92002 Instrument LOD: 0.050µg/mL
Analyte: **Thiodiglycol (TDG)**
Reported MDL: See Report Reported LOD: See Report

SAMPLE PREPARATION: All ALS sample #'s agreed with field ID #'s. Approximately 1.00g of each sample was weighed into a 15-mL centrifuge tube, and 9.9mL of ASTM Type II water was added to each tube. 100µL of internal standard solution was then added to each sample, bringing the total extraction volume to 10.0mL. The samples were capped, vortexed, rotated for at least 30 minutes, and filtered with Pall 0.45µm Ion Chromatography Acrodiscs prior to analysis.

REAGENTS: Eluent A: 100% ASTM Type II water/0.1% glacial acetic acid.
Eluent B: 95% ACN/ 5% ASTM Type II water/0.1% glacial acetic acid.

HORIZON STANDARD(S): TDG (14169); MPA (14170); IMPA (14172); EMPA (14174); DIMP (14179)
All standards are at 1000µg/mL. Standards used to create calibration standards and those used for CCVs (target = 5.00µg/mL) and RLVS (target = 0.050µg/mL).
Internal Standard Solution: TDG-D8 (14177) at 100ug/mL.

CALIBRATION CURVE: Run 05/01/2012.
Raw data can be found in \\Alsltws013\DataReview\85766.

INSTRUMENT CONDITIONS: Samples were analyzed with an Agilent 1200 LC/MSD system, in positive SIM mode, monitoring m/z 97, 125, 139, 146, 181, 105 and 113.
Instrument ID: LCMS03 Run Time: 35.00 min. Flow Rate: 0.8mL/min Temp: 30°C
Output Gain: 3 Injection Volume: 10µL Fragmentor Voltage: 75 & 125
Column: Phenomenex Synergi Hydro-RP 4 micron (4.6 x 250mm) s/n: 245485-24

GRADIENT:

Time(min)	%Eluent A	%Eluent B
0.00	100.0	0.0
15.00	100.0	0.0
17.00	50.0	50.0
25.00	50.0	50.0
25.01	100.0	0.0

QC DATA: LMB/LCS **290920/21** & **290925/26** were run with the batch. 1.00g of washed sand (EMD Lot# 36211706) was prepared in the same manner as the samples. 20µl of Horizon QC standard 13383 was added to 10.0mL of sample preparation for the LCSs. Target = 20.0ug/g. ASTM Type II water was used for LMB extractions.

MS/MSD: MS/MSDs were performed on samples 1222142001 & 1222167001. 50µl of Horizon standard 14169 was added to 10.0mL of sample preparation. Spike target = 50.0µg/g.

COMMENTS: 1) Quantitation was done using m/z 105 for TDG. No confirmation ions were available for TDG. Results are reported in ug/g.
2) All CCV, LMB, LCS and MS/MSD results were within acceptable limits.

SIGMA-ALDRICH

Product Name	2,2'-Thiodiethanol, ≥99%
Product Number	166782
Product Brand	Aldrich
CAS Number	111-48-8
Molecular Formula	$S(CH_2CH_2OH)_2$
Molecular Weight	122.19

TEST	SPECIFICATION	LOT 11613AR RESULTS
APPEARANCE	COLORLESS LIQUID	COLORLESS LIQUID
INFRARED SPECTRUM	CONFORMS TO STRUCTURE.	CONFORMS TO STRUCTURE AND STANDARD AS ILLUSTRATED ON PAGE 276B OF EDITION I, VOLUME 1 OF "THE ALDRICH LIBRARY OF FT-IR SPECTRA".
GAS LIQUID CHROMATOGRAPHY	99.0% (MINIMUM)	99.6 %
QUALITY CONTROL ACCEPTANCE DATE		JANUARY 1997

STANDARD REPORT

Working Standard - TDG QC WRK

TDG QC WRK					Description - Thiodiglycol QC Wrk
Standard:	13383	Expires:	11/21/2012	Usable:	Yes
Lab Lot:	TDG QC WRK	Created By:	T. McKay	Amount:	8.44 mL
Part ID:		Create Date:	11/21/2011	Validated By:	
MFG:		MFG Lot:		Validated Date:	

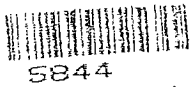
Pos.	Analyte	Name	Concentration
1	111-48-8	Thiodiglycol	1000 ug/mL

Composition

Standard	Standard ID	Description	Lab Lot ID	Volume Added	Expires
5844	TDG QC STK	Thiodiglycol QC Stock	TDG QC STK	8.44 mg	1/1/2025

STANDARD REPORT

Constituent



Stock Standard - TDG QC STK

TDG QC STK					Description - Thiodiglycol QC Stock
Standard:	5844	Expires:	1/1/2025	Usable:	Yes
Lab Lot:	TDG QC STK	Created By:	T. McKay	Amount:	50 grams
Part ID:	88559	Create Date:	10/7/2009	Validated By:	T. Bosch
MFG:	Fluka	MFG Lot:	1410377	Validated Date:	10/7/2009

Pos.	Analyte	Name	Concentration
1	111-48-8	Thiodiglycol	1000 mg/g

10088-10-08-0844-01

Certificate of Analysis

Product Brand	Fluka
PRODUCT-NO	88559
PRODUCT	2,2'-THIODIETHANOL *BioChemika*
FORMULA	$C_4H_{10}O_2S$
MOLECULAR MASS	122.19
CAS NUMBER	111-48-8
LOT	1410377

Test	Specification	Result
APPEARANCE (COLOR)	COLORLESS	COLORLESS
APPEARANCE (FORM)	CLEAR TO CLEAR VISCOUS LIQUID	CLEAR VISCOUS LIQUID
PURITY (GC AREA %)	≥ 99.0 % REL	99.9 % REL
GC (METHOD)	--	100% POLYETHYLENEGLYCOL (30 M X 0.32 MM X 0.25 UM), IN DICHLORMETHANE
REFRACTIVE INDEX N20/D	1.520 - 1.522	1.522
RESIDUE ON IGNITION	≤ 0.1 %	< 0.05 %
CARBON CONTENT	39.32 % (THEORY)	38.90 %
HYDROGEN CONTENT	8.25 % (THEORY)	8.49 %
INFRARED SPECTRUM	CONFORMS TO STRUCTURE	CONFORMS
QC RELEASE DATE	28/OCT/08

Sigma-Aldrich guarantees the 'Sales-Specification' values only, additional lot specific tests may be included for further information. The current 'Sales-Specifications' sheet is available on request. For further inquiries, please contact our Technical Service.Sigma-Aldrich warrants, that its products conform to the information contained in this and other Sigma-Aldrich publications. Purchaser must determine the suitability of the product for its particular use. See reverse side of invoice for additional terms and conditions of sale. The values given on the 'Certificate of Analysis' are the results determined at the time of analysis.

Calibration Table

Agent Breakdown Products

Calib. Data Modified : 7/9/2012 11:13:05 AM

Calculate : Internal Standard
Based on : Peak Area

Rel. Reference Window : 10.000 %
Abs. Reference Window : 0.000 min
Rel. Non-ref. Window : 10.000 %
Abs. Non-ref. Window : 0.000 min
Use Multiplier & Dilution Factor with ISTDs
Uncalibrated Peaks : not reported
Partial Calibration : No recalibration if peaks missing

Curve Type : Quadratic (some peaks differ, see below)
Origin : Ignored (some peaks differ, see below)
Weight : Linear (Amnt) (some peaks differ, see below)

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

Calibration Report Options :
Printout of recalibrations within a sequence:
Calibration Table after Recalibration
Normal Report after Recalibration
If the sequence is done with bracketing:
Results of first cycle (ending previous bracket)

Default Sample ISTD Information (if not set in sample table):

ISTD #	ISTD Amount	Name
2	10.00000	Thiodiglycol-D8

Sample Management

This report contains the results of the analysis of one (1) water sample and two (2) solid samples collected on August 7, 2012. Analytical results and quality control information are summarized in this data package.

Qualifier Symbol Definitions:

U = Qualifier indicates that the analyte was not detected above the LOD.
J = Qualifier indicates that the analyte value is between the DL and the LOQ.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds the calibration range.
P = Qualifier indicates that the RPD between the two analytical columns is greater than 40%.
NSC = Qualifier indicates that spike recoveries were not calculated based on the spiking concentration.

Result Symbol Definitions:

DL = The smallest analyte concentration that can be demonstrated to be different from zero or a blank concentration at the 99% level of confidence.
LOD = The smallest analyte concentration that must be present in a sample in order to be detected at a high level of confidence.
LOQ = The lowest concentration that produces a quantitative result within specified limits of precision or bias.

Sample Receipt

Samples arrived at ALS via courier on August 8, 2012. Upon receipt, the samples were inspected and compared to the Chain of Custody. Sample temperature was documented on the enclosed Chain of Custody. Samples were received intact and properly preserved, unless noted on the enclosed Certificate of Analysis and/or Chain of Custody. Please note that sample FTSW-IDW-01 (9981774003) was cancelled per client request.

Subcontracting

Two (2) samples were subcontracted for Method 8270/8321 analysis. Results are provided at the end of this report.

Totals Metals by SW-846 Method 6020A

Sample handling. Two (2) solid samples were digested and analyzed for total metals on the Agilent 7700x using SW-846 Method 6020A. The samples were analyzed within the six-month holding time established for this method.

Calibration. All criteria associated with the calibration were within method control limits.

Blanks. Metals were not detected in the blanks.

Laboratory Control Samples. Recoveries were within method control limits.

Matrix Spike/Matrix Spike Duplicate. A matrix spike and matrix spike duplicate were performed on a sample not in this data deliverable. The MS and MSD recoveries and their RPDs were within method control limits.

Total Solids by SM 2540G

Sample handling. Two (2) solid samples were analyzed for total solids by Standard Method 2540G for dry weight reporting purposes. The samples were analyzed within the 14-day method recommended hold time for dry weight reporting.

Thank you for shipping online with FedEx ShipManager at fedex.com.

Please Note

FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $500, e.g., jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits. Consult the applicable FedEx Service Guide for details.
The estimated shipping charge may be different than the actual charges for your shipment. Differences may occur based on actual weight, dimensions, and other factors. Consult the applicable FedEx Service Guide or the FedEx Rate Sheets for details on how shipping charges are calculated.

Vicki,

Hi. We've encountered another issue. Our field crew got confused on the sample nomenclature during the last days of sampling (we switched crews mid-way through). As a result, we request the following sample ID changes, please.

ID number from Lab	What ID Should be
FTSW-HR-SO - 5 (10)	FTSW-HR-SO-50 (10)
FTSW-HR-SO - 6 (10)	FTSW-HR-SO-51 (10)
FTSW-HR-SO - 8 (10)	FTSW-HR-SO-52 (10)
FTSW-HR-SO - 03 (10)	FTSW-HR-SO-53 (10)
FTSW-HR-SO - 12 (10)	FTSW-HR-SO-54 (10)
FTSW-HR-SO - 04 (7.5)	FTSW-HR-SO-55 (07.5)
FTSW-HR-SO - 09 (10)	FTSW-HR-SO-56 (10)
FTSW-HR-SO - 10 (10)	FTSW-HR-SO-57 (10)
FTSW-HR-SO - 11 (10)	FTSW-HR-SO-58 (10)
FTSW-HR-SO - 13 (10)	FTSW-HR-SO-59 (10)
FTSW-HR-SO - 14 (7.5)	FTSW-HR-SO-60 (07.5)
FTSW-HR-SO - 14 ERB	FTSW-HR-SO-60 (07.5) ERB
FTSW-HR-SO-15 (9.5)	FTSW-HR-SO-61 (09.5)
FTSW-HR-SO-16 (10)	FTSW-HR-SO-62 (10)

Sorry for the inconveniences, and I really appreciate your responsiveness.

Thank you,

Michael Gearheart
ERT, Inc.

Can you call me regarding this requested change? We really should have more volume to complete that testing and one of the containers broke in transit. Thanks.

Vicki,

The sample labeled as IDW (Lab ID 9981774003) should not be analyzed for what's listed on the sample login sheet (and what's on the COC). This sample should be analyzed for full TCLP parameters and RCRA Characteristics. This sample is for disposal characterization. Could you please make the change?

Thank you,

Michael Gearheart

Project Name:	**Ft. Stewart GA project**	Workorder:	**9981774**
Purchase Order:		Workorder ID:	**ERT008|Ft. Stewart 3153-004**

Dear Mr. Gearhart,

Enclosed are the analytical results for samples received by the laboratory on Wednesday, August 08, 2012.

The ALS Environmental laboratory in Middletown, Pennsylvania (formerly Analytical Laboratory Services, Inc.) is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Vicki Forney (Project Coordinator) or Anna G Milliken (Technical Manager) at (717) 944-5541.

Please visit us at www.analyticallab.com for a listing of ALS' NELAP accreditations and Scope of Work, as well as other links to Water Quality documentation on the internet.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Environmental.

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Anna G Milliken
Technical Manager

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are performed in the laboratory and are therefore analyzed out of hold time.

Standard Acronyms/Flags

J, B	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference

Client: ALS Laboratory Group
Project Manager: Kevin W. Griffiths

General Lab Comments

The results provided in this report relate only to the items tested.
Samples were received in acceptable condition unless otherwise noted.
Samples have not been blank corrected unless otherwise noted.
This test report shall not be reproduced, except in full, without written approval of ALS.

ALS provides professional analytical services for all samples submitted. ALS is not in a position to interpret the data and assumes no responsibility for the quality of the samples submitted.

All quality control samples processed with the samples in this report yielded acceptable results unless otherwise noted.

ALS is accredited for specific fields of testing (scopes) in the following testing sectors. The quality system implemented at ALS conforms to accreditation requirements and is applied to all analytical testing performed by ALS. The following table lists testing sector, accreditation body, accreditation number and website. Please contact these accrediting bodies or your ALS project manager for the current scope of accreditation that applies to your analytical testing.

Result Symbol Definitions

MDL = Method Detection Limit, a statistical estimate of method/media/instrument sensitivity.
RL = Reporting Limit, a verified value of method/media/instrument sensitivity.
CRDL = Contract Required Detection Limit
Reg. Limit = Regulatory Limit.
ND = Not Detected, testing result not detected above the MDL or RL.
< This testing result is less than the numerical value.
** No result could be reported, see sample comments for details.

Qualifier Symbol Definitions

U = Qualifier indicates that the analyte was not detected above the MDL.
J = Qualifier indicates that the analyte value is between the MDL and the RL. It is also used to indicate an estimated value for tentatively identified compounds in mass spectrometry where a 1:1 response is assumed.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds calibration range.
P = Qualifier indicates that the RPD between the two columns is greater than 40%.

Case Narrative

Method: ALS-LC/MS
Analysis: Agent Breakdown Products
ALS WO ID(s): 1222142

Client: ALS Laboratory Group
Account: 08001
Matrix: Soil
HBN #: 92002

General Set Information: There were 11 field samples in this workorder. The samples were analyzed for thiodiglycol (TDG).

Method Summary: Each sample was prepared as noted below and analyzed using an Agilent 1200 LC/MSD system in select ion monitoring (SIM) mode at m/z 97, 125, 139, 146, 181, 105 and 113. ChemStation software was used for instrument control and data analysis.

Sample Preparation: Approximately 1.00g of each sample was weighed into a 15-mL centrifuge tube, and 9.9mL of ASTM Type II water was added to each tube. 100µL of internal standard solution was then added to each sample, bringing the total extract volume to 10mL. The samples were capped, vortexed, rotated for at least 30 minutes, and filtered with Phenomenex Phenex 0.45µm PES syringe filters.

Holding Times: Holding times were met for all samples.

Dilutions: No dilutions were necessary.

Method QC data: The method blank criteria were met. The method blanks (LMB 290920 & 290925) were less than 1/2 the RL of 0.5ug/g for all analytes. The recoveries for LCS 290921 & 290926 were within acceptable parameters.

MS/MSD Analysis: The matrix spikes and matrix spike duplicates were performed on parent samples 1222142001 & 1222167001. Recoveries and RPDs were within acceptable limits for all analytes.

Instrument QC: Instrument initial and continuing calibrations were performed in accordance with established procedures.

NC/CAR(s): None.

Sample Calculation: Samples were reported in µg/g. Results were calculated in µg/g by the equation (A)x(B)x(C)/(D),

where: A = Analyte concentration from the standard curve (µg/mL)
B = Dilution performed at time of analysis
C = Volume of extract (10mL)
D = Actual weight of sample aliquot (g)

Miscellaneous Comments: None.

Case Narrative

Method: ALS-LC/MS
Analysis: Agent Breakdown Products
ALS WO ID(s): 1222142

Client: ALS Laboratory Group
Account: 08001
Matrix: Water
HBN #: 91545

General Set Information: There was one field sample in this workorder. The sample was analyzed for thiodiglycol (TDG).

Method Summary: Each sample was prepared as noted below and analyzed using an Agilent 1200 LC/MSD system in select ion monitoring (SIM) mode at m/z 97, 125, 139, 146, 181, 105 and 113. ChemStation software was used for instrument control and data analysis.

Sample Preparation: 9.9mL of each sample was transferred into a 15-mL centrifuge tube. 100µL of an internal standard solution was then added to each sample. The samples were capped, vortexed, and filtered with Phenomenex Phenex 0.45µm PES syringe filters.

Holding Times: All samples were analyzed within holding times.

Dilutions: No dilutions were necessary.

Method QC data: The method blank criteria were met. The method blank (LMB 289537) was less than 1/2 the RL of 50ug/L for all analytes. The recovery for LCS 289538 was within acceptable limits.

MS/MSD Analysis: A matrix spike and matrix spike duplicate were performed on parent sample 1221555006, which was in the same analytical batch. The recovery and RPD were within acceptable parameters.

Instrument QC: Instrument initial and continuing calibrations were performed in accordance with established procedures.

NC/CAR(s): None were required for this set.

Sample Calculation: Samples were reported in µg/L. Results were calculated in µg/L by the equation (A)x(B)x(C),

where: A = Analyte concentration from the standard curve (µg/mL)
B = Dilution performed at time of analysis
C = Conversion factor from µg/mL to µg/L (1000)

Miscellaneous Comments: None.

Case Narrative

Method: 8270D
Analysis: Semivolatiles by GC/MS
SOP ref: OE-SW-3550, OE-SW-3510, OS-SW-8270D

Set ID: 1222142
Client: ALS Laboratory Group
Matrix: Soil and Water

General Set Information: There are twelve field samples plus MS/MSD in this reporting group.

Method Summary: This is a GC/MS method for determination of semivolatile organic compounds in soil and water according to the SW-846 Guidelines. Thirty grams of soil were extracted by sonication and then concentrated to final volume of 1.0 mL. One liter of water is extracted by separatory funnel and then concentrated to a final volume of 1.0 mL. The resulting extract is analyzed using an Agilent model 5975 GC/MS system with an electron impact ionization source and a quadrapole mass-filter detector.

Sample Preparation: All samples were prepared in accordance with method 3550 or 3510.

Holding Times: All preparation and analysis holding times were met for all samples.

Dilutions: None.

Method and Sample QC data: All target compounds were within recovery limits for the laboratory control sample. The method blank met the acceptance criteria with no target compounds detected above the reporting limit. All samples met pertinent internal standard area criteria. In some instances the latter-eluting internal standard areas were low due to a likely matrix effect, but the requested target analytes do not reference those internal standards. Most surrogate recoveries were within QC limits, but there were some low recoveries in the soil samples. With the large number of analytes reported by Method 8270, it is to be expected that occasional outliers will occur. Based on the rule of marginal exceedences, the ALS SOP makes allowances for the data to be considered acceptable with one base/neutral surrogate and one acid surrogate outside control limits; however, there were two samples having more than two base-neutral fractions outside control limits (1222142004 and 1222142005). Unfortunately, it was not possible to initiate a potential matrix-effect-confirming re-extraction within holding times. Of the six surrogates used in Method 8270, the two eluting closest to oxathiane and dithiane are 2-fluorophenol and phenol-d6, both of which were within limits in all samples. Based on acceptable recoveries of these two surrogates, it was determined that the data shall be reported without the need to perform an out-of-hold re-extraction for the non-pertinent surrogates.

MS/MSD Analysis: Matrix spiking was performed on Sample 1222142007 (FTSW-HR-SO-56(10)). There was not enough sample to perform matrix spiking on the water batch. All recoveries were within expected ranges.

Instrument QC: The instrument was tuned with 50 ng DFTPP. A six-point initial calibration curve was analyzed prior to sample analysis. The concentrations of the standards were: 5, 20, 35, 50, 65 and 80 µg/mL. A calibration verification standard at a concentration of 50 ug/mL was analyzed to verify instrument response against the initial calibration. The initial calibration and continuing calibration verification passed all method criteria.

Miscellaneous Comments: None.

Comments

Quality Control: SW 8270 - (HBN: 92093)

There were some surrogate recoveries below the QC limit. It was not possible to perform a potential matrix-effect-confirming re-extraction with holding times. Of the six surrogates specified in Method 8270, the two which are truly pertinent to the analtyes of interest (due to nearness in elution time) are 2-fluorophenol and phenol-d6. Recovery of these surrogates where within limits in all samples.

General Lab Comments

The results provided in this report relate only to the items tested.
Samples were received in acceptable condition unless otherwise noted.
Samples have not been blank corrected unless otherwise noted.
This test report shall not be reproduced, except in full, without written approval of ALS.

ALS provides professional analytical services for all samples submitted. ALS is not in a position to interpret the data and assumes no responsibility for the quality of the samples submitted.

All quality control samples processed with the samples in this report yielded acceptable results unless otherwise noted.

ALS is accredited for specific fields of testing (scopes) in the following testing sectors. The quality system implemented at ALS conforms to accreditation requirements and is applied to all analytical testing performed by ALS. The following table lists testing sector, accreditation body, accreditation number and website. Please contact these accrediting bodies or your ALS project manager for the current scope of accreditation that applies to your analytical testing.

Result Symbol Definitions

MDL = Method Detection Limit, a statistical estimate of method/media/instrument sensitivity.
RL = Reporting Limit, a verified value of method/media/instrument sensitivity.
CRDL = Contract Required Detection Limit
Reg. Limit = Regulatory Limit.
ND = Not Detected, testing result not detected above the MDL or RL.
< This testing result is less than the numerical value.
** No result could be reported, see sample comments for details.

Qualifier Symbol Definitions

U = Qualifier indicates that the analyte was not detected above the MDL.
J = Qualifier Indicates that the analyte value is between the MDL and the RL. It is also used to indicate an estimated value for tentatively identified compounds in mass spectrometry where a 1:1 response is assumed.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds calibration range.
P = Qualifier indicates that the RPD between the two columns is greater than 40%.

Comments

There were some surrogate recoveries below the QC limit. It was not possible to perform a potential matrix-effect-confirming re-extraction with holding times. Of the six surrogates specified in Method 8270, the two which are truly pertinent to the analtyes of interest (due to nearness in elution time) are 2-fluorophenol and phenol-d6. Recovery of these surrogates where within limits in all samples.

Subject: RE: Letter of Receipt for Workorder 9981774: Received 8/8/2012

Vicki,

Hi. We've encountered another issue. Our field crew got confused on the sample nomenclature during the last days of sampling (we switched crews mid-way through). As a result, we request the following sample ID changes, please.

ID number from Lab	What ID Should be
FTSW-HR-SO - 5 (10)	FTSW-HR-SO-50 (10)
FTSW-HR-SO - 6 (10)	FTSW-HR-SO-51 (10)
FTSW-HR-SO - 8 (10)	FTSW-HR-SO-52 (10)
FTSW-HR-SO - 03 (10)	FTSW-HR-SO-53 (10)
FTSW-HR-SO - 12 (10)	FTSW-HR-SO-54 (10)
FTSW-HR-SO - 04 (7.5)	FTSW-HR-SO-55 (07.5)

Can you call me regarding this requested change? We really should have more volume to complete that testing and one of the containers broke in transit. Thanks.

Vicki,

The sample labeled as IDW (Lab ID 9981774003) should not be analyzed for what's listed on the sample login sheet (and what's on the COC). This sample should be analyzed for full TCLP parameters and RCRA Characteristics. This sample is for disposal characterization. Could you please make the change?

Thank you,

Michael Gearheart
ERT, Inc.

Subject: Changes to samples you are receiving today from Ft. Stewart project

Today you should be receiving the resubmission of the soils that you received at 8 degrees C last week and this week. Can you please send me the receipt notification as soon as possible so I can verify that these were okay? We shipped a temperature blank in these coolers as well. Sample FTSW-HR-SO-14-ERB was not reshipped since it was a water. We shipped all the containers we had to you in the original shipment. Please proceed with analysis of that sample and note that it was received in the original batch and a 8 degrees C.

Also I am going to forward you an e-mail from my client (Mike Gearheart) since all the sample descriptions from the chains we resubmitted last night have now changed. Hopefully I can catch these before you log the new set into your computer system. Let me know if you have any questions. Thanks.

ALS Account #(s): 8001 Method: ALS LC/MS Matrix: Soil
Sequence: \\CHEM32\1\SEQUENCE\17AUG12-ABP-S.S
Prep Date: 08/14/2012 Analysis Date: 08/17/12 - 08/18/12
Prep/Analysis HBN #s: 91939/92002 Instrument LOD: 0.050µg/mL
Analyte: **Thiodiglycol (TDG)**
Reported MDL: See Report Reported LOD: See Report

SAMPLE PREPARATION: All ALS sample #'s agreed with field ID #'s. Approximately 1.00g of each sample was weighed into a 15-mL centrifuge tube, and 9.9mL of ASTM Type II water was added to each tube. 100µL of internal standard solution was then added to each sample, bringing the total extraction volume to 10.0mL. The samples were capped, vortexed, rotated for at least 30 minutes, and filtered with Pall 0.45µm Ion Chromatography Acrodiscs prior to analysis.

REAGENTS: Eluent A: 100% ASTM Type II water/0.1% glacial acetic acid.
Eluent B: 95% ACN/ 5% ASTM Type II water/0.1% glacial acetic acid.

HORIZON STANDARD(S): TDG (14169); MPA (14170); IMPA (14172); EMPA (14174); DIMP (14179)
All standards are at 1000µg/mL. Standards used to create calibration standards and those used for CCVs (target = 5.00µg/mL) and RLVS (target = 0.050µg/mL).
Internal Standard Solution: TDG-D8 (14177) at 100ug/mL.

CALIBRATION CURVE: Run 05/01/2012.
Raw data can be found in \\Alsltws013\DataReview\85766.

INSTRUMENT CONDITIONS: Samples were analyzed with an Agilent 1200 LC/MSD system, in positive SIM mode, monitoring m/z 97, 125, 139, 146, 181, 105 and 113.
Instrument ID: LCMS03 Run Time: 35.00 min. Flow Rate: 0.8mL/min Temp: 30°C
Output Gain: 3 Injection Volume: 10µL Fragmentor Voltage: 75 & 125
Column: Phenomenex Synergi Hydro-RP 4 micron (4.6 x 250mm) s/n: 245485-24

GRADIENT:

Time(min)	%Eluent A	%Eluent B
0.00	100.0	0.0
15.00	100.0	0.0
17.00	50.0	50.0
25.00	50.0	50.0
25.01	100.0	0.0

QC DATA: LMB/LCS **290920/21** & **290925/26** were run with the batch. 1.00g of washed sand (EMD Lot# 36211706) was prepared in the same manner as the samples. 20µl of Horizon QC standard 13383 was added to 10.0mL of sample preparation for the LCSs. Target = 20.0ug/g. ASTM Type II water was used for LMB extractions.

MS/MSD: MS/MSDs were performed on samples 1222142001 & 1222167001. 50µl of Horizon standard 14169 was added to 10.0mL of sample preparation. Spike target = 50.0µg/g.

COMMENTS: 1) Quantitation was done using m/z 105 for TDG. No confirmation ions were available for TDG. Results are reported in ug/g.
2) All CCV, LMB, LCS and MS/MSD results were within acceptable limits.

Certificate of Analysis

SIGMA-ALDRICH

Product Name	2,2'-Thiodiethanol, ≥99%
Product Number	166782
Product Brand	Aldrich
CAS Number	111-48-8
Molecular Formula	$S(CH_2CH_2OH)_2$
Molecular Weight	122.19

TEST	SPECIFICATION	LOT 11613AR RESULTS
APPEARANCE	COLORLESS LIQUID	COLORLESS LIQUID
INFRARED SPECTRUM	CONFORMS TO STRUCTURE.	CONFORMS TO STRUCTURE AND STANDARD AS ILLUSTRATED ON PAGE 276B OF EDITION I, VOLUME 1 OF "THE ALDRICH LIBRARY OF FT-IR SPECTRA".
GAS LIQUID CHROMATOGRAPHY	99.0% (MINIMUM)	99.6 %
QUALITY CONTROL ACCEPTANCE DATE		JANUARY 1997

Barbara Rajzer, Supervisor
Quality Control
Milwaukee, Wisconsin USA

Calibration Table

Agent Breakdown Products

Calib. Data Modified : 7/9/2012 11:13:05 AM

Calculate : Internal Standard
Based on : Peak Area

Rel. Reference Window : 10.000 %
Abs. Reference Window : 0.000 min
Rel. Non-ref. Window : 10.000 %
Abs. Non-ref. Window : 0.000 min
Use Multiplier & Dilution Factor with ISTDs
Uncalibrated Peaks : not reported
Partial Calibration : No recalibration if peaks missing

Curve Type : Quadratic (some peaks differ, see below)
Origin : Ignored (some peaks differ, see below)
Weight : Linear (Amnt) (some peaks differ, see below)

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

Calibration Report Options :
Printout of recalibrations within a sequence:
Calibration Table after Recalibration
Normal Report after Recalibration
If the sequence is done with bracketing:
Results of first cycle (ending previous bracket)

Default Sample ISTD Information (if not set in sample table):

ALS WO ID #(S):1221555; 1221656; 1222142
ALS Sample #(S):1221555006; 1221656017; 1222142012
ALS Account #(s): 8001 Method: ALS LC/MS Matrix: Water
Sequence: \\CHEM32\1\SEQUENCE\13AUG12-ABP.S
Prep Date: 08/13/2012 Analysis Date: 08/13/2012
HBN #: 91545 Instrument LOD: 0.050µg/mL
Analyte: **Thiodiglycol (TDG)**
Reported MDL: See Report Reported LOD: 50µg/L

SAMPLE PREPARATION: All ALS sample #'s agreed with field ID #'s. Samples were prepared by TTM. 9.9mL of each sample was transferred into a 15-mL centrifuge tube. 100µL of an internal standard solution was then added to each sample. The samples were capped, vortexed, and filtered with Phenex 0.45µm PES filters prior to analysis.

REAGENTS: Eluent A: 100% ASTM Type II water/0.1% glacial acetic acid.
Eluent B: 95% ACN/ 5% ASTM Type II water/0.1% glacial acetic acid.

HORIZON STANDARD(S): TDG (14169); MPA (14170); IMPA (14172); EMPA (14174); DIMP (14179)
All standards are at 1000µg/mL. Standards used to create calibration standards and those used for CCVs (target = 5.00µg/mL) and RLVS (target = 0.050µg/mL).
Internal Standard Solution: TDG-D8 (14177) at 100ug/mL.

CALIBRATION CURVE: Run 03/05/2012.
Raw data can be found in \\Alsltws013\DataReview\82050

INSTRUMENT CONDITIONS: Samples were analyzed with an Agilent 1200 LC/MSD system, in positive SIM mode, monitoring m/z 97, 125, 139, 146, 181, 105 and 113.
Instrument ID: LCMS03 Run Time: 35.00 min. Flow Rate: 0.8mL/min Temp: 30°C
Output Gain: 3 Injection Volume: 10µL Fragmentor Voltage: 75 & 125
Column: Phenomenex Synergi Hydro-RP 4 micron (4.6 x 250mm) s/n: 245485-24

GRADIENT:

Time(min)	%Eluent A	%Eluent B
0.00	100.0	0.0
15.00	100.0	0.0
17.00	50.0	50.0
25.00	50.0	50.0
25.01	100.0	0.0

QC DATA: 20µl of Horizon QC standard 13383 were used to spike LCS 289538; target = 2000µg/L. ASTM type II water was used for LMB 289537.

MS/MSD: MS/MSD was performed on sample 1221555006. 50µl of Horizon standard 14169 was added to 10.0mL of sample preparation. Spike target = 5000µg/L.

COMMENTS: 1) Quantitation was done using m/z 105 for TDG. No confirmation ions were available for TDG. Results are reported in ug/L.
2) All CCV, Blank, LCS and MS/MSD results were within acceptable limits.

3824

Certificate of Analysis

SIGMA-ALDRICH

Product Name	2,2'-Thiodiethanol, ≥99%
Product Number	166782
Product Brand	Aldrich
CAS Number	111-48-8
Molecular Formula	$S(CH_2CH_2OH)_2$
Molecular Weight	122.19

TEST	SPECIFICATION	LOT 11613AR RESULTS
APPEARANCE	COLORLESS LIQUID	COLORLESS LIQUID
INFRARED SPECTRUM	CONFORMS TO STRUCTURE.	CONFORMS TO STRUCTURE AND STANDARD AS ILLUSTRATED ON PAGE 276B OF EDITION I, VOLUME 1 OF "THE ALDRICH LIBRARY OF FT-IR SPECTRA".
GAS LIQUID CHROMATOGRAPHY	99.0% (MINIMUM)	99.6 %
QUALITY CONTROL ACCEPTANCE DATE		JANUARY 1997

Sigma-Aldrich guarantees the 'Sales-Specification' values only, additional lot specific tests may be included for further information. The current 'Sales-Specifications' sheet is available on request. For further inquiries, please contact our Technical Service.Sigma-Aldrich warrants, that its products conform to the information contained in this and other Sigma-Aldrich publications. Purchaser must determine the suitability of the product for its particular use. See reverse side of invoice for additional terms and conditions of sale. The values given on the 'Certificate of Analysis' are the results determined at the time of analysis.

Calibration Table

Agent Breakdown Products

Calib. Data Modified : 7/9/2012 11:13:05 AM

Calculate : Internal Standard
Based on : Peak Area

Rel. Reference Window : 10.000 %
Abs. Reference Window : 0.000 min
Rel. Non-ref. Window : 10.000 %
Abs. Non-ref. Window : 0.000 min
Use Multiplier & Dilution Factor with ISTDs
Uncalibrated Peaks : not reported
Partial Calibration : No recalibration if peaks missing

Curve Type : Quadratic (some peaks differ, see below)
Origin : Ignored (some peaks differ, see below)
Weight : Linear (Amnt) (some peaks differ, see below)

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

Calibration Report Options :
Printout of recalibrations within a sequence:
Calibration Table after Recalibration
Normal Report after Recalibration
If the sequence is done with bracketing:
Results of first cycle (ending previous bracket)

Default Sample ISTD Information (if not set in sample table):

Sample Management

This report contains the results of the analysis of one (1) water sample and eleven (11) solid samples collected on August 3 and 6, 2012. Analytical results and quality control information are summarized in this data package.

Qualifier Symbol Definitions:

U = Qualifier indicates that the analyte was not detected above the LOD.
J = Qualifier indicates that the analyte value is between the DL and the LOQ.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds the calibration range.
P = Qualifier indicates that the RPD between the two analytical columns is greater than 40%.
NSC = Qualifier indicates that spike recoveries were not calculated based on the spiking concentration.

Result Symbol Definitions:

DL = The smallest analyte concentration that can be demonstrated to be different from zero or a blank concentration at the 99% level of confidence.
LOD = The smallest analyte concentration that must be present in a sample in order to be detected at a high level of confidence.
LOQ = The lowest concentration that produces a quantitative result within specified limits of precision or bias.

Sample Receipt

Samples arrived at ALS via courier on August 7, 2012. Upon receipt, the samples were inspected and compared to the Chain of Custody. Sample temperature was documented on the enclosed Chain of Custody. Samples were received intact and properly preserved, unless noted on the enclosed Certificate of Analysis and/or Chain of Custody.

Subcontracting

Twelve (12) samples were subcontracted for Method 8270/8321 analysis. Results are provided at the end of this report.

Totals Metals by SW-846 Method 6020A

Sample handling. One (1) water sample was analyzed for total metals on the Agilent 7700x using SW-846 Method 6020A. The sample was analyzed within the six-month holding time established for this method.

Calibration. All criteria associated with the calibration were within method control limits.

Blanks. Metals were not detected in the blanks.

Laboratory Control Samples. Recoveries were within method control limits.

Matrix Spike/Matrix Spike Duplicate. A matrix spike and matrix spike were performed on sample FTSW-HR-SO-60 (07.5) ER (9981496012) in this data deliverable. The MS and MSD recoveries and their RPDs were within method control limits.

Totals Metals by SW-846 Method 6020A

Sample handling. Eleven (11) solid samples were digested and analyzed for total metals on the Agilent 7700x using SW-846 Method 6020A. The samples were analyzed within the six-month holding time established for this method.

Calibration. All criteria associated with the calibration were within method control limits.

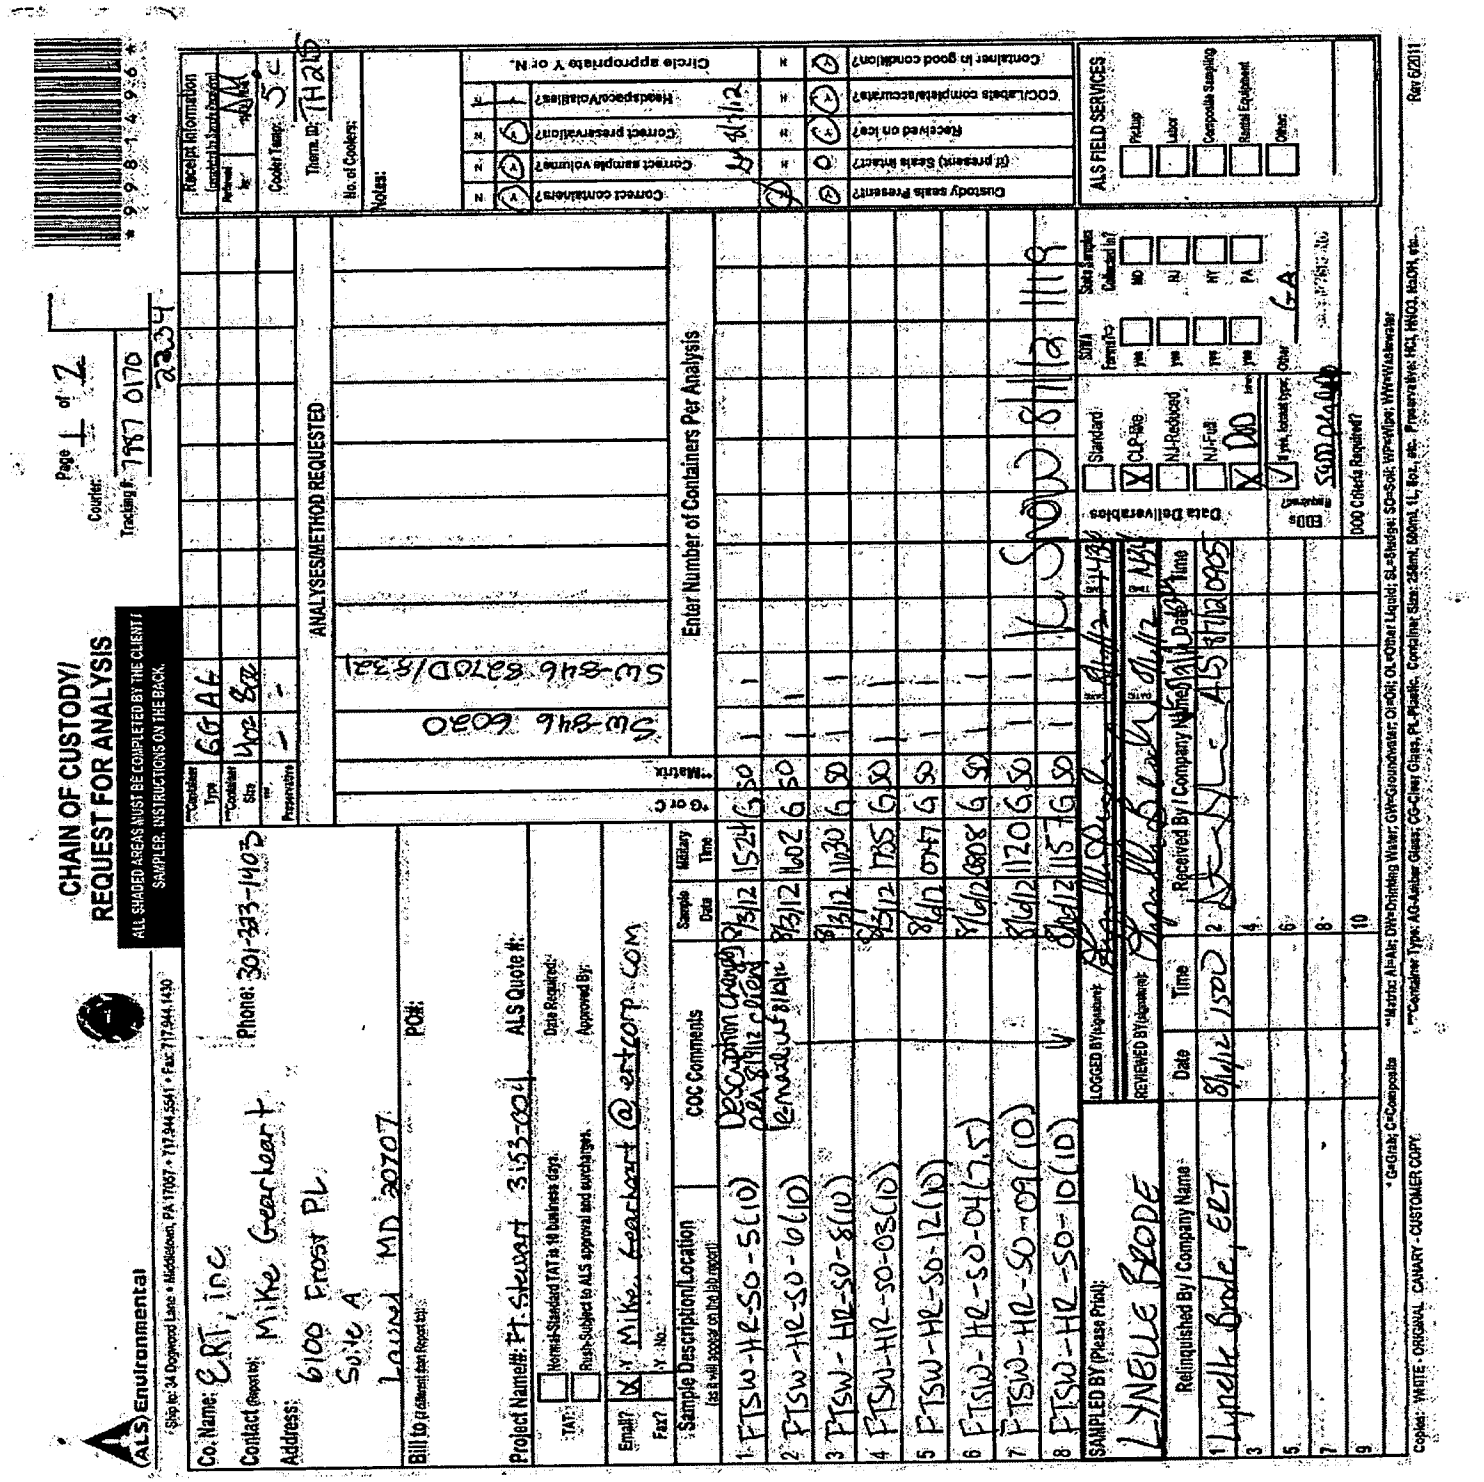
Blanks. Metals were not detected in the blanks.

Laboratory Control Samples. Recoveries were within method control limits.

Matrix Spike/Matrix Spike Duplicate. A matrix spike and matrix spike duplicate were performed on sample FTSW-HR-SO-53 (10) (9981496004) in this data deliverable. The MS and MSD recoveries and their RPDs were within method control limits.

Total Solids by SM 2540G

Sample handling. Eleven (11) solid samples were analyzed for total solids by Standard Method 2540G for dry weight reporting purposes. The samples were analyzed within the 14-day method recommended hold time for dry weight reporting.



Duplicate. A duplicate analysis, identified as 1019896, was performed on sample 9981496006 (FTSW-HR-SO-55 (07.5)). The relative percent difference between the results was within the QC limit of 5%.

ALSI Corrective Action Report (CAR)

To be Completed by Laboratory and Submitted to Customer Service:

Date: 8/31/12 CAR Submitted By: LW
Dept: SR Supervisor:

Chain of Custody No.(s): 9981496012-A

Problem/Reason for Corrective Action:

- ___ Login Error (2nd reviewed by: _____)
- X Incorrect Preservative
- ___ Missed Holding Time
- ___ Calibration failure
- ___ QC failure due to sample matrix
- ___ QC failure NOT due to sample matrix
- ___ Sample Lost in process
- ___ Reporting Error
- ___ Other _____

Method:

Explanation of Problem: Sample NOT preserved.

Signature(s) where Applicable:
Analyst: LW
1st Review: _____
2nd Review: _____
Result Entered By: _____
Result Approved By: _____
Supervisor: _____

Immediate Corrective Action Taken: LW By: 8/31/12 Date: 12R
Preserved w/ 2ml HNO3.
C138606

Are there policies/procedures in place to prevent this from occurring? Yes ___ No ___ Not Applicable ___
If Yes, What is the procedure, and why didn't it work?

If No, What procedure is needed to prevent this from occurring?
Target Date for Implementation: _____
Person Responsible for Implementation: _____

Customer Service Rep. Notified: _____ Date: _____

To be Completed by Customer Service and submitted to QA:

Date: _____ Customer Service Rep.: _____
Client Contacted? Yes ___ No ___:
Date: _____ Person: _____
Project(s) / Client(s) involved:

Action Taken (if no action taken, explain why):

Laboratory Notified of Client Response? Yes: ___ No ___ Not Applicable ___

To be Completed by QA and filed:

Was action taken appropriate? Yes ___ No ___
Is further action necessary? Yes ___ No ___
If Yes, What action is needed?

Date: _____
QA Initials: _____

Modification of SOP needed? Yes ___ No ___
If Yes, What is the procedure?
Has it been instituted? Yes: ___ No ___

Please Note
FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $500, e.g., jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits. Consult the applicable FedEx Service Guide for details.
The estimated shipping charge may be different than the actual charges for your shipment. Differences may occur based on actual weight, dimensions, and other factors. Consult the applicable FedEx Service Guide or the FedEx Rate Sheets for details on how shipping charges are calculated.

Follow Up Flag: Follow up
Flag Status: Flagged

Vicki,

Hi. We've encountered another issue. Our field crew got confused on the sample nomenclature during the last days of sampling (we switched crews mid-way through). As a result, we request the following sample ID changes, please.

ID number from Lab	What ID Should be
FTSW-HR-SO - 5 (10)	FTSW-HR-SO-50 (10)
FTSW-HR-SO - 6 (10)	FTSW-HR-SO-51 (10)
FTSW-HR-SO - 8 (10)	FTSW-HR-SO-52 (10)
FTSW-HR-SO - 03 (10)	FTSW-HR-SO-53 (10)
FTSW-HR-SO - 12 (10)	FTSW-HR-SO-54 (10)
FTSW-HR-SO - 04 (7.5)	FTSW-HR-SO-55 (07.5)
FTSW-HR-SO - 09 (10)	FTSW-HR-SO-56 (10)
FTSW-HR-SO - 10 (10)	FTSW-HR-SO-57 (10)
FTSW-HR-SO - 11 (10)	FTSW-HR-SO-58 (10)
FTSW-HR-SO - 13 (10)	FTSW-HR-SO-59 (10)
FTSW-HR-SO - 14 (7.5)	FTSW-HR-SO-60 (07.5)
FTSW-HR-SO - 14 ERB	FTSW-HR-SO-60 (07.5) ERB
FTSW-HR-SO-15 (9.5)	FTSW-HR-SO-61 (09.5)
FTSW-HR-SO-16 (10)	FTSW-HR-SO-62 (10)

Sorry for the inconveniences, and I really appreciate your responsiveness.

Thank you,

Michael Gearheart
ERT, Inc.

Subject: RE: Letter of Receipt for Workorder 9981774: Received 8/8/2012

Can you call me regarding this requested change? We really should have more volume to complete that testing and one of the containers broke in transit. Thanks.

Subject: FW: Letter of Receipt for Workorder 9981774: Received 8/8/2012

Vicki,

The sample labeled as IDW (Lab ID 9981774003) should not be analyzed for what's listed on the sample login sheet (and what's on the COC). This sample should be analyzed for full TCLP parameters and RCRA Characteristics. This sample is for disposal characterization. Could you please make the change?

Thank you,

Michael Gearheart
ERT, Inc.

Certificate of Analysis

Project Name:	**Ft. Stewart GA project**	Workorder:	**9981496**
Purchase Order:		Workorder ID:	**ERT007|Ft. Stewart 3153-004**

Dear Mr. Gearhart,

Enclosed are the analytical results for samples received by the laboratory on Tuesday, August 07, 2012.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Vicki Forney (Project Coordinator) or Anna G Milliken (Technical Manager) at (717) 944-5541.

Please visit us at www.analyticallab.com for a listing of ALS' NELAP accreditations and Scope of Work, as well as other links to Water Quality documentation on the internet.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Environmental.

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Anna G Milliken
Technical Manager

Notes

-- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
-- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
-- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
-- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
-- The Chain of Custody document is included as part of this report.
-- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
-- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are performed in the laboratory and are therefore analyzed out of hold time.

Standard Acronyms/Flags

J, B	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference

INORGANIC ANALYSIS DATA PACKAGE

Client: ERT Earth Resources Technology, Inc

SDG No.: ERT-007 Method Type: 6020 3051 SOW No.:

Contract: ERT007|Ft. Stewart 3 Lab Code: CAS Case No.: SAS No.:

Lab Sample ID	Client Sample ID	QC Description
9981496001	FTSW-HR-SO-50 (10)	
9981496002	FTSW-HR-SO-51 (10)	
9981496003	FTSW-HR-SO-52 (10)	
9981496004	FTSW-HR-SO-53 (10)	
9981496004S	FTSW-HR-SO-53 (10)S	Matrix Spike
9981496004SD	FTSW-HR-SO-53 (10)SD	Matrix Spike Duplicate
9981496005	FTSW-HR-SO-54 (10)	
9981496006	FTSW-HR-SO-55 (07.5)	
9981496007	FTSW-HR-SO-56 (10)	
9981496008	FTSW-HR-SO-57 (10)	
9981496009	FTSW-HR-SO-58 (10)	
9981496010	FTSW-HR-SO-59 (10)	
9981496011	FTSW-HR-SO-60 (07.5)	

Were ICP interelement corrections applied?	Yes/No	Yes	
Were ICP background corrections applied?	Yes/No	Yes	
If yes - were raw data generated before applications of background corrections?	Yes/No	No	

Comments:

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. Release of the data contained in this hardcopy data package and in the computer-readable data submitted on diskette has been authorized by the Laboratory Manager or the Manager's designee, as verified by the following signature.

Signature: Name: Lisa Miller

Date: Title: Metals Manager

Digestion Logbook

Microwave 3051 Prep (Soil) (Version 1 - 6/1/2010)

Batch: 37475	Queue: MDIG	HBN: 475719	RULE: D3051/6020	ALSI SOP: 09-3051
File Name: 37475_120813-140403			METHOD: SW3051	Microwave ID: MARS

COMMENTS:	Comment Codes:	Reagents:		Pipettes:		Start	Finish
	1. Sample failed initial digestion due to a weight loss >5g	HNO3:	L02030 JT BAKER		Date:	08/13/2012	08/13/2012
	2. Sample reacts with reagent	HCl:	K25031 MALLINCKRODT		Time:	14:20:00	14:41:00
	3. Less sample used due to high metal conten	Boiling Stones:	D1069103		Tech:	KMK	KMK
	4. Less sample used to result in successful microwave digestion				Reviewed/Approved By:		N/A
	5. Sample does not digest by microwave, digest by method 3050				Date:

Total Solids Summary Forms

Sample Description
FTSW-HR-SO-55 (07.5)

Form 7
Duplicate Summary

Analysis Method: 2540G
SDG No.: ERT-007

Matrix (soil/water): soil
Units: %
Instrument ID: N/A
GC Column: N/A
Sample % Moisture: N/A

Lab Sample ID: 9981496006
Lab File ID: N/A
Lab Sample Dup. ID: 1019896
Dup. Lab File ID: N/A
Dup. % Moisture: N/A

Analyte	Sample Concentration	Duplicate Concentration	Relative Percent Difference (RPD)	(1)	Acceptable Limit
Total Solids	78.4	77.0	1.8		5%

(1) The following qualifiers are used:
* : Values outside of acceptable limits

Comments:

Total Solids by SM 2540G

Sample handling. Eleven (11) solid samples were analyzed for total solids by Standard Method 2540G for dry weight reporting purposes. The samples were analyzed within the 14-day method recommended hold time for dry weight reporting.

Duplicate. A duplicate analysis, identified as 1019896, was performed on sample 9981496006 (FTSW-HR-SO-55 (07.5)). The relative percent difference between the results was within the QC limit of 5%.

Comments

Quality Control: SW 8270 - (HBN: 92093)

There were some surrogate recoveries below the QC limit. It was not possible to perform a potential matrix-effect-confirming re-extraction with holding times. Of the six surrogates specified in Method 8270, the two which are truly pertinent to the analytes of interest (due to nearness in elution time) are 2-fluorophenol and phenol-d6. Recovery of these surrogates where within limits in all samples.

Report Authorization

Method	Analyst	Peer Review
Chemical Agent Breakdown	Thomas T. McKay	Thomas J. Masolan
SW 8270	Reed A. Hendricks	Matt Garvin
Solids/Moisture Determination	Ilse J. Ovalle	Ashley Waganheim

General Lab Comments

The results provided in this report relate only to the items tested.
Samples were received in acceptable condition unless otherwise noted.
Samples have not been blank corrected unless otherwise noted.
This test report shall not be reproduced, except in full, without written approval of ALS.

ALS provides professional analytical services for all samples submitted. ALS is not in a position to interpret the data and assumes no responsibility for the quality of the samples submitted.

All quality control samples processed with the samples in this report yielded acceptable results unless otherwise noted.

ALS is accredited for specific fields of testing (scopes) in the following testing sectors. The quality system implemented at ALS conforms to accreditation requirements and is applied to all analytical testing performed by ALS. The following table lists testing sector, accreditation body, accreditation number and website. Please contact these accrediting bodies or your ALS project manager for the current scope of accreditation that applies to your analytical testing.

Testing Sector	Accreditation Body (Standard)	Certificate Number	Website
Environmental	ACLASS (DoD ELAP)	ADE-1420	http://www.aclasscorp.com

Result Symbol Definitions

MDL = Method Detection Limit, a statistical estimate of method/media/instrument sensitivity.
RL = Reporting Limit, a verified value of method/media/instrument sensitivity.
CRDL = Contract Required Detection Limit
Reg. Limit = Regulatory Limit.
ND = Not Detected, testing result not detected above the MDL or RL.
< This testing result is less than the numerical value.
** No result could be reported, see sample comments for details.

Qualifier Symbol Definitions

U = Qualifier indicates that the analyte was not detected above the MDL.
J = Qualifier indicates that the analyte value is between the MDL and the RL. It is also used to indicate an estimated value for tentatively identified compounds in mass spectrometry where a 1:1 response is assumed.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds calibration range.
P = Qualifier indicates that the RPD between the two columns is greater than 40%.

Case Narrative

Method: ALS-LC/MS
Analysis: Agent Breakdown Products
ALS WO ID(s): 1222167

Client: ALS Laboratory Group
Account: 08001
Matrix: Soil
HBN #: 92002

General Set Information: There were eight field samples in this workorder. The samples were analyzed for thiodiglycol (TDG).

Method Summary: Each sample was prepared as noted below and analyzed using an Agilent 1200 LC/MSD system in select ion monitoring (SIM) mode at m/z 97, 125, 139, 146, 181, 105 and 113. ChemStation software was used for instrument control and data analysis.

Sample Preparation: Approximately 1.00g of each sample was weighed into a 15-mL centrifuge tube, and 9.9mL of ASTM Type II water was added to each tube. 100µL of internal standard solution was then added to each sample, bringing the total extract volume to 10mL. The samples were capped, vortexed, rotated for at least 30 minutes, and filtered with Phenomenex Phenex 0.45µm PES syringe filters.

Holding Times: Holding times were met for all samples.

Dilutions: No dilutions were necessary.

Method QC data: The method blank criteria were met. The method blanks (LMB 290920 & 290925) were less than 1/2 the RL of 0.5ug/g for all analytes. The recoveries for LCS 290921 & 290926 were within acceptable parameters.

MS/MSD Analysis: The matrix spikes and matrix spike duplicates were performed on parent samples 1222142001 & 1222167001. Recoveries and RPDs were within acceptable limits for all analytes.

Instrument QC: Instrument initial and continuing calibrations were performed in accordance with established procedures.

NC/CAR(s): None.

Sample Calculation: Samples were reported in µg/g. Results were calculated in µg/g by the equation (A)x(B)x(C)/(D),

where: A = Analyte concentration from the standard curve (µg/mL)
B = Dilution performed at time of analysis
C = Volume of extract (10mL)
D = Actual weight of sample aliquot (g)

Miscellaneous Comments: None.

August 20, 2012

Thomas T. McKay Date

Case Narrative

Method: 8270D
Analysis: Semivolatiles by GC/MS
SOP ref: OE-SW-3550, OS-SW-8270D

Set ID: 1222167
Client: ALS Laboratory Group
Matrix: Soil

General Set Information: There are ten field samples plus MS/MSD in this reporting group.

Method Summary: This is a GC/MS method for determination of semivolatile organic compounds in soil according to the SW-846 Guidelines. Thirty grams of soil were extracted by sonication and then concentrated to final volume of 1.0 mL. The resulting extract is analyzed using an Agilent model 5975 GC/MS system with an electron impact ionization source and a quadrapole mass-filter detector.

Sample Preparation: All samples were prepared in accordance with method 3550.

Holding Times: All preparation and analysis holding times were met for all samples.

Dilutions: None.

Method and Sample QC data: All target compounds were within recovery limits for the laboratory control sample. The method blank met the acceptance criteria with no target compounds detected above the reporting limit. All samples met pertinent internal standard area criteria. Sample 1222167001 (FTSW-HR-SO-43) had low area of the last internal standard. The MS and MSD had the same result and therefore confirmed that this is a matrix effect. This last internal standard is not pertinent to that analysis because the requested target analytes do not reference that internal standard. All surrogate recoveries were within QC limits.

MS/MSD Analysis: Matrix spiking was performed on Sample 1222167001. All recoveries were within expected ranges.

Instrument QC: The instrument was tuned with 50 ng DFTPP. A six-point initial calibration curve was analyzed prior to sample analysis. The concentrations of the standards were: 5, 20, 35, 50, 65 and 80 µg/mL. A calibration verification standard at a concentration of 50 ug/mL was analyzed to verify instrument response against the initial calibration. The initial calibration and continuing calibration verification passed all method criteria.

Miscellaneous Comments: None.

General Lab Comments

The results provided in this report relate only to the items tested.
Samples were received in acceptable condition unless otherwise noted.
Samples have not been blank corrected unless otherwise noted.
This test report shall not be reproduced, except in full, without written approval of ALS.

ALS provides professional analytical services for all samples submitted. ALS is not in a position to interpret the data and assumes no responsibility for the quality of the samples submitted.

All quality control samples processed with the samples in this report yielded acceptable results unless otherwise noted.

ALS is accredited for specific fields of testing (scopes) in the following testing sectors. The quality system implemented at ALS conforms to accreditation requirements and is applied to all analytical testing performed by ALS. The following table lists testing sector, accreditation body, accreditation number and website. Please contact these accrediting bodies or your ALS project manager for the current scope of accreditation that applies to your analytical testing.

Result Symbol Definitions

MDL = Method Detection Limit, a statistical estimate of method/media/instrument sensitivity.
RL = Reporting Limit, a verified value of method/media/instrument sensitivity.
CRDL = Contract Required Detection Limit
Reg. Limit = Regulatory Limit.
ND = Not Detected, testing result not detected above the MDL or RL.
< This testing result is less than the numerical value.
** No result could be reported, see sample comments for details.

Qualifier Symbol Definitions

U = Qualifier indicates that the analyte was not detected above the MDL.
J = Qualifier Indicates that the analyte value is between the MDL and the RL. It is also used to indicate an estimated value for tentatively identified compounds in mass spectrometry where a 1:1 response is assumed.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds calibration range.
P = Qualifier indicates that the RPD between the two columns is greater than 40%.

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.
Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com.FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery,misdelivery,or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim.Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental,consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss.Maximum for items of extraordinary value is $500, e.g. jewelry, precious metals, negotiable instruments and other items listed in our ServiceGuide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Analytical Documentation

ALS WO ID #(S):1222142; 1222167; 1222302
ALS Sample #(S):1222142001-011; 1222167001-008; 1222302001-002
ALS Account #(s): 8001 Method: ALS LC/MS Matrix: Soil
Sequence: \\CHEM32\1\SEQUENCE\17AUG12-ABP-S.S
Prep Date: 08/14/2012 Analysis Date: 08/17/12 - 08/18/12
Prep/Analysis HBN #s: 91939/92002 Instrument LOD: 0.050µg/mL
Analyte: **Thiodiglycol (TDG)**
Reported MDL: See Report Reported LOD: See Report

SAMPLE PREPARATION: All ALS sample #'s agreed with field ID #'s. Approximately 1.00g of each sample was weighed into a 15-mL centrifuge tube, and 9.9mL of ASTM Type II water was added to each tube. 100µL of internal standard solution was then added to each sample, bringing the total extraction volume to 10.0mL. The samples were capped, vortexed, rotated for at least 30 minutes, and filtered with Pall 0.45µm Ion Chromatography Acrodiscs prior to analysis.

REAGENTS: Eluent A: 100% ASTM Type II water/0.1% glacial acetic acid.
Eluent B: 95% ACN/ 5% ASTM Type II water/0.1% glacial acetic acid.

HORIZON STANDARD(S): TDG (14169); MPA (14170); IMPA (14172); EMPA (14174); DIMP (14179)
All standards are at 1000µg/mL. Standards used to create calibration standards and those used for CCVs (target = 5.00µg/mL) and RLVS (target = 0.050µg/mL).
Internal Standard Solution: TDG-D8 (14177) at 100ug/mL.

CALIBRATION CURVE: Run 05/01/2012.
Raw data can be found in \\Als1tws013\DataReview\85766.

INSTRUMENT CONDITIONS: Samples were analyzed with an Agilent 1200 LC/MSD system, in positive SIM mode, monitoring m/z 97, 125, 139, 146, 181, 105 and 113.
Instrument ID: LCMS03 Run Time: 35.00 min. Flow Rate: 0.8mL/min Temp: 30°C
Output Gain: 3 Injection Volume: 10µL Fragmentor Voltage: 75 & 125
Column: Phenomenex Synergi Hydro-RP 4 micron (4.6 x 250mm) s/n: 245485-24

GRADIENT:

Time(min)	%Eluent A	%Eluent B
0.00	100.0	0.0
15.00	100.0	0.0
17.00	50.0	50.0
25.00	50.0	50.0
25.01	100.0	0.0

QC DATA: LMB/LCS **290920/21** & **290925/26** were run with the batch. 1.00g of washed sand (EMD Lot# 36211706) was prepared in the same manner as the samples. 20µl of Horizon QC standard 13383 was added to 10.0mL of sample preparation for the LCSs. Target = 20.0ug/g. ASTM Type II water was used for LMB extractions.

MS/MSD: MS/MSDs were performed on samples 1222142001 & 1222167001. 50µl of Horizon standard 14169 was added to 10.0mL of sample preparation. Spike target = 50.0µg/g.

COMMENTS: 1) Quantitation was done using m/z 105 for TDG. No confirmation ions were available for TDG. Results are reported in ug/g.
2) All CCV, LMB, LCS and MS/MSD results were within acceptable limits.

QC RELEASE DATE	28/OCT/08	

E. Schwärzler

Edeltraud Schwärzler, Manager
Quality Control
Buchs, Switzerland

Sigma-Aldrich guarantees the 'Sales-Specification' values only, additional lot specific tests may be included for further information. The current 'Sales-Specifications' sheet is available on request. For further inquiries, please contact our Technical Service.Sigma-Aldrich warrants, that its products conform to the information contained in this and other Sigma-Aldrich publications. Purchaser must determine the suitability of the product for its particular use. See reverse side of invoice for additional terms and conditions of sale. The values given on the 'Certificate of Analysis' are the results determined at the time of analysis.

Calibration Table

Agent Breakdown Products

Calib. Data Modified : 7/9/2012 11:13:05 AM

Calculate : Internal Standard
Based on : Peak Area

Rel. Reference Window : 10.000 %
Abs. Reference Window : 0.000 min
Rel. Non-ref. Window : 10.000 %
Abs. Non-ref. Window : 0.000 min
Use Multiplier & Dilution Factor with ISTDs
Uncalibrated Peaks : not reported
Partial Calibration : No recalibration if peaks missing

Curve Type : Quadratic (some peaks differ, see below)
Origin : Ignored (some peaks differ, see below)
Weight : Linear (Amnt) (some peaks differ, see below)

Recalibration Settings:
Average Response : Average all calibrations
Average Retention Time: Floating Average New 75%

Calibration Report Options :
Printout of recalibrations within a sequence:
Calibration Table after Recalibration
Normal Report after Recalibration
If the sequence is done with bracketing:
Results of first cycle (ending previous bracket)

Default Sample ISTD Information (if not set in sample table):

Sample Management

This report contains the results of the analysis of eleven (11) solid samples collected on August 1 and 2, 2012. Analytical results and quality control information are summarized in this data package.

Qualifier Symbol Definitions:

U = Qualifier indicates that the analyte was not detected above the LOD.
J = Qualifier indicates that the analyte value is between the DL and the LOQ.
B = Qualifier indicates that the analyte was detected in the blank.
E = Qualifier indicates that the analyte result exceeds the calibration range.
P = Qualifier indicates that the RPD between the two analytical columns is greater than 40%.
NSC = Qualifier indicates that spike recoveries were not calculated based on the spiking concentration.

Result Symbol Definitions:

DL = The smallest analyte concentration that can be demonstrated to be different from zero or a blank concentration at the 99% level of confidence.
LOD = The smallest analyte concentration that must be present in a sample in order to be detected at a high level of confidence.
LOQ = The lowest concentration that produces a quantitative result within specified limits of precision or bias.

Sample Receipt

Samples arrived at ALS via courier on August 3, 2012. Upon receipt, the samples were inspected and compared to the Chain of Custody. Sample temperature was documented on the enclosed Chain of Custody. Samples were received intact and properly preserved, unless noted on the enclosed Certificate of Analysis and/or Chain of Custody.

Subcontracting

Eight (8) samples were subcontracted for Method 8270/8321 analysis. Results are provided at the end of this report.

Totals Metals by SW-846 Method 6020A

Sample handling. Eleven (11) solid samples were digested and analyzed for total metals on the Agilent 7700x using SW-846 Method 6020A. The samples were analyzed within the six-month holding time established for this method.

Calibration. All criteria associated with the calibration were within method control limits.

Blanks. Metals were not detected in the blanks.

Laboratory Control Samples. Recoveries were within method control limits.

Matrix Spike/Matrix Spike Duplicate. A matrix spike and matrix spike duplicate were performed on sample FTSW-HR-SO-45 (9981198003) in this data deliverable. The MS and MSD recoveries and their RPDs were within method control limits for all target analytes. The Aluminum concentration in the sample was greater than four times the spiking concentration; therefore, the spiked recoveries were not evaluated.

Total Solids by SM 2540G

Sample handling. Eleven (11) solid samples were analyzed for total solids by Standard Method 2540G for dry weight reporting purposes. The samples were analyzed within the 14-day method recommended hold time for dry weight reporting.

Duplicate. A duplicate analysis, identified as 1019216, was performed on sample 9980395009 (FTSW-AA-SO-30). The relative percent difference between the results was within the QC limit of 5%.

Certificate of Analysis

Project Name:	**Ft. Stewart GA project**	Workorder:	**9981198**
Purchase Order:		Workorder ID:	**ERT006|Ft. Stewart 3153-004**

Dear Mr. Gearhart,

Enclosed are the analytical results for samples received by the laboratory on Friday, August 03, 2012.

The ALS Environmental laboratory in Middletown, Pennsylvania is a National Environmental Laboratory Accreditation Program (NELAP) accredited laboratory and as such, certifies that all applicable test results meet the requirements of NELAP.

If you have any questions regarding this certificate of analysis, please contact Vicki Forney (Project Coordinator) or Anna G Milliken (Technical Manager) at (717) 944-5541.

Please visit us at www.analyticallab.com for a listing of ALS' NELAP accreditations and Scope of Work, as well as other links to Water Quality documentation on the internet.

This laboratory report may not be reproduced, except in full, without the written approval of ALS Environmental.

This page is included as part of the Analytical Report and must be retained as a permanent record thereof.

Anna G Milliken
Technical Manager

Notes

- Samples collected by ALS personnel are done so in accordance with the procedures set forth in the ALS Field Sampling Plan (20 - Field Services Sampling Plan).
- All Waste Water analyses comply with methodology requirements of 40 CFR Part 136.
- All Drinking Water analyses comply with methodology requirements of 40 CFR Part 141.
- Unless otherwise noted, all quantitative results for soils are reported on a dry weight basis.
- The Chain of Custody document is included as part of this report.
- All Library Search analytes should be regarded as tentative identifications based on the presumptive evidence of the mass spectra. Concentrations reported are estimated values.
- Parameters identified as "analyze immediately" require analysis within 15 minutes of collection. Any "analyze immediately" parameters not listed under the header "Field Parameters" are performed in the laboratory and are therefore analyzed out of hold time.

Standard Acronyms/Flags

J, B	Indicates an estimated value between the Method Detection Limit (MDL) and the Practical Quantitation Limit (PQL) for the analyte
U	Indicates that the analyte was Not Detected (ND)
N	Indicates presumptive evidence of the presence of a compound
MDL	Method Detection Limit
PQL	Practical Quantitation Limit
RDL	Reporting Detection Limit
ND	Not Detected - indicates that the analyte was Not Detected at the RDL
Cntr	Analysis was performed using this container
RegLmt	Regulatory Limit
LCS	Laboratory Control Sample
MS	Matrix Spike
MSD	Matrix Spike Duplicate
DUP	Sample Duplicate
%Rec	Percent Recovery
RPD	Relative Percent Difference
