Dear Colonel Perez:

        This is to acknowledge your letters, dated January 14, 1999 and March 23, 1999, that forwarded
a response to comments, and a revised site ranking form, for our review.

        We have conducted a technical review of the response to the comments. The basis for this
review is the CAP-A content referenced in paragraph 391-3-15-.11(3) of the Georgia Rules for
Underground Storage Tank Management (GUST Rules). The Georgia Environmental Protection
Division (EPD) has determined that, for the current release, **no further action is required for
contamination related to the subject location, at this time.**

        However, the site could be subject to corrective action in the future if mandated through more
stringent State or Federal statutory or regulatory changes, if drinking water systems are identified or
installed within two miles of the site, if surface water bodies are impacted by any dissolved
contamination, resulting from this release, or if previously unidentified soil contamination, dissolved
contamination and/or free product on groundwater are identified as originating from this site.

        If you have any questions, please contact the undersigned at (404)362-2687.

                                          Sincerely,

                                          Lisa L. Lewis
