SUBJECT: **Corrective Action Plan (CAP)-Part A Addendum #2 Review:**
Fort Stewart
Building 241
Ft. Stewart, Liberty County, GA
Facility ID: 9089045*1

Dear Colonel Stanley:

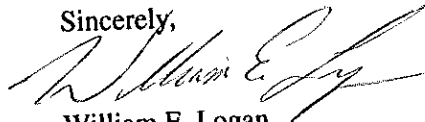

The Georgia Underground Storage Tank Management Program (USTMP) has received your letter, dated March 28, 2001, that forwarded a properly certified CAP-Part A Addendum #2. The report was prepared by Science Applications International Corporation.

✓ We have conducted a technical review of the CAP-Part A Addendum #2. The basis for this review is the Georgia Rules for Underground Storage Tank Management (GUST Rules, revised 1996). Our comments are outlined in the enclosure. Please amend the CAP-Part A to address these by **September 10, 2001**.

Unless one of the outlined EPD Comments requests otherwise, you are required to submit only your responses to these comments. Resubmittal of a complete CAP-Part A is not necessary.

If you have any questions, please contact me at (404) 362-2687.

Sincerely,

William E. Logan
Senior Geologist
Corrective Action Unit II

Corrective Action Plan (CAP)-Part A Addendum #2:

Fort Stewart

Building 241

Fort Stewart, Liberty County, GA

Facility ID: 9089045

August 10, 2001

1. The CAP- Part A Addendum #2, response to EPD comments dated June 19, 1999, is not acceptable. The addendum was also requested by July 16, 1999 but was not received until April 3, 2001. Please amend the CAP-A to propose a monitoring program which provides a sufficient number of monitoring wells within the down gradient plume to define the horizontal extent of contamination. The monitoring program should be at least one year in duration
2. There is conflicting information in the CAP-Part A stating groundwater flow direction is to the southeast and the CAP-Part A Addendum #2 stating groundwater flow is to the northeast. Please clarify.
3. Laboratory information provided does not state the analytical methods used and detection limits. Please provide.
