RE: Addendum for the DOL Maintenance Motor Pool and associated Oil/Water Separator [Solid Waste Management Unit (SWMU) 27H/Building 1071] dated March 2001 to the Phase II RCRA Facility Investigation (RFI) Report for Sixteen (16) SWMUs dated April 2000; Fort Stewart; EPA ID No. GA9 210 020 872.

Dear Colonel Stanley:

The Hazardous Waste Management Branch of the Georgia Environmental Protection Division (GA EPD) is in receipt of and has reviewed the above-referenced Addendum forwarded with correspondence (Stanley to Khaleghi) dated March 30, 2001. Based upon that review, GA EPD tentatively concurs with the Fort Stewart recommendation that No Further Action is warranted for the Oil/Water Separator located adjacent to an open maintenance pad identified as Building 1071. Please note that a final decision concerning the corrective action status of SWMU 27H/Building 1071 will be made by GA EPD through issuance of a Notice of Decision documenting modification of the Fort Stewart Hazardous Waste Facility Permit #HW-045(S&T) (Permit).

However, consistent with our Comment No. 5 in correspondence (Khaleghi to Perez) dated July 14, 1999; GA EPD will not separate this Oil/Water Separator from the one located east of Building 1056 by further subdividing SWMU 27H in Appendix A of your Permit. Please note that (1) the investigation results of the second Oil/Water Separator are documented in the Addendum for SWMU 27H/Building 1056 dated July 2000 and (2) GA EPD tentatively concurred with the Fort Stewart recommendation that No Further Action is warranted for the Oil/Water Separator located east of Building 1056 in correspondence (Khaleghi to Stanley) dated April 18, 2001. Should you have any questions concerning this correspondence, please contact Brent Rabon of my staff at (404)656-2833.

Sincerely,

*Andrew S. Taft*
