How do network engineers settle arguments?

They run a traceroute.

Submitted by Edward Burtle, Ft. Stewart Network Division Chief

SERNEC_ALL DISTRO LIST MEMBERSHIP TO BE AUTOMATED

The `sernec_all@army.mil` distribution list serves to disseminate information to all Southeast region personnel. However, it is a manual process usually placed on the RNEC division chiefs to add new users to the list and remove users who are no longer a part of the RNEC. The task to manually add/remove users is often overlooked and is just one more thing that people must remember to do. However, being a member of the distribution list is vital for receiving important information about the region (we know you don't want to miss any newsletters!).

The Information Operations V-Team is working a solution to automate the management of the distro. Members will be automatically added and removed to/from an A365 group, which will be a member of the distribution group itself. Users are managed based on their assigned division within the SharePoint Online master personnel list. Thus, it is vital for each member of the Southeast Region to be assigned to a V-Team and/or division. (You can check that you are assigned to a division by simply checking your PERSTAT entry and ensuring a division is listed under your name.) Note that users belonging to multiple divisions will be added to both division groups. This solution also allows for emailing all users within a specific division at one time using the respective A365 group email address.

Users may receive automated emails within the coming weeks stating that they've been added to a division A365 group. No action is required on the user's part. Information regarding group names and associated email addresses is to come.

REGIONAL SAFETY STANDDOWN

The Regional Safety Standdown meeting serves as a reminder to all Southeast Region NEC personnel to stay safe, especially during the holiday season. This time of year poses new and/or heightened danger, from deep frying turkeys and sliding on ice to increased traffic and wildlife on the roads.

Following the safety meeting, Goose Creek practiced safety and team building with axe throwing, while the Fort Stewart team played a few games of bowling! There were no known axe or bowling ball injuries from the day; our safety officers must be doing a great job. 😊

Thanks to our safety officers for reminding us "Safety First"!

In clockwise order starting with front left of table: Director Herbert Major, Kaylee Crouch, Sam Stevens, Chad Williams, Russell Masters, Nathan Sexsmith, Jason Lundy, Randy Cook, Taryn Hernandez from Rock Island Arsenal (RIA) (Vista Project Analyst), Brittney Benson from RIA (VDT Director), Mark Fuchs

Grant Okera, Fort Stewart Tier 2 Support V-Team member, becomes the reigning RNEC Bowling Champion after receiving the highest game score out of all RNEC bowlers! Grant says he learned to bowl from playing the Nintendo Wii bowling game as a kid. He has been with the RNEC for just over a year now and is originally from Brunswick, Georgia.

	1	2	3	4	5	6	7	8	9	10	20
