- **Present – 6 JUNE:** Rapid7 Nexpose Pilot
- **14 JUNE:** U.S. Army 250<sup>th</sup> Birthday
- **16 – 18 JUNE:** Senior Leadership Summit (SLS)
- **18 JUNE:** 93<sup>rd</sup> Sig Bde Change of Command
- **19 JUNE:** Juneteenth
- **25 JUNE:** 7<sup>th</sup> Sig Cmd Change of Command
- **26 JUNE:** Regional [IMO User Group Meeting](#)
- **22 JULY:** Fort Benning CSLA COMSEC Audit

## NOTEWORTHY

- Instructions to enable multi-screen on AVD found [HERE](#)
- *FAQ: How do I get to the RNEC SharePoint Online site?* There is a “SPO Site” tab in the General channel of the 93D\_SE\_REGION\_ALL Team (right next to the PERSTAT tab)! Simply open the tab and click the link!
- Congratulations to Sandra Resendiz and Kyle Testerman for completing the Knowledge Management Representative qualification course! They are the SE RNEC’s newest KMRs.
- Did you know... KMRs are partly responsible for documenting our region’s processes. Do you have a process that needs documented? Do you have a process that needs further refinement? Contact the [Info Ops V-Team](#) for assistance.
- Instructions to enable PrinterLogic browser extension in Microsoft Edge [HERE](#). Occasionally the extension is disabled by browser updates, prompting the user to install Edge-Chromium extension, despite the extension already having been installed. The extension is required to access **print.army.mil** to add printers to end user devices.

## NEW! IMO PLA DOCUMENT REPOSITORY

The RNEC has implemented a storage solution for IMOs’ required PLA documets in wake of the sunset of ATCTS. The application mimics that of the RNEC PLA Document Repository previously put into place for NEC personnel.

**Access the application and training videos [HERE!](#) The page is linked to the General tab of the Trusted Agents Team.**

- Personnel can only submit and access their own records.
- Personnel can review their own documents uploaded through the app.
- Personnel can delete their own records.
- The submitted documents are fully accessible by the Accounts Management V-Team.

## NEWS FEEDBACK

Story Submissions,  
Comments, Dad Jokes, &  
Special Recognition Requests

## SOUTHEAST DAD JOKE CORNER

Why do programmers prefer dark mode?

Because light attracts bugs!

Information Operations V-Team Lead*

## AUDS EXCEPTION GROUP

NASE users who have migrated to AUDS may be added to an exception group within Active Directory. The exception group will exempt users from being deleted from the NASE domain. This is needed, for example, when a user may want to use an MFD to Scan to Email where they must use their NASE account to log into the printer.

The root level of each Installation OU under the Southeast Region has an exception group. If you need to exempt your NASE account from being deleted in 7th SC's stale account query, simply submit a ServiceNow ticket to have it added to the applicable AUDS group “NASE GG SR [Installation] AUDS Migrated Users” (i.e., “NASE GG SR Stewart AUDS Migrated Users”).

All general users’ unclassified end-user devices should be migrated to AUDS by 1 June 2025. Find additional details in the EXORD [here](#).

View the Southeast Region’s AUDS migration progress [HERE](#). (The application is also linked to the SharePoint Online [Visitor Landing page](#) and is available Army-wide for read access.)

## GOOSE CREEK SAFETY STAND DOWN

power projection capabilities enabled by Army Prepositioned Stocks (APS). With upcoming operations and exercises supporting Pacific Pathways, the Army Field Support Battalion – Charleston is actively preparing APS-3, the Army’s unique afloat pre-positioned stock. This program enhances U.S. Army logistical support globally, allowing for rapid deployment and sustained operations in support of regional Combatant Commanders. The team’s continuous

The Goose Creek LNEC held their Safety Stand Down event, receiving valuable training on safety procedures. Following the brief, the team gained a deeper understanding of the organization they support and the critical

## PEO STRI MIGRATION EFFORT

Four members of the Southeast RNEC traveled to PEO-STRI in Orlando, Florida as part of a Proof of Concept visit.

During this visit, the goal was to show switches and workstations in PEO-STRI's SIPR environment could be successfully migrated to the Southeast Region's SIPR environment and bring them into compliance with STIG and CORA requirements.

The visit was a complete success with nearly half of PEO-STRI's SIPR environment being migrated to the Southeast Region. This included updating switches and TACLANES and re-imaging workstations. Many additional personnel who stayed back at Fort Stewart provided additional support such as creating user accounts and troubleshooting issues, for example.

A second visit is currently scheduled for early June to migrate the remainder of PEO-STRI's SIPR environment to bring them fully under the Southeast Region RNEC's SIPR ATO.

## HAPPY 250<sup>TH</sup> BIRTHDAY OF THE U.S. ARMY!

*“This we’ll defend.”*

Reginald Nash will serve as our representative from the Southeast RNEC to assist with LMR communications for the week-long celebration, including the Army birthday parade on 14 June. Civilians and military personnel will travel from all over to Washington D.C. to assist with the festivities and to celebrate U.S. Army excellence. Read more about it [here](#).
