NOTEWORTHY

- Provide feedback on the new Regional Document Center to Info Ops V-Team (sernec_infoops@army.mil)
- ALMS has been replaced with ATIS Learning, available 29 March 2024: ATIS FAQs Here
- Leave your machines on for the highest chance for MECM to push the Nessus Agent to your machines and achieve the CORA inspection standard of 98%
- Find v-team email addresses, team leads, and duty areas info HERE!
- CCB v2.0 in Beta phase. See info page HERE and continue to provide your feedback to Info Ops!

REIMAGING A COMPUTER

See the following document link for guidance and information that must occur as part of the reimaging effort: Reimaging Information Paper.docx

RENAMING WORKSTATIONS

Per Tier 2 V-Team, Fort Moore and Fort Novosel computer names should be renamed (especially in SIPR) to reflect the installation's new name. For example, Fort Novosel computers are now supposed to start with "NOVO" instead of "RUCK". Fort Moore computers are now supposed to start with "MOOE" instead of "BENN".

There are still a LOT of computers that have not been renamed. Please rename the computers using the correct naming convention.

SOUTHEAST DAD JOKE OF THE MONTH
What has 5 toes and isn't your foot?
Submitted by Jerome Giron, Ft. Stewart

My foot!

FAREWELL TO MR. MIKE FLATT

From left to right: Charles Smith, Mike Flatt, Stephen Giza

Co-workers and friends celebrated long-time RNEC employee Mr. Michael (Mike) Flatt to bid him farewell in retirement through a round a golf at Taylors Creek Golf Course. Mike has worked for the NEC since 1990 across multiple divisions and roles, including Business Division Chief and Network Branch Chief and made countless contributions to the Southeast region as a whole. Mike will be dearly missed by those with the privilege to have worked alongside him. Jerome Giron states,

"I met Mike Flatt back in April of 2012 which was only a few days after I started here. He is going to be a character that will be sadly missed. He had me thinking some people that work at the NEC need some help. He is a good person to be around when some craziness is happening. He will keep everyone entertained. He has been here long enough to know where all the dead bodies are buried. Those that know him will miss him at meetings. I wish the very best for him and will always be here if he ever needs anything."

LOOKING FOR YOUR A365 GROUPS?

If you're trying to find your A365 Groups, look no further than the lefthand side navigation pane in Outlook desktop or on the Web. You may have to scroll to the bottom of the navigation pane. Here, you can:

- View all A365 Groups that you are a member of (including your v-team group!)
- View group/v-team mailboxes
- Edit your group settings and membership (must be a group owner to edit group membership)
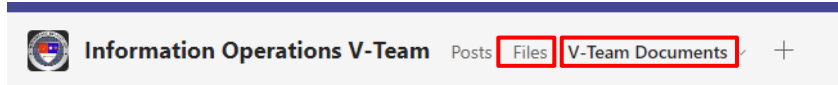

Want more info? See how to update your v-team A365 Group HERE.

FREQUENTLY ASKED QUESTIONS

Q: Why can't I upload to the "Files" tab in my V-Team Channel on Microsoft Teams?
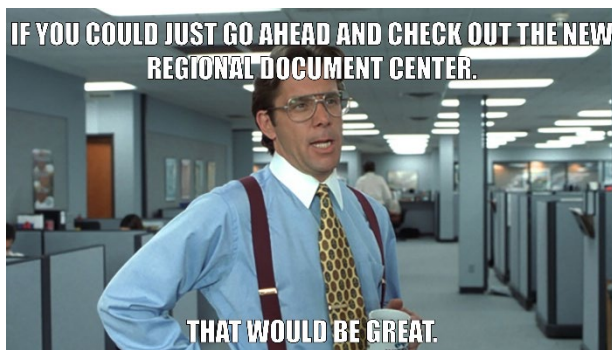

A: Because it is best practice to store team documents in SharePoint Online, there is limited access to the Files tab in Teams (the Files tab is there by default and cannot be removed completely). However, all v-team members should have access to the "**V-Team Documents**" tab, in which the files are stored in the main RNEC SharePoint Online site on the backend (so even if the team or channel is deleted, documents stored here are NOT consequently deleted!). The v-team channel simply serves as an interface to easily access these files under the V-Team Documents tab. You can also access your V-Team Documents from your v-team page on SharePoint Online.
For reference:

Q: Whose status can I update on the new Regional PERSTAT app?

A: General users can edit their own status, as well as the status for members of their own v-team at their respective installation. Supervisors and leadership may edit the status of their respective subordinates.
