

17

1 I mean I remember reading a story in 2002 about the -- I  
2 believe it was Vice President Chaney at the time, I don't -- you  
3 know, I don't know, but I read a story about in Buffalo, New  
4 York, they were considering sending in Delta Force on American  
5 citizens and when I read that I was like wow, this is -- I don't  
6 know, this is strange. And I really hope that, you know, we ha  
7 -- we as a country do not allow ourselves to become so paranoid  
8 that we find it necessary to use this technology on our own  
9 citizens because I -- everything that I've seen what's going on  
10 in the world, I don't see it getting any better. I don't see  
11 our economic situation getting any better. Europe is already  
12 desperately in need of help as far as the Euro is concerned and  
13 that's just going to come over here. So I mean there's a lot of  
14 potential for a lot of bad things to happen and I guess I'm just  
15 hoping and praying that these things are not abused 20, 30, 40  
16 years down the road, you know, when things do collapse here.

17 I mean take a look at Hurricane Katrina for example. You  
18 know, that was a natural disaster and you had cops, you know,  
19 pretty much well meaning people, I'm sure when they joined the  
20 force, you know, were shooting American citizens. And this was  
21 a natural disaster. This wasn't an economic collapse, this  
22 wasn't, you know, hey, I can't put gas in my car anymore because  
23 there's no more gas flowing. You know, this was a natural  
24 disaster so I can only imagine with all of this technology we  
25 have when our society does get to that point, you know, do we

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 have assurances that our own technology will not be turned on  
2 our own people. That's what frightens me about all of this.

3 As far as seeing this thing here about a helmet on the  
4 head of somebody sitting at a computer controlling drones, you  
5 know, is there going to be any psychological tests for the  
6 people who are controlling these drones? I mean what are the  
7 safeties? What are the stop gaps here?

8 As far as the socioeconomic impact on Alaska, I mean, you  
9 know, we've al -- we're -- I mean -- okay.

10 COLONEL ORR: Thank you. Hold that thought because I  
11 think you'll have more time later. All right? All right. The  
12 second speaker is Mr. Robert Mulford.

13 MR. MULFORD: My name is Robert Mulford, M-U-L-F-O-R-D.  
14 I'm a local organizer for Veterans for Peace. In the counsels  
15 of government we must guard against the acquisition of  
16 unwarranted influence, whether sought or unsought by the  
17 military industrial complex. The potential for the disastrous  
18 rise of misplaced power exists and will persist. We must never  
19 let the weight of combination endanger our liberties and  
20 democratic processes. We should take nothing for granted. Only  
21 alert and knowledgeable citizenry can compel the proper  
22 messaging of the huge industrial military machinery of defense  
23 with our peaceful methods and goals so that security and liberty  
24 may prosper together. President Dwight David Eisenhower in his  
25 farewell address to the nation, January 17th, 1961.

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 I appreciate the courage of you men in uniform. I wore  
2 the uniform myself. I was never in combat, but I appreciate  
3 your courage. I understand -- I do understand your courage, but  
4 I want to speak real briefly about the courage of another man  
5 and another type of courage. Three weeks ago I attended a pre  
6 court-martial hearing of a young PFC who exhibited a different  
7 kind of courage. I only hope that down the road if you men  
8 realize -- come to realize that the misplaced power, the  
9 disastrous rise of misplaced power is not only a potential, but  
10 it exists in these technologies and these policies that are  
11 based on these technologies. That you find the courage within  
12 yourself to do much the same thing that that brave young PFC,  
13 Private Bradley Manning (ph), did and help save this country  
14 from this disastrous rise of misplaced power. Thank you.

15 COLONEL ORR: All right. That concludes all the comment  
16 cards that I have at this time. Is there anyone who hasn't  
17 spoken that would like to make a comment at this time? All  
18 right. Is there anyone who has already spoken that would like  
19 to expand their remarks? Come on.

20 MR. AMEEN: Okay. Just briefly. As far as the -- I'm  
21 coming back to the drones again because I'm sure we've all seen  
22 it on the news, we've all read the reports. I mean even using  
23 it militarily there are mistakes that are made by these drones.  
24 And my con -- my big concern about it is we haven't perfected  
25 this technology, but we're pushing forward with it. We're still

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 using it and we haven't perfected it. I'm reading on here about  
2 this quasar thing that they unveiled where somebody's sitting  
3 there controlling these things and I -- my thinking is are there  
4 standards that these people have -- that they have to meet to  
5 control this? You know, are there psychological tests, you  
6 know, like police officers have to take before they're allowed  
7 to join the force? I mean what are the safeguards and the  
8 assurances that these things are not going to be happening here  
9 and that's what concerns me about it.

10 It's -- you know, it seems to me like our society, we're  
11 going -- we're getting to the point where we're trying to mask  
12 what war is really about. I'm a veteran myself. I was an  
13 infantryman and I did one combat tour to Iraq. And it seems to  
14 me with all of this, you know, we're about subtracting our  
15 manpower, but we're -- it seems to me we're masking the real  
16 pain and horror of war. When it gets to the point where it's --  
17 where you can talk easily about war then something's wrong, you  
18 know, something's wrong in our society. And, you know, war  
19 should -- the pain and horror of war should be known because it  
20 should be the last resort of any government and it seems to me  
21 that we're getting to the point in our society where every --  
22 where things are going to be controlled by computers and it's  
23 easier not to put a face to that. You know, and that scares me,  
24 the fact that war is becoming easy, almost like a video game,  
25 like we're sitting around on Xboxes playing Call of Duty or

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 something. That's what it seems to me like real life is getting  
2 to and, you know, there's no reset button in real life. And I'm  
3 -- you know, anybody that's worn that uniform knows that.  
4 There's no reset button in real life and that's what scares me  
5 is that war is becoming a -- it's becoming too easy to consider  
6 as a resort and that's -- that tells me, you know, as a species,  
7 as humanity we've failed and I really hope and pray that at some  
8 point we get it together because that's not a good road to go  
9 down in the future. So that's all I got.

10 COLONEL ORR: Thank you. Is there anyone else that would  
11 like to make a comment at this time? Anyone else? Okay. Well,  
12 on behalf of all current and future service members I would like  
13 to thank you again for your participation and input tonight.  
14 Alaskan Command welcomes your review and comments on the  
15 analysis contained in the Draft EIS. Again, written comments  
16 can be submitted by filling out a comment form tonight or  
17 mailing it to the address on the comment form. Comments may  
18 also be submitted via the website or fax. All comments must be  
19 postmarked or received by June 7th, 2012, to be considered in  
20 the Final EIS. If you haven't already done so, we encourage you  
21 to look at the maps and other displays around the room. These  
22 provide details on the individual proposals and we have someone  
23 at each station to answer your questions. Also, if you decide  
24 that you would like to make a comment myself and the court  
25 reporter will be here till 8:00 o'clock to receive them. We

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 appreciate your time and interest in JPARC and welcome your  
2 comments and that's why we're here today.

3 Thank you again. Please have a safe trip. This hearing  
4 is adjourned.

1                                    P R O C E E D I N G S

2                    (On record at 7:03 p.m.)

3                    COLONEL WEISS: Okay. We are on the record at 19:03  
4 hours. This hearing is scheduled to end at 9:00 p.m. However,  
5 since the crowd is rather small I will certainly allow  
6 additional comments. After we get through the initial comments  
7 you can expand on your comments. We have plenty of time, so I  
8 want everybody to make sure they have their say.

9                    If you do not feel comfortable standing up to make a  
10 statement you can submit a written comment here tonight using a  
11 comment form. You can submit comments until June 7th, 2012.  
12 Keep in mind that the written comments are given the same  
13 consideration as verbal comments that you offer here tonight.

14                    To ensure that we get an accurate record of what you have  
15 to say please help me by respecting the following ground rules.  
16 First, please speak clearly and slowly into the microphone. Now  
17 I will be handing you the microphone. The microphone does not  
18 amplify. It merely is so that the court reporter can record  
19 your comments for the record verbatim. So we will hear you  
20 fine, everything will be picked up, but it will not amplify, so  
21 don't be concerned about that. And please when you come up  
22 state your name and please spell your name for the record so  
23 that we get it correct in the record. And also if you represent  
24 an organization please if you would like to also state the  
25 organization which you represent. Please do not provide any

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 other personal information, such as your home address or phone  
2 number. Your oral comments will be recorded by a court reporter  
3 verbatim, that means word for word, used to develop a transcript  
4 and permanent record of this meeting and will be published as  
5 part of the Final Environmental Impact Statement. The names of  
6 the individuals making comments, as well as their comments, will  
7 be disclosed in the Final EIS. Personal home addresses and  
8 phone numbers will not be published.

9 Second, each person will be allotted four minutes to  
10 speak. In order for each individual speaking to have the full  
11 time allotted, audience members will be respectful of the  
12 opinions offered by your neighbors. If you anticipate your  
13 comments will extend beyond the time allotted, please make the  
14 most important comments first. And again, after the initial  
15 four minutes if you have additional comments we will do an  
16 additional four minutes since we certainly will have the time to  
17 do so.

18 Third, if you have prepared a written statement you may  
19 turn it in at the registration table or you may read it out loud  
20 if you can do so within the time period allotted.

21 Please make -- please honor any request that I make for  
22 you to stop speaking when you reach the four minute time limit.  
23 The timekeeper will hold up a yellow card and you will have 30  
24 seconds left to speak to assist you in knowing when your  
25 allotted time is almost up so you can comfortably conclude your

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 remarks. When a red card is displayed that means the four  
2 minutes are up and in the interest of politeness and fairness to  
3 others who wish to speak the speaker will be asked to stop and  
4 return to his or her seat, and again unless you ask for an  
5 additional four minutes to expand your comments which we will  
6 allow at this hearing.

7 We are ready now to begin. The first speaker I have  
8 listed here is Mr. Dan McGregor. Please come forward if you'd  
9 like. Please go ahead.

10 MR. MCGREGOR: Oh, okay. Dan McGregor, M-C-G-R-E-G-O-R.  
11 As we reported, with Denali Air. Primarily focusing concerns on  
12 areas basically out the Nenana River Valley and glaciers  
13 surrounding the Mount Devera (ph) area. There are right now two  
14 main operators that spend a lot of time, but there's more,  
15 Atkins Flying Service in different areas, different companies  
16 that fly out there with regular routine flights out that area  
17 doing landings, being on the glaciers. The concern was low  
18 level traffic in that area affecting that commercial status and  
19 the ability to make money and of course safety concerns with  
20 fast movers and very slow movers, being us, on wheel skis and  
21 different things. So I just wanted to mostly go on record that  
22 that was brought up in concern.

23 A lot of the areas focus more under the Fox 1 MOA, which  
24 is not going to be an issue as long as that surface ceiling goes  
25 down to -- or stays above 5,000 AGL. Any change to that in the

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 Fox 3, that 500 feet. I understand the need for training at  
2 that low level and that's of value. It's a drastic change and  
3 that's one of the things that concerns us I guess is the severe  
4 change in that from 5,000 down to 500. Most of the glaciers  
5 that we are flying into are going to be out of that realm, but  
6 there are some and there's transit areas where we cross that --  
7 through that. It's very difficult without being able to get in  
8 contact and alert the MOAs. I think radio repeater -- as I  
9 understand it, the radio repeater or the alert systems through  
10 the radio traffic is not quite operational yet and the funding  
11 is in place, but those aren't at full capacity yet I guess for  
12 us to be able to update or get updates on any MOA traffic while  
13 we're in the air as far as I understood and I can find out more  
14 on that later.

15 But in general I just wanted to have it known that there  
16 is commercial traffic out there. We do fly out there regularly  
17 and if that is taken into account that would be a good thing to  
18 have noted. That's it.

19 COLONEL WEISS: Thank you very much. Mr. Adam White.

20 MR. WHITE: Thank you. Name is Adam White serving as the  
21 President of the Alaska Airmen's Association, last name spelled  
22 W-H-I-T-E. First of all, I want to thank the military for your  
23 efforts in educating the public. I've learned an awful lot  
24 about the way our government operates and this whole NEPA  
25 process. Appreciate your patience as you have been educating me

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 and a lot of our constituents and members and thank you for your  
2 efforts and your time for that.

3 A couple of areas that I wanted to comment on tonight.  
4 We, especially here north of the Alaska Range, have really  
5 appreciated and enjoyed the safety and the peace of mind of  
6 having access to the SUAIS Service, the Special Use Airspace  
7 Information Service. That has been a tremendous help in us  
8 transiting the area that you guys use for your operations. It  
9 has helped de-conflict our passage through that area and from  
10 what I hear from your direction back towards us you appreciate  
11 having the knowledge where we are and when we're going to  
12 transit that area.

13 I would like to encourage you to expand that system, and I  
14 know that's been talked about, but especially with the proposal  
15 for the Fox MOA expansion and the Paxson MOA. The most coverage  
16 we could have down there the better and it would -- from our  
17 perspective if the coverage is not there or if a certain  
18 repeater may be out of service consider mitigations for not  
19 using the lower level, lower strata of that airspace when the  
20 communications may not be available for any given time. Because  
21 we've had such great success with that service we would like to  
22 see it implemented actually nationwide to be honest with you.  
23 And we know that there's a couple of other areas in the U.S.  
24 where they have similar type systems, but knowing the success  
25 that we've had here we especially want it implemented statewide

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 and especially in these lower altitudes where the potential for  
2 conflicts exist.

3 One of the things, that as the Airmen's Association we try  
4 to make sure that we're up to speed and aware of what's going on  
5 not just with this particular procedure and policy change, but  
6 with other areas that the military's acting as well as how that  
7 interacts with the FAA. And it's not an easy task, but some of  
8 the things that we've talked about previously, the moving of the  
9 F-16s from Eielson down to JBER and how that might affect some  
10 of your proposals and want to make sure that that's at least  
11 considered or talked about during some of these areas.

12 Looking at my notes here. As we brought up earlier, with  
13 the UAV corridors and the lack of definition from the FAA about  
14 your ability to operate these vehicles in the national airspace  
15 system, want to make sure that if your proposal for the  
16 realistic live ordinance does include connecting R-2211 and R-  
17 2202 that you would not be limited to using that airspace for  
18 what it was specifically requested for. But since that airspace  
19 would potentially be there it would be better to be able to use  
20 it for multiple uses, including the UAVs.

21 Question that we also have that -- not sure that it's been  
22 dealt with sufficiently is the use of Fort Greely and class  
23 delta airspace there with the potential for traffic to possibly  
24 decline in that area and the potential for that no longer being  
25 a full-time type operations, what would that do for some of the

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 transit areas through that area as far as general aviation and  
2 civilian traffic. One of the things that has been brought up  
3 numerous times by our members.....

4 COLONEL WEISS: Sir, you've.....

5 MR. WHITE: Okay.

6 COLONEL WEISS: .....you've taken up four minutes at  
7 least.

8 MR. WHITE: Okay.

9 COLONEL WEISS: (Indiscernible).

10 MR. WHITE: Sorry about that. One of the things that's  
11 been brought up by our members is the narrow slot that would be  
12 available to transit up the Richardson Highway and the  
13 possibility of possibly shaving some of the eastern boundary of  
14 2202 if the restricted area is approved over the battle area  
15 complex to give us a little more breathing room to transit that  
16 area and de-conflict with opposite traffic. That is a heavily  
17 traveled area, especially in low weather, because we tend to  
18 follow low terrain and we need as much room as we can. Also  
19 understanding that if it's bad weather chances of you having  
20 live weapons release from an aerial platform in the battle area  
21 complex is probably pretty limited.

22 But here again, we're dealing with an education issue of  
23 our constituents. They see an area on a map. Unfortunately  
24 they don't always research it to the point to realize that it's  
25 only activated during certain times and that's an education

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3854

1 issue that we constantly struggle and deal with and ask for your  
2 patience on especially.

3 And I guess that concludes my oral statements and  
4 encourage you to look for a written statement before the  
5 deadline of June 7th. So thank you.

6 COLONEL WEISS: Thank you. Sir, would you like to expand  
7 on your comments? Certainly can if you'd like.

8 MR. MCGREGOR: No, (indiscernible) terminology.

9 COLONEL WEISS: All right. Thank you. I would like to  
10 thank you again for your participation and input tonight.  
11 Alaskan Command welcomes your review and comments on the  
12 analysis contained in the Draft EIS. Again, written comments  
13 can be submitted by filling out a comment form tonight or  
14 mailing it to the address on the comment form. Comments may  
15 also be submitted via the website or fax. All comments must be  
16 postmarked or received by June 7th, 2012, to be considered in  
17 the Final EIS. I know you've already looked at the maps and  
18 charts in the back, but please feel free to view them again and  
19 ask additional questions if you'd like as we certainly have the  
20 time available. We appreciate your time and interest in JPARC  
21 and welcome your comments. That is why we're here today and I  
22 thank you. The meeting is adjourned.

23 THE REPORTER: Off record, 7:15 p.m.

24 (Off record at 7:15 p.m.)

25 (On record at 8:35 p.m.)

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

10

1 COLONEL WEISS: We're back on the record. It is now 21:35  
2 hours and we have an additional speaker.

3 UNIDENTIFIED MALE: Will you please just state your name  
4 for the record?

5 MR. GRAHAM: Yeah, it's Robert Graham, G-R-A-H-A-M, and  
6 I'm a missionary pilot up here in Alaska. I fly to and from the  
7 villages taking supplies, clothes, diapers, so on and so forth  
8 in. I've brought 400 missionaries up since 2008 and I just want  
9 to make sure that aviation traffic to the general public  
10 wouldn't be shut down and restrict when and where we fly already  
11 -- more than what it already is. That's pretty much all I have  
12 to say.

13 COLONEL WEISS: Okay.

14 MR. GRAHAM: Sorry. Yeah, I.....

15 COLONEL WEISS: Thank you very much. And let me correct  
16 the time on that. It's, what, 20:35 hours if I stated that  
17 incorrectly. So we're off the record now.

1                                    P R O C E E D I N G S

2            (On record at 7:03 p.m.)

3            COLONEL WEISS:   ....get started please.

4            COLONEL WARING:  Ladies and gentlemen, we're about to  
5   start taking public testimony, so if you could please take your  
6   seats.  If you do still have additional questions so that we  
7   don't have background noise for the recorder if you could maybe  
8   take them outside or have the discussions outside or wait until  
9   after we've completed the comments that we'll be receiving.  
10   Probably we'll have plenty of time to be able to  
11   (indiscernible).

12           UNIDENTIFIED MALE:  We are on the record at 19:03 hours.

13           COLONEL WEISS:  Welcome, ladies and gentlemen, and please  
14   feel free to continue writing your written comments if you so  
15   desire.  We have two individuals that have submitted speaker  
16   cards.  If you change your mind during the course of the public  
17   comment period here and would like to address the group and make  
18   a public comment please feel free to do so.  We'll -- we are  
19   here till 9:00 o'clock tonight, so if you decide you want to  
20   make a public comment please get a card and -- get up and get a  
21   card and feel free to do so.

22           A few ground rules.  We're -- the hearing is scheduled to  
23   go until 9:00 o'clock tonight.  And I would just ask that,  
24   again, if you feel uncomfortable or would rather not make a oral  
25   public comment you're certainly welcome, again, to submit

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 written comments here tonight using the comment form or you can  
2 also submit comments until June 7th, 2012 -- in which to submit  
3 written comments. Keep in mind that written comments are given  
4 the same consideration as verbal comments offered here tonight.

5 To ensure that we get an accurate record of what you have  
6 to say please help me by following the following rules if you  
7 don't mind. First of all, because this is being recorded  
8 verbatim we want to make sure that you speak slowly and clearly  
9 into the microphone. Now the microphone does not amplify. It  
10 is merely a recording device. So I don't think we'll have any  
11 problem having everybody heard in the room here, but don't worry  
12 that it's not amplifying because it's not intended to. Also,  
13 when you come up to make your comment if you could please state  
14 your name and then please spell your last name for the record as  
15 well. And if you happen to be representing an organization or  
16 an association and you'd like to indicate on the record that you  
17 are representing them please do so and name the organization.  
18 Please do not provide any other personal information, such as  
19 your home address or phone number. Your oral comments will be  
20 recorded by a court reporter verbatim, used to develop a  
21 transcript and permanent record of this meeting and will be  
22 published as part of the Final Environmental Impact Statement.  
23 The names of the individuals making comments, as well as their  
24 comments, will be disclosed in the Final EIS. Personal home  
25 addresses and phone numbers will not be published.

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1           Now we're going to start out -- and again, since we only  
2   have two comments we won't, you know, stick strictly to this,  
3   but we'll just start out with each individual will be given four  
4   minutes in which to make their comments. And we will have a  
5   signal with 30 seconds remaining of your four minutes so you can  
6   wind up and then after the four minutes you'll receive a stop  
7   sign. If you would like to expand on your comments, if that  
8   wasn't enough time, as now time should not be a problem you're  
9   certainly welcome and we'll give an additional four minutes so  
10   you can complete your comments. And again, if anybody else has  
11   not signed up please do so if you want to make a comment or if  
12   something somebody says prompts you to make -- want to make a  
13   comment please do so.

14           Oh, and if you've prepared a written statement you may  
15   turn it in at the registration table and you may read it out  
16   loud if you would like as part of the oral comments and turn it  
17   in as a written matter, however you'd like to do it.

18           And I think that covers all our preliminaries and if we  
19   could begin the -- with the first speaker, Brian Okonek.

20           MR. OKONEK: My name is Brian Okonek, last name is spelled  
21   O-K-O-N-E-K. Thank you for this opportunity to comment. I'm  
22   most familiar with the Fox 3 MOA area. I understand the  
23   military's need for practice areas, but also feel that the  
24   military practice areas or the practicing that's being done on  
25   these areas has a huge impact to other users on the ground.

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1       There's -- it's very, very hard, even as big as Alaska is,  
2   to find areas where there's truly natural soundscape and it's  
3   becoming ever more difficult. I used to run a guiding business  
4   and we would take people on wilderness backpacking trips and  
5   their stereotype image of the wilderness was a place for the  
6   most part devoid of human and mechanical noise.

7       We had a business for quite a few years going to an area  
8   that we took very small groups. We didn't visit it very often.  
9   But as aircraft traffic continued to increase in this state we  
10  started getting comments from our visitors that they were  
11  surprised by the amount of aircraft noise and finally it got to  
12  the point that we got enough negative comments about aircraft  
13  noise that we had to quit using certain areas that we had  
14  traditionally used because of over flights. It just didn't --  
15  it didn't go with their vision of what wilderness is. Quality  
16  wilderness really needs quality soundscape.

17       I was very disappointed to see that there were only two  
18  real alternatives left for the Fox 3 area, that alternative A and  
19  alternative E, and they both had flights -- minimum flight  
20  altitudes that went down to 500 feet. That's really low and  
21  it's really low when you have fast moving aircraft and aircraft  
22  coming like over a ridge top when you're in a valley. It's just  
23  amazing the impact it has on the ground. High flying aircraft  
24  you slowly hear it coming and the noise gradually gets louder  
25  and then as it goes over it's the loudest and then it dissipates

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 as it flies away, but when you're in a valley and you suddenly  
2 have an aircraft, even a 185, pop over a ridge it's a real shock  
3 to the whole valley. You don't hear it coming and all of a  
4 sudden you've got this full impact of the noise and it really  
5 changes an experience when you're on the ground, have this type  
6 of activity.

7 I'd really encourage you to go back and reevaluate that  
8 minimum altitude. This Fox 3 area is a very popular area for  
9 people on the ground, people backpacking, people fishing, people  
10 rafting, people hunting. There's a lot of use. Just look on  
11 the map of where it's at. It's close to Anchorage, it's close  
12 to lots of urban areas. It's between all the highway systems in  
13 the state. It's one of the easier places to access and actually  
14 get a wilderness experience from a road. But as you go into it  
15 you end up getting more and more air traffic.

16 The natural soundscape matters for the animals too.  
17 There's -- it's very hard finding definitive sound studies and  
18 how they affect animals and birds. I -- I'm on a -- a member of  
19 a over flights committee for Denali National Park and we've had  
20 access to a long, long list of sound studies and many, many,  
21 many are inconclusive and hard to substantiate just the impacts,  
22 but some of them do indicate that there's -- puts animals at a  
23 high stress level, especially during calving and lambing  
24 periods. The Nelchina caribou herd is in this Fox 3 area. One  
25 of its main calving areas is right in the middle of your MOA,

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 your MOA, and there's also a lot of sheep in the Talkeetna  
2 mountains and in the Alaska Range and their lambs are very  
3 sensitive to disturbance by noise. I encourage you to work  
4 very, very closely with the Alaska Department of Fish and Game  
5 to find out just where these areas are and consult with them  
6 each year to find out where the caribou are calving to try to  
7 create a bubble over those areas to protect them. It's quite a  
8 long period. It's not just the day they drop their calves  
9 that's the critical period. It's the first couple months of  
10 their life. They're very small young calves trying to stay with  
11 the cows and major noise disturbance can separate them and  
12 create problems.

13 And like I -- my question I had about the mitigating, many  
14 of your mitigating factors are very much educational. I'll just  
15 continue just a few minutes here and wrap it up. And I -- and  
16 you did explain that there are other ongoing mitigating factors  
17 going on, but I think you need to really concentrate on some  
18 mitigating factors that will protect critical areas within these  
19 -- all these MOAs. Thank you very much.

20 COLONEL WEISS: Mr. Schapansky.

21 MR. SCHAPANSKY: Thank you. My name is Elwood Schapansky,  
22 S-C-H-A-P-A-N-S-K-Y. I'm a retired local glacier pilot so my  
23 point of view will be that of a pilot rather than of a person  
24 interested in wildlife. I'm also interested in wildlife. We  
25 make many trips to see that from the air and do our best not to

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1   disturb anything.

2           My main concern tonight is that this is like a planning  
3   stage and that our words won't be heard by the FAA. The FAA  
4   should be here ultimately and so that's my first comment. I  
5   would like to be able to say these words to people that will  
6   hear me rather than people that are putting them down on a piece  
7   of paper and hoping that the FAA will see them.

8           I have flown all over Alaska during the last 40 years.  
9   I've been in the Naknek (ph) MOA, I've been in the MOAs to the  
10   west of the Alaska Range, I've been up all along the Tanana  
11   Valley. I've only had one negative experience in a MOA. A MOA  
12   for a pilot is a place where we can fly, but we have to look out  
13   and I've been very, very close to a couple of F-15s in the  
14   Galena area. That's the only bad experience I've had in 10  
15   years flying the Susitna MOA, not a problem. So I'm not  
16   concerned about those areas, I am concerned about the Fox 3 area  
17   and I am concerned about expanding that. I would like very,  
18   very much to have the Fox 3 area to be like the Buffalo area  
19   where there are altitude restrictions. The Buffalo MOA has a  
20   impact below 1,500 feet AGL. I'd like to see that moved up to  
21   3,000 feet as a minimum. Just north of that there's another MOA  
22   that does have the 3,000 foot restriction. I'd like to see that  
23   throughout the entire Fox area and I definitely would not like  
24   to see that expanded.

25           I would certainly favor the expansion of the restricted

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1   airspace that is used for live targeting in the Fairbanks area.  
2   I don't think those people will necessarily appreciate that, but  
3   it is a necessary thing for the military to do and I would be in  
4   favor of that. We're already used to restricted airspace. It's  
5   very well defined, how we deal with it is well defined. The  
6   worst thing for me as a pilot is that the restrictions on  
7   altitude. The altitude flight rules start at 3,000 feet AGL,  
8   that is above ground level. These high speed military aircraft  
9   can penetrate that airspace and it's my responsibility to be  
10   aware of them. I don't have T Cass (ph), I don't have the  
11   ability of seeing them by using my transponder. I don't have  
12   the electronics to do that. So it's see and be seen and I am  
13   not in favor at all of military aircraft impinging upon the  
14   airspace that I'm already used to as an FAA pilot. So 3,000  
15   feet AGL puts me or puts the MOAs in the same restricted region  
16   or in the same set of rules as the FAA already has and we don't  
17   have to worry. We have to look out for other small aircraft,  
18   but we don't have to worry about a high speed jet impinging upon  
19   that area.

20         So if there's any changes going to be made in these  
21   expansions certainly make them so that the FAA rules for, you  
22   know, picking your flight altitude above the ground is  
23   consistent with the altitudes used in the MOAs. Thank you.

24         COLONEL WEISS: Thank you. Would anybody else like to  
25   speak at this time or expand their comments? Apparently not. I

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 will just say that we will be here till 9:00 o'clock. If you  
2 would like to make a comment during that time we'll reopen the  
3 record and you can make a comment then.

4 So for now, on behalf of the -- of all our service men and  
5 women I would like to thank you again for your participation and  
6 input tonight. Alaskan Command welcomes your review and  
7 comments on the analysis contained in the Draft EIS. Again,  
8 written comments can be submitted by filling out a comment form  
9 tonight or mailing it to the address on the comment form.  
10 Comments may also be submitted via the website or by fax. All  
11 comments must be postmarked or received by June 7th, 2012, to be  
12 considered in the Final EIS.

13 So we have no further comments at this time. The hearing  
14 is adjourned. Thank you for coming.

15 UNIDENTIFIED MALE: We appreciate our (indiscernible).

16 COLONEL WEISS: Thank you. We are off the record.

17 THE REPORTER: Off record at 7:17 p.m.

1 P R O C E E D I N G S

2 (On record at 6:57 p.m.)

3 THE REPORTER: On the record, 6:57 p.m. Here you go.

4 COLONEL WARING: Ladies and gentlemen, (indiscernible)  
5 public comment. (Indiscernible) conversation in the hallway  
6 (indiscernible) or please keep the noise level down so we can  
7 proceed with public comments (indiscernible).

8 COLONEL WEISS: Thank you, ladies and gentlemen. This  
9 hearing is scheduled to end at 9:00 p.m. If everyone who wishes  
10 to do so has spoken and you would like an opportunity to expand  
11 on your remarks you may have the chance to do so, if time  
12 permits. If you do not feel comfortable standing up and making  
13 a statement or, if you would prefer, you can submit a written  
14 comment here tonight using a comment form. You can also submit  
15 comments until June 7th, 2012. Keep in mind that written  
16 comments are given the same consideration as verbal comments  
17 offered here tonight.

18 To ensure that we get an accurate record of what you have  
19 to say please help me by respecting the following ground rules.  
20 First, please speak clearly and slowly into the microphone. And  
21 I would note that the microphone does not amplify, it merely is  
22 a recording device for our court reporter. And please state  
23 your name and if you could also please spell your last name.  
24 And also if you represent an organization to please state the  
25 organization to which you represent. Please do not provide any

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 other personal information, such as your home address or phone  
2 number. Your oral comments will be recorded by a court reporter  
3 verbatim, used to develop a transcript and permanent record of  
4 this meeting and will be published as part of the Final EIS.  
5 The names of individuals making comments, as well as their  
6 comments, will be disclosed in the Final EIS. Personal home  
7 addresses and phone numbers will not be published.

8 Second, each person will be allotted four minutes to  
9 speak. If you anticipate your comments will extend beyond that  
10 time, please make the most important comments first.

11 Third, if you've prepared a written statement you may turn  
12 it in at the registration table or you may read it aloud if you  
13 can do so within the four minute time period.

14 Fourth, please honor any request that I make for you to  
15 stop speaking when you reach the four minute time limit. The  
16 timekeeper will hold up a yellow card which means you have 30  
17 seconds left to speak. And this is to assist you in knowing  
18 when your allotted time is almost up. When a red card is  
19 displayed that means the four minutes are up and in the interest  
20 of politeness and fairness to others the speaker is requested to  
21 return to their seat.

22 We are now ready to begin and our first speaker is Mr.  
23 Bill Frey. Mr. Frey.

24 MR. FREY: Thank you. Just want to say thanks for all of  
25 the work you guys have done presenting this. It's been very

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 informative. My concern was the hunting, fishing, traveling  
2 with families and stuff out there. You seem to have addressed  
3 that fairly well. I hope everything goes as it seems and hope  
4 to see you all out there having a good time.

5 COLONEL WEISS: Thanks.

6 UNIDENTIFIED MALE: Thank you, sir.

7 COLONEL WEISS: Mr. Orville Gilman, III.

8 MR. GILMAN: My name's Orville Gilman. I live in Wasilla.  
9 And I read this document previously on the internet some, it's  
10 large, and coming here tonight I appreciate the fact now that  
11 it's actually an Environmental Impact Statement and I have the  
12 same concerns as other people. I don't want to get locked out  
13 of areas we've hunted in for years. I think that as a whole the  
14 military needs these training operations, but I also feel that  
15 as opposed to locking them out -- I mean personally I think that  
16 it'd be safer -- in the issue of live range fires certainly you  
17 don't want anybody in there. In other instances I think working  
18 among the citizen population say during the hunting season would  
19 be more of an opportunity than a hindrance because in  
20 Afghanistan and Iraq right now we're definitely working right  
21 through civilians. It just makes sense that for good real world  
22 training that there's really no need to remove the public from  
23 everywhere.

24 And as far as the environmental impact goes, I -- in all  
25 the years I've lived here since '68, since I was seven years

KRON ASSOCIATES  
1113 W. Fireweed Lane, Suite 200  
Anchorage, Alaska 99503  
(907) 276-3554

1 old, and I -- I've never really seen that the military's impact  
2 on wildlife game populations was any more or less than any other  
3 person or group traveling through the country. So I don't hold  
4 that as something that I fear as a problem.

5 I just am more concerned with it seems like every time we  
6 have an impact statement, an agreement for something to happen  
7 in a certain specific way, a few years later it tends to be that  
8 the federal agency or the state agency starts to take total  
9 control and it doesn't turn out to be the thing that it started  
10 out as. And that's what I'd like to see avoided here, I'd like  
11 to see it -- that the military can train, they can operate in  
12 the state and that we can all still hunt and fish and enjoy our  
13 rights as citizens. Because the bottom line is this is America  
14 and each and every one of us is an American and this is our  
15 government, not a government above us, but a government of us.  
16 It's our decision and I think we can make a reasonable and wise  
17 decision. Thank you.

18 COLONEL WEISS: Thank you, sir. Is there anyone else that  
19 would like to make a public comment? Would either of our  
20 speakers like to expand on their comments at this time?

21 All right. Thank you very much. On behalf of the men and  
22 women of the United States military I would like to thank you  
23 all again for your participation and input in tonight's program.  
24 Alaskan Command welcomes your review and comments of the  
25 analysis contained in the Draft EIS. Again, written comments

## **M.4.7 Summaries of Meetings with Community Leaders**

### **M.4.7.1 City of Anchorage: May 11, 2012**

During the afternoon prior to the Anchorage public hearing, the JPARC team (Colonel Waring, LTC Hunt, LTC Cabral, Capt. Bryan, Joan Smart, and Lou Maslyk) met with George Vatalis, Anchorage City Manager, to brief him on the public hearing. He thanked the team for setting up the hearings.

Key meeting points:

- Discussed potential for impacts to Merrill Field and status of Class D airspace.
- The military discussed that potential hunting season restrictions would be included in the mitigations and would be the same as the 1997 *Alaska MOA EIS* Record of Decision (ROD) or new ones may be added, as applicable.

### **M.4.7.2 Matanuska-Susitna Borough, Aviation Advisory Board, and Fish and Wildlife Commission: May 14, 2012**

The JPARC team (Colonel Waring, LTC Hunt, LTC Cabral, Capt. Bryan, Joan Smart, and Lou Maslyk) met with members of the Matanuska-Susitna Assembly to brief them on the public hearing. The briefing format was a short question and answer session.

Key meeting points:

- Questions focused primarily on the proposed Fox 3 Expansion and Paxon MOA proposal, safety of civil aviators, effects on wildlife, and impacts to recreational activities.
- It was requested that the military take public input on wildlife seriously, given its importance to hunters, guides, and those using it for subsistence.
- It was noted that sonic booms would be very disruptive to wildlife when fighters are flying at 500' AGL proposed for the Fox 3 Expansion and Paxon MOA Addition, especially during moose and caribou calving and hunting seasons.
- The military discussed that potential hunting season restrictions would be included in the mitigations and would be the same as the 1997 AK MOA ROD or new ones may be added, as applicable.

#### **M.4.7.3 Delta Junction: May 18, 2012**

The JPARC team (Colonel Waring, LTC Hunt, LTC Cabral, Capt. Bryan, Joan Smart, and Lou Maslyk) met with George Hallgren and Mike Tvenge, city administrators for the City of Delta Junction to brief them on the public hearing.

Key meeting points:

- City concerns centered around the 2006 MOA between the City and USARAK. Specifically, the conditions from the MOA that need to be met to mitigate fire danger, incendiaries, noise, flooding, and general safety, need to be included in the JPARC Draft EIS.
- The City is concerned about a significant increase of Army training activities and weaponry with the addition of the proposed restricted area.
- Because of this, they feel the Draft EIS should be revised with significant input from Delta Junction.

#### **M.4.7.4 Healy: May 21, 2012**

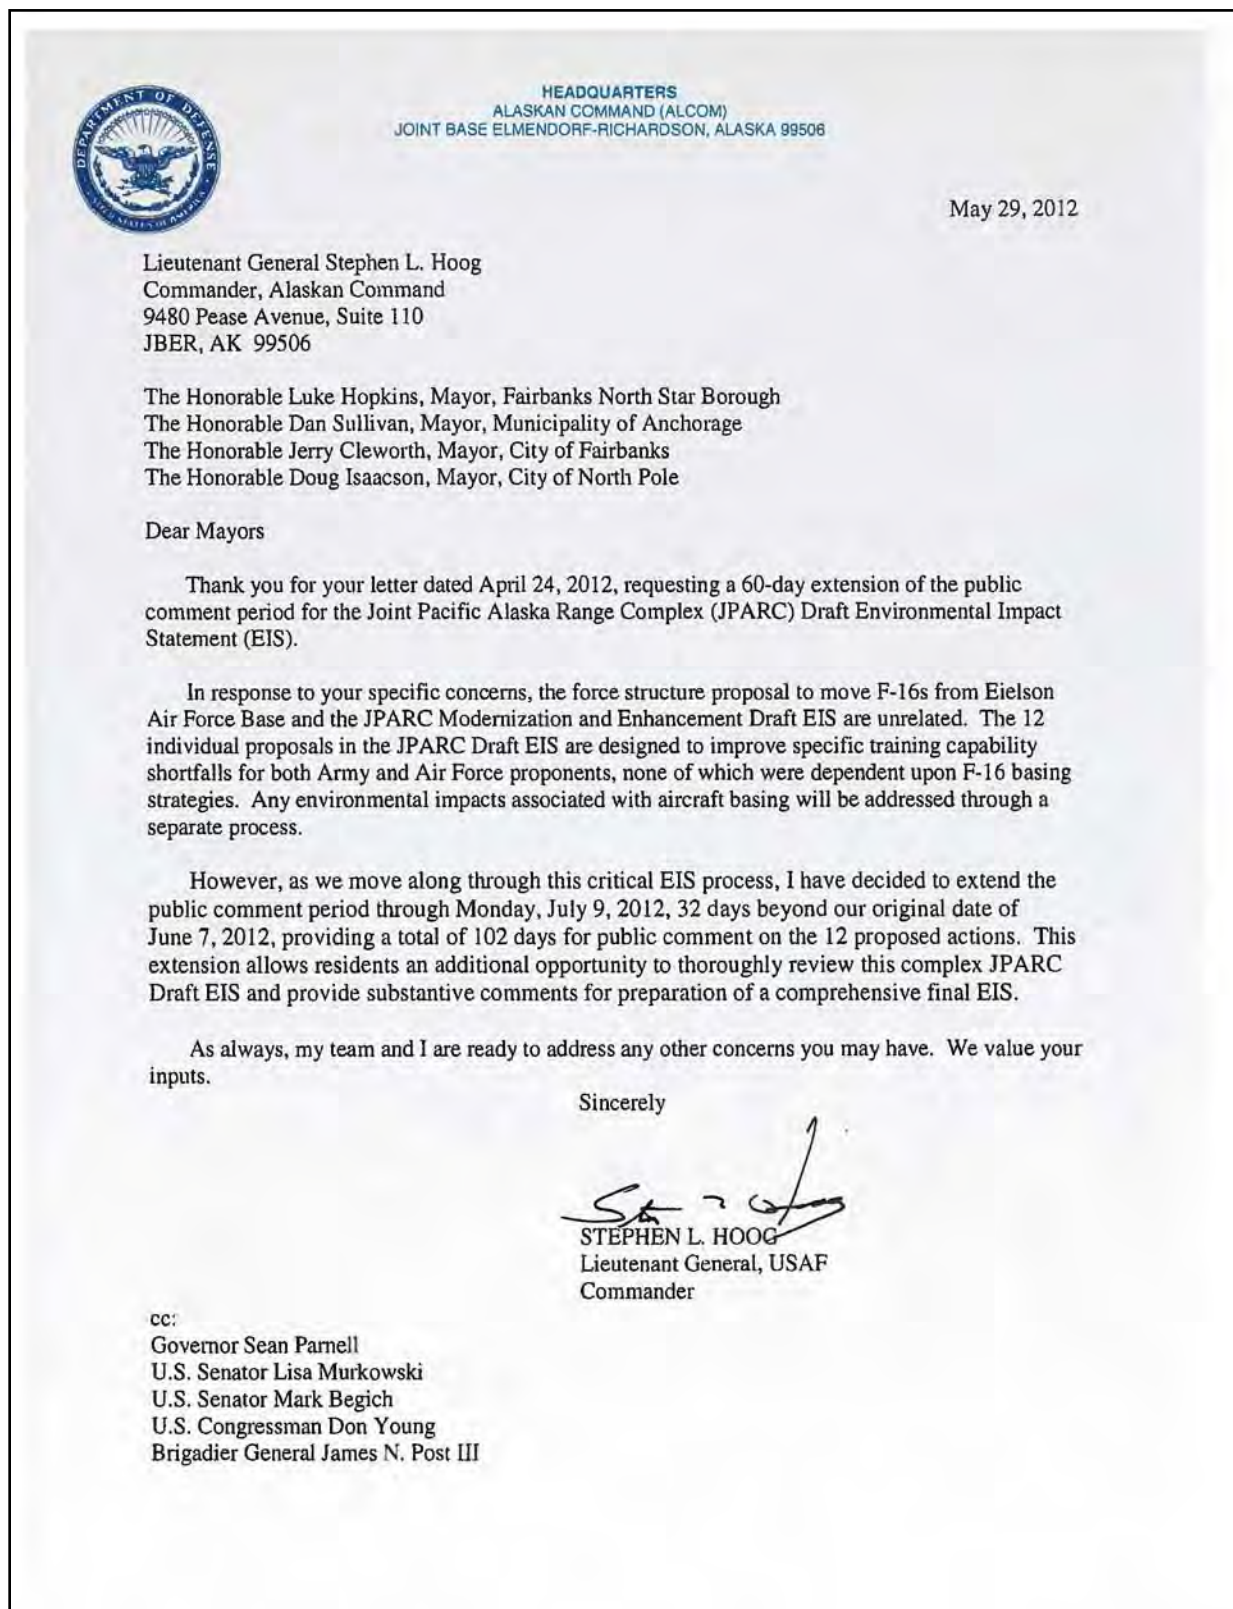

The JPARC team (Colonel Waring, LTC Hunt, LTC Cabral, Capt. Bryan, Joan Smart, and Lou Maslyk) met with Denali Borough Mayor Talerico on to brief him on the public hearing.

Key meeting points:

- The Mayor mentioned he has not received much feedback from his constituents with regard to JPARC.
- His primary concern is the potential access limitations as part of the Realistic Live Ordnance Delivery proposal.
- He asked what the resolution would be and about the days and times access would be restricted.
- He noted the Bonnefield Trail as an important recreational asset that could be adversely affected by such access limitations.

## M.5 DRAFT EIS REVIEW PERIOD CONTINUATION NOTICES

### M.5.1 Extension Request Letters and Letters from General Hoog Extending the Comment Period

HEADQUARTERS  
ALASKAN COMMAND (ALCOM)  
JOINT BASE ELMENDORF-RICHARDSON, ALASKA 99508

May 29, 2012

Lieutenant General Stephen L. Hoog  
Commander, Alaskan Command  
9480 Pease Avenue, Suite 110  
JBER, AK 99506

Ms. Jane Dale  
Alaska Airports Association  
P.O. Box 344  
Willow, AK 99688

Dear Ms. Dale

Thank you for your request dated May 24, 2012, requesting an additional 60-day public comment period for the Joint Pacific Alaska Range Complex (JPARC) Draft Environmental Impact Statement (EIS).

As we move along through this critical EIS process, I have decided to extend the public comment period through Monday, July 9, 2012, 32 days beyond our original date of June 7, 2012, providing a total of 102 days for public comment on the 12 proposed actions. This extension allows an additional opportunity to thoroughly review this complex JPARC Draft EIS and provide substantive comments for preparation of a comprehensive final EIS.

As always, my team and I are ready to address any other concerns you may have. We value your inputs and look forward to hearing Alaska Airports Association comments to our Draft EIS.

Sincerely

9480 Pease Avenue, Suite 110  
JBER, AK 99506

Fairbanks Chamber of Commerce  
100 Cushman Street, Suite 102  
Fairbanks, AK 99701

Dear Ms. Shaw, Ms. Herbert, and Mr. Lundgren

Thank you for your letter dated May 10, 2012, requesting a 60-day extension of the public comment period for the Joint Pacific Alaska Range Complex (JPARC) Draft Environmental Impact Statement (EIS).

In response to your specific concerns, the force structure proposal to move F-16s from Eielson Air Force Base and the JPARC Modernization and Enhancement Draft EIS are unrelated. The 12 individual proposals in the JPARC Draft EIS are designed to improve specific training capability shortfalls for both Army and Air Force proponents, none of which were dependent upon F-16 basing strategies. Any environmental impacts associated with aircraft basing will be addressed through a separate process.

However, as we move along through this critical EIS process, I have decided to extend the public comment period through Monday, July 9, 2012, 32 days beyond our original date of June 7, 2012, providing a total of 102 days for public comment on the 12 proposed actions. This extension allows residents an additional opportunity to thoroughly review this complex JPARC Draft EIS and provide substantive comments for preparation of a comprehensive final EIS.

As always, my team and I are ready to address any other concerns you may have. We value your inputs.

Sincerely

A handwritten signature in black ink, appearing to read "S. L. Hoog", is positioned above the printed name.

## M.5.2 ALCOM Press Release

### *Alaskan Command* **NEWS RELEASE**

**Alaskan Command Office of Public Affairs**  
**9480 Pease Ave, Ste 120, JBER, AK 99506-2100**  
Cmcl (907) 552-2341 DSN (317) 552-2341 Fax: Cmcl (907) 552-5411 DSN (317) 552-5411

FOR IMMEDIATE RELEASE

Release 006  
May 31, 2012

#### **Military will continue to accept JPARC Draft Environmental Impact Statement (EIS) comments through July 9**

JOINT BASE ELMENDORF-RICHARDSON, Alaska – The U.S. Army and U.S. Air Force, on behalf of Alaskan Command (ALCOM), will continue to accept comments on proposed changes to the Joint Pacific Alaska Range Complex through **July 9, 2012**.

Comments received no later than July 9, 2012, will be considered in the preparation of the final Environmental Impact Statement (EIS). Comments may be submitted via the website, [www.jparceis.com](http://www.jparceis.com), mail, or fax.

Make your comments count! Explain how proposed actions may affect you. Give examples. Tell what you do support as well as what you don't. Offer solutions—draw on your expertise as an interested stakeholder to suggest innovative ideas. Those substantive comments received by July 9, 2012, will be included in the Final EIS.

ALCOM, as the Department of Defense's regional joint headquarters in Alaska, has coordinated with the Services to develop a joint strategy to identify joint training opportunities in Alaska, maximize the use of training resources, and improve joint training. The *Environmental Impact Statement for the Modernization and Enhancement of Ranges, Airspace, and Training Areas in the Joint Pacific Alaska Range Complex in Alaska (JPARC Modernization and Enhancement EIS)* will evaluate the elements of this strategy which are reasonably foreseeable.

At present, the JPARC consists of all land, air, and sea training areas used by the Army, Navy, and Air Force in Alaska. The military uses the JPARC to conduct testing, unit level training, and to support various joint exercises and mission rehearsals. The JPARC was originally developed to support cold war weapons, tactics, and techniques. Its current configuration cannot fully meet the training requirement for forces and exercises located in Alaska. The proposed JPARC enhancements would enable realistic joint training and testing to support emerging technologies, respond to recent battlefield experiences, and train with tactics and new weapon systems to meet combat and national security needs. JPARC enhancements would enable the Services to train realistically and jointly so military personnel could succeed in their mutually supportive combat roles when exposed to situations faced in actual combat.

The EIS will analyze the environmental effects of the proposed changes and their alternatives. Federal, state, and local agencies, Alaska Native, and interested groups and persons are encouraged to provide comments on the proposed action by mail or fax at the address and numbers provided below. More information can be found at the project website at [www.jparceis.com](http://www.jparceis.com).

## M.5.3 Federal Register Notice of Continuation

33202

Federal Register / Vol. 77, No. 108 / Tuesday, June 5, 2012 / Notices

2012 be closed to the public because it will concern matters listed in section 552b(c)(1) of title 5, United States Code. Specifically, the information presented meets criteria established by an Executive Order to be kept secret in the interest of national defense and foreign policy.

On the afternoon of June 25, 2012, the DHB will receive briefings on military health needs and priorities. The Board will vote on three potential recommended changes to the Tactical Combat Casualty Care Guidelines and one proposed recommendation on Research, Development, Test and Evaluation Priorities for Battlefield Trauma Care from the Trauma and Injury Subcommittee. Additionally, the Board will receive information briefs from the National Trauma Institute and U.S. Army Institute of Surgical Research.

Pursuant to 5 U.S.C. 552b, as amended, and 41 CFR 102–3.140 through 102–3.165 and subject availability of space, the DHB meeting is open to the public from 1:00 p.m. to 5:15 p.m. on June 25, 2012.

### Written Statements

Any member of the public wishing to provide comments to the DHB may do so in accordance with 41 CFR 102–3.140(c) and section 10(a)(3) of the Federal Advisory Committee Act, and the procedures described in this notice.

Individuals desiring to provide comments to the DHB may do so by submitting a written statement to the DHB Designated Federal Officer (DFO) (see FOR FURTHER INFORMATION CONTACT). Written statement should address the following details: the issue, discussion, and a recommended course of action. Supporting documentation may also be included, as needed, to establish the appropriate historical context and to provide any necessary background information.

If the written statement is not received at least 10 calendar days prior to the meeting, the DFO may choose to postpone consideration of the statement until the next open meeting.

The DFO will review all timely submissions with the DHB President and ensure they are provided to members of the DHB before the meeting that is subject to this notice. After reviewing the written comments, the DHB President, and the DFO may choose to invite the submitter to orally present their issue during an open portion of this meeting or at a future meeting. The DFO, in consultation with the DHB President, may allot time for members of the public to present their

issues for review and discussion by the DHB.

### Special Accommodations

If special accommodations are required to attend (sign language, wheelchair accessibility) please contact Ms. Lisa Jarrett at (703) 681–6670 by Friday, June 15, 2012.

Dated: May 31, 2012.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

### Department of the Air Force

#### Notice To Extend Public Comment Period for United States Air Force Modernizations and Enhancement of Ranges, Airspace, and Training Areas in the Joint Pacific Alaska Range Complex in Alaska Environmental Impact Statement

AGENCY: The United States Air Force, DoD.

ACTION: Notification of extension of public comment period.

SUMMARY: Alaskan Command (ALCOM), on behalf of the U.S. Air Force and U.S. Army is issuing this notice to advise the public of an extension to the public comment period. The initial Notice of Availability published in the **Federal Register** on March 30, 2012 (Vol. 77, No. 62/Notices/19282), requested public comments no later than June 7, 2012. ALCOM has extended the deadline for submitting public comments to July 9, 2012. All substantive comments on the Draft EIS received during the public comment period will be considered in the preparation of the Final EIS.

FOR FURTHER INFORMATION CONTACT: Please direct any written comments or requests for information to Capt Tania Bryan, ALCOM Public Affairs, 9480 Pease Avenue, Suite 120, JBER, AK 99506, ph: 907–552–0876.

Henry Williams Jr.,

Acting Air Force Federal Register Liaison Officer.

## DEPARTMENT OF DEFENSE

### Department of the Air Force

#### Corrected Intent To Grant a Partially Exclusive Patent License

AGENCY: The United States Air Force, DoD.

SUMMARY: This notice replaces the one published on May 18, 2012 in the **Federal Register** under Vol. 77 No. 97 Intent to Grant a Partially Exclusive Patent License. Pursuant to the provisions of Part 404 of Title 37, Code of Federal Regulations, which implements Public Law 96–517, as amended, the Department of the Air Force announces its intention to grant SCADA Security Innovation, Inc., a Delaware corporation, having a place of business at 187 Ballardvale Street, Suite A195, Wilmington, Massachusetts 01887, a partially exclusive license, the exclusive portion limited to the field of cyber security for industrial control systems, in any right, title and interest the Air Force has in U.S. Patent Application No. 13/190,520, filed July 26, 2011, titled “Using Software-based Decision Procedures to Control Instruction-level Execution” by William B. Kimball.

FOR FURTHER INFORMATION CONTACT: The Air Force intends to grant a license for the patent application and resulting patents unless a written objection is received within fifteen (15) days from the date of publication of this Notice. Written objection should be sent to: Air Force Materiel Command Law Office, AFMCLO/JAZ, 2240 B Street, Rm. D–14, Wright-Patterson AFB, OH 45433–7109; Facsimile: (937) 255–3733.

Henry Williams Jr.,  
Acting Air Force Federal Register Liaison Officer.

<p><b><i>Military will continue to accept JPARC EIS comments. Substantive comments received by July 9, 2012, will be included in the Final EIS.</i></b></p> <table border="0"><tr><td data-bbox="373 1039 592 1176"></td><td data-bbox="592 1039 1226 1176"><p>ALCOM, as the Department of Defense's regional joint headquarters in Alaska, has coordinated with the Services to develop a joint strategy to identify joint training opportunities in Alaska, maximize the use of training resources, and improve joint training. The EIS for the <i>Modernization and Enhancement of Ranges, Airspace, and Training Areas in the Joint Pacific Alaska Range Complex in Alaska</i> (JPARC Modernization and Enhancement EIS) will evaluate the elements of this strategy which are reasonably foreseeable.</p><p>At present, the JPARC consists of all land, air, and sea training areas used by the Army, Navy, and Air Force in Alaska. The military uses the JPARC to conduct testing, unit level training, and to support various joint exercises and mission rehearsals. The JPARC was originally developed to support cold war weapons, tactics, and techniques. Its current configuration cannot fully meet the training requirement for forces and exercises located in Alaska. The proposed JPARC enhancements would enable realistic joint training and testing to support emerging technologies, respond to recent battlefield experiences, and train with tactics and new weapon systems to meet combat and national security needs. JPARC enhancements would enable the Services to train realistically and jointly so military personnel could succeed in their mutually supportive combat roles when exposed to situations faced in actual combat.</p><p>The EIS will analyze the environmental effects of the proposed changes and their alternatives. Federal, state, Tribal and local agencies, Alaska Native Corporations, and interested groups and persons are encouraged to provide comments on the proposed action by mail or fax at the address and numbers provided below. More information can be found at <a href="http://www.jparc eis.com">www.jparc eis.com</a>. Comments may be submitted via the website, or mail or fax to: ALCOM Public Affairs, 9480 Pease Avenue, Suite 120, JBER, AK 99506, Phone: 907-552-2341, Fax: 907-552-5411.</p></td></tr></table> <p><b>Make your comments count! Explain how proposed actions may affect you. Give examples. Tell what you do support as well as what you don't. Offer solutions—draw on your expertise as an interested stakeholder to suggest innovative ideas.</b></p>			<p>ALCOM, as the Department of Defense's regional joint headquarters in Alaska, has coordinated with the Services to develop a joint strategy to identify joint training opportunities in Alaska, maximize the use of training resources, and improve joint training.
