Insurance

Prior to scheduling an appointment with Vehicle Registration, you should contact your insurance company and verify you have international coverage or inform them you need coverage in Germany.

Currently, only a few U.S. insurance companies provide electronic insurance confirmation with the USAREUR Vehicle Registration System. You should ask your insurance company if they have electronic confirmation capability with the United States Army in Europe (USAREUR) vehicle registration system. For insurance companies without electronic capability with the USAREUR system, you must have an Insurance Confirmation Card (ICC) in hand. The ICC is sometimes referred to as a 'Double white card'.

An ICC from an authorized insurance company is the only acceptable proof of insurance for registration in the USAREUR system. Every time a vehicle is registered or reregistered with new license plates, an insurance confirmation card (ICC) must be submitted. Green international insurance documents or the German EVB Number (Elektronische Versicherungsbestaetigung) will not be accepted as proof to register a vehicle.

The insurance must be in effect at the time of registration. ICCs must show an issue date that is less than 120 calendar days before the date of application. ICCs with a future effective date will not be accepted. The name on the ICC must match the name of the registered owner. Be sure to call your insurance 24 hours in advance to ensure it has had time to get in our system.

A new insurance card is required any time plates are changed. For local companies this is referred to as a “Double white card or Blank insurance card”, meaning it has no license plate information indicated.
