

1986-1988 Index of CML Articles

Audiovisual

AV Programs Available — and in the works, *Spring 1987*
Lights, Camera, Action — programs not as easy as home movies, *Spring 1987*

Chemical

Armor on the Chemical Battlefield — commanders face unique decision, *January 1988*
Chemical Air Attack — determining unit effectiveness, *Summer 1986*
Chemical Operations in Extreme Cold — possible defects and remedies, *Winter 1986*
Cities: Inviting Targets for Chemical Attacks — increasing urbanization points up need for a credible chemical warfare defense, *September 1987*
Countering the Chemical Threat — providing medical countermeasures to chemical weapons, *September 1987*
DATS Disposal — taking care of defective chemical munitions, *Summer 1986*
Modern Chemical Warfare — complicated by a long list of toxic chemicals, *September 1988*
Remote Chemical Sensing — a proactive approach, *Spring 1986*
The Chemical Strategy — negotiation and modernization, *January 1988*
Time and Chemical Warfare — spotlighting CW inadequacies, *Spring 1986*

Computers

ANBACIS — double-time communication and control, *Summer 1986*
Computer Modeling — using the power of simulation, *Spring 1986*
Operational Sciences — linking computer models to reality, *June 1987*
Target Analysis Planning System — squeezing days into minutes, *Winter 1986*

Decontamination

Aircraft Decontamination — USAREUR joint exercise, *January 1988*
CDTF Construction Complete — getting ready to go hot, *Fall 1986*
Copter Decon — Huey comes clean, *Summer 1986*
Enzymatic Decontamination — substantial combat gains possible, *Winter 1986*

Equipment

Calculators or Nomograms — which is best for the Chemical Corps, *Spring 1986*
New Equipment — to carry, wear, and use, *September 1987*
Operating the M3A4 Smoke Generator on the HMMWV — new mount shows promise, *September 1988*

MOPP Gear Exchange — solution to the dangling filter, *Fall 1986*
 Quick Response Development — in support of an NTC rotation, *Fall 1986*
 Sheltered Protection — for soldiers out of MOPP, *September 1988*
 TACFIRE — and Chemical Corps make a winning combo on the battlefield, *September 1988*
 Testing the XM40 — reactions mostly positive, *Winter 1986*

History

Gas Lessons of WWI — have we forgotten? *Fall 1986*
 Gas Rattles — early devices cheap, effective, *September 1987*
 I am the American Chemical Soldier . . . “A strange yellow cloud . . .” *June 1987*
 The Flaming Bayonet — achieving tactical surprise not so easy to achieve, *September 1987*
 San Jose Island Project — WWII preparation for CM warfare, *Fall 1986*
 Washington and Napoleon — models of civil-military relations, *June 1987*
 Why Weren't Chemical Agents Used in World War II? — policy, luck, and faulty intelligence, *June 1987*

Reconnaissance

NBC Recon Vehicle — sophistication + simplicity, *Spring 1986*
 NBC Reconnaissance — concept evaluation, *Spring 1987*
 Where Do We Stand on NBC Recon? *June 1987*

Smoke/Flame

A Rain of Fire — flame as a weapon, *January 1988*
 Concealment — emphasis on low intensity missions, *June 1987*
 Flame — denial and destruction, *Spring 1986*
 Smoke — the historically proven combat multiplier, *Summer 1986*
 Smoke and Obscurants — cheap countermeasures to high-tech weapons, *September 1987*
 Smoke to the Forefront — part science, part art, *Winter 1986*

Threat

Soviet BW Threat — biotechnological capabilities progress, *January 1988*
 Soviets Violate Ban on Biological Warfare — stunning advances in biotechnology, *Spring 1987*
 Threat Smoke — balanced, mobile, offensive, *January 1988*

Training

A Look Inside the Rad Lab — what goes on there, *Winter 1986*
 An IG in Wonderland — reflections from the looking glass, *Summer 1986*
 ARTEP to AMTP — do you know how to convert? *Spring 1987*
 BNCOC 54B Training — students sound off, *Fall 1986*
 Combined and Joint Operations in Korea — to refine NBC strategies, *September 1988*
 Gruener Laubfrosch — exercise, *September 1987*
 Lessons Learned — from the NTC, *Spring 1987*
 Mission in MOPP4 — training Spearhead Steel style, *Winter 1986*
 NBC Stakes at Panama — mission-oriented, integrated, hot weather training, *September 1987*
 Nuclear Weapons Effects System — undergoes Spring tests, *Spring 1987*
 Operational Aids to Survival — on the NBC battlefield, *June 1987*
 REFORGER 87 — testing chemical doctrine and organization, *September 1988*
 Reserve Components — REFORGER 86 — 13 days of rain, snow, and mud, *Fall 1986*
 Reserves Train at Decon Facility — “a piece of cake,” *September 1987*
 The Branch Training Team — providing feedback from the field, *September 1987*
 The NTC Is . . . Army's unique training facility, *Spring 1987*
 The Surprise is Back — in chemical training attacks, *Spring 1987*
 Toxic Agent Training — new training facility near completion, *Spring 1986*
 Toxic Chemical Training — USACMLS commandant MG Watson first “student,” *September 1987*
 Training Development Strategy — Future focuses on two comprehensive programs, *September 1988*
 Training Devices and Simulations — combining realism and safety, *January 1988*
 Training to Win — should we make it fun? *Spring 1987*
 Unit Training — revised ARTEP incorporates improvements, *Fall 1986*
 What the Trainers Think — insights, observations on the NTC experience, *Spring 1987*
 1st ID's CHEMEX — sustain NBC skills, *June 1987*
 1-73d Armor Fights Soviet Style — how to maintain US fighting skills, *Spring 1987*
 40,000 Train in Chemical Environment — air, land, maritime operations test chemical defense performance, *January 1988*

Miscellaneous

ATTENTION! — how to get your commander's or first sergeant's attention, *September 1988*
 America's Front Line Backup — the Reserve components and training, *Summer 1986*
 Chemical Corps Goes Regimental — for pride, community, and history, *Fall 1986*
 Call to the North — US Army unit performs unique mission, *September 1987*
 Chemical Light Fighters — rapidly responsive worldwide, *Summer 1986*
 CMF 54 SQTs — tricks of the trade revealed, *June 1987*
 Commanding an HHC — hidden opportunities may surprise, *September 1988*
 First Dual-Purpose Chemical Company Activated — 71st first in smoke/decon, *Spring 1987*
 Horizons Expand for CMF 54 — overview of career development, *Fall 1986*
 Marines Assault California Beach — sailors and marines test in MOPP, *Spring 1987*
 Measuring NBC Readiness — preparing for the 90s, *Winter 1986*
 Military Ethics — every level of professional military education includes ethics, *September 1988*
 Modeling Chemical Warfare — showing impacts of chemicals, smoke, *Fall 1986*
 MOPP-Induced Heat Injuries — tips on prevention, *June 1987*
 NBC Rooms — focusing on evaluations, *Winter 1986*
 Olfactory Sensitivity — tobacco smoke versus banana

oil, *January 1988*
 P²NBC² — extended operations and effects on crews, *Summer 1986*
 Protect Against EMP — field techniques that mitigate effects, *Spring 1987*
 Radium Devices — identify, collect, dispose, *Fall 1986*
 Ready-Survive-Win — chemical defense readiness, *Spring 1986*
 Rear Combat Communication Zones — defense dynamics in the static area, *Winter 1986*
 Say "Yes MAM" — for professional development, *Fall 1986*
 Sibert Hall — new home for Chemical Corps, *September 1988*
 Single MOS for CMF 54 — the Army urges merger, *Spring 1986*
 Small Unit Performance in Sustained Operations — Cane I test determines degradation, *June 1987*
 Standardizing Chemical Units — to enhance force effectiveness, *Winter 1986*
 Tactical Nuclear Warfare — can we improve command and control, *Spring 1987*
 The Chemical Corps Museum — a key to our unique heritage, *Summer 1986*
 The Iran-Iraq War — winding down, *September 1988*
 The NBC Defense Team — guidelines for selection, *January 1988*
 The NBC NCO's Job — one commander's viewpoint, *Spring 1986*
 USAREUR Symposium — focuses on NBC readiness, *June 1987* ●●●
