

## Writer's Guide

*Protection*, *Army Chemical Review*, *Engineer*, and *Military Police* are professional-development bulletins designed to provide a forum for exchanging information and ideas within the proponent Army communities. The publications include articles by and about officers, warrant officers, enlisted Soldiers, Department of the Army civilian employees, and others. Writers may discuss training, current operations and exercises, doctrine, equipment, history, personal viewpoints, or other areas of general interest to proponents. Articles may share good ideas and lessons learned or explore better ways of doing things.

Articles should be concise, straightforward, and in the active voice. If they contain quotations or information from other attributable or copyrighted sources, the excerpts must qualify for "fair use" privileges and appropriate endnotes must be provided.

Text length should not exceed 2,000 words (about eight double-spaced pages). Shorter after action type articles and books reviews are also welcome.

Submissions may include photographs and/or line diagrams (with captions) that illustrate information contained in the article. Photographs/diagrams should not be incorporated into the text or otherwise embedded in Microsoft® Word or PowerPoint files; instead, each of them should be sent as a separate file. Digital images should be saved at a resolution no lower than 200 dpi. Images that are not original or obtained from Army sources must be accompanied by a copyright release. The [Photograph/Illustration Guide](#) may be consulted for additional information.

A short biography that includes the author's full name, rank, job title, current unit, and civilian education; current e-mail and physical mailing addresses; and a current commercial daytime telephone number should be included with the article submission.

*Protection*, *Army Chemical Review*, *Engineer*, and *Military Police* are distributed to military units worldwide; as such, they are readily accessible to nongovernment or foreign individuals and organizations. Therefore, all information contained in articles must be unclassified, nonsensitive, and releasable to the public. To ensure compliance, articles must be accompanied by a security release from the author's unit or activity security manager as well as clearance from the organization's public affairs office; neither the [security release](#) nor the [public affairs clearance memorandum](#) may be signed by the author.

Publication of submitted articles, photographs, or diagrams is not guaranteed. Materials are cleared for publication only after thorough review. Authors will be notified if their articles are slated for publication in upcoming issues; for this reason, it is important that notification of any changes in e-mail addresses or telephone numbers be provided.

All articles accepted for publication are subject to grammatical and structural changes as well as editing for style.

Articles for *Protection*, *Army Chemical Review*, *Engineer*, and *Military Police* are accepted year-round. Send submissions by e-mail to:

[Protection](#) | [Army Chemical Review](#) | [Engineer](#) | [Military Police](#)

**Note:** Please indicate if a submitted article has been, or is being considered for, publication elsewhere. In general, articles that have previously been published are not accepted for publication in professional bulletins.
